## **Corrigendum**

### **Page 95 :**

*Figure 3.1. Key characteristics of fragile contexts*

In the third box in the left column, the text should read: the majority of fragile contexts (30) are classified as middle-income (6 upper middle-income and 24 lower middle-income) against 28 low-income countries.

### **Page 124:**

*Figure 4.5: ODA per capita in fragile contexts by World Bank income classifications, 2016*

<https://doi.org/10.1787/888933787085>

Due to a classification error Burundi and Zambia were wrongly classified as lower middle-income and low-income countries respectively.

### **Page 126:**

*Figure 4.6: Aid dependency in fragile contexts by World Bank income classifications, 2016*

<https://doi.org/10.1787/888933787104>

Due to a classification error Burundi and Zambia were wrongly classified as lower middle-income and low-income countries respectively.
