UNCTAD works on building productive capacity (investing in industries and sectors so that countries can diversify exports and build on comparative advantages) and promotes policies at the national, regional and international level that are conducive to stable economic growth and sustainable development. The UNCTAD Virtual Institute (Vi) works with academia in developing and transition countries on a long-term (membership) basis to strengthen their teaching and research capacities on trade and development and increase the policy relevance of their work. It covers: support to the design of trade-related university courses and programmes; workshops, online courses, fellowships and mentored research; promoting South-South and North-South academic cooperation; and dissemination of UNCTAD’s research to academia through website, multimedia resources, videoconference presentations, newsletter. As of 26 November 2014, the network comprised 111 academic institutions in 54 countries.

The first one was a project undertaken in leather industries, agro-processing industries and textiles and clothing by UNCTAD in collaboration with Commonwealth Secretariat and Asian Development Bank for the countries in South Asia. The second was a project to promote developmental regionalism in Sub-Saharan Africa by identifying and encouraging potential regional value chains in Leather industries. The main objective of the upcoming project in 2015 is to generate information on the potential of inter and intra-regional supply chains within the Pacific region (15 Pacific SIDS) and between the Pacific and the Asian region.
