**Executive Summary** .................................................. 13

**Chapter 1. The New Global Landscape of Nations and Institutions**  
by Simon Marginson and Marijk van der Wende .......................... 17  
1.1. Introduction ....................................................... 18  
1.2. Interpretations of globalisation in higher education .............. 18  
1.3. Mapping the global environment of nations and institutions .... 23  
1.4. Global power relations in higher education and research ........ 32  
1.5. Tendencies to “disembedding” from national governance ........ 46  
1.6. Global private and public goods .................................. 50  
1.7. General conclusions ................................................. 54  
Notes ................................................................. 55  
Bibliography ............................................................ 57  

**Chapter 2. Cross-border Higher Education: Trends and Perspectives**  
by Stéphan Vincent-Lancrin ................................................. 63  
2.1. Introduction ....................................................... 64  
2.2. Trends in cross-border higher education .......................... 65  
2.3. Principal current strategies for the internationalisation of higher education ....................................................... 73  
2.4. Student mobility growth perspectives .............................. 77  
2.5. Three future scenarios for cross-border higher education ...... 82  
2.6. Closing remarks ..................................................... 85  
Notes ................................................................. 85  
Bibliography ............................................................ 86  

**Chapter 3. Trends and Future Scenarios in Programme and Institution Mobility across Borders**  
by Grant McBurnie and Christopher Ziguras .............................. 89  
3.1. Introduction ....................................................... 90  
3.2. Limitations in forecasting growth .................................... 91  
3.3. Scenario one: the world of higher education becomes more foreign ....................................................... 93  
3.4. Scenario two: as the world churns .................................. 96  
3.5. Scenario three: branch campus clusters .......................... 99  
3.6. Scenario four: raising the bar ..................................... 101  
3.7. Conclusion .......................................................... 105  
Notes ................................................................. 107  
Bibliography ............................................................ 107
## TABLE OF CONTENTS

### Chapter 4. Europeanisation, International Rankings and Faculty Mobility: Three Cases in Higher Education Globalisation

by Simon Marginson and Marijk van der Wende ........................................ 109

- 4.1. Introduction .................................................................................. 110
- 4.2. Europeanisation ............................................................................ 110
- 4.3. University rankings and typologies ............................................. 122
- 4.4. Global faculty mobility ................................................................. 130
- 4.5. Conclusions .................................................................................. 137

Notes ...................................................................................................... 138

Bibliography ......................................................................................... 140

### Chapter 5. What is Changing in Academic Research? Trends and Prospects

by Stéphan Vincent-Lancrin ................................................................. 145

- 5.1. Introduction .................................................................................. 146
- 5.2. The massification of academic research ........................................ 147
- 5.3. Basic research: the main mission of academic research? .......... 150
- 5.4. Academic research and new public management ........................ 153
- 5.5. The rise of private funding ............................................................ 157
- 5.6. The internationalisation of academic research ............................ 160
- 5.7. A new social contract for research ............................................... 164
- 5.8. Technology .................................................................................. 166
- 5.9. Concluding remarks .................................................................... 167

Notes ...................................................................................................... 168

Bibliography ......................................................................................... 169

### Chapter 6. The Giants Awake: The Present and Future of Higher Education Systems in China and India

by Philip G. Altbach .............................................................................. 179

- 6.1. A difficult history .......................................................................... 182
- 6.2. Contemporary characteristics ..................................................... 184
- 6.3. China and India as international higher education players .......... 187
- 6.4. Societal challenges ...................................................................... 194
- 6.5. The future ...................................................................................... 199

Note ........................................................................................................ 201

Bibliography ......................................................................................... 201

### Chapter 7. European Higher Education Reforms in the Context of the Bologna Process: How Did We Get Here, Where Are We and Where Are We Going?

by Johanna Witte, Jeroen Huismann and Lewis Purser ...................... 205

- 7.1. Introduction .................................................................................. 206
- 7.2. How did we get here: the Bologna Process in motion ................. 206
- 7.3. Where are we: the state of change ............................................... 210
- 7.4. Where are we going: future scenarios ....................................... 216
- 7.5. Summary and conclusions ......................................................... 224

Notes ...................................................................................................... 226

Bibliography ......................................................................................... 227
# Table of Contents

## Chapter 8. Mass Higher Education and Private Institutions
by Pedro Teixeira .................................................. 231
8.1. Introduction ................................................... 232
8.2. The long history and recent expansion of private higher education ............ 232
8.3. Some stylised facts on private higher education ................................. 244
8.4. What future role for private higher education in times of mass higher education? .................................................. 252
Notes ................................................................. 256
Bibliography .......................................................... 256

## Chapter 9. Finance and Provision in Higher Education: A Shift from Public to Private?
by Stéphan Vincent-Lancrin ............................................ 259
9.1. Introduction ..................................................... 260
9.2. Trends in enrolments in public and private higher education ................... 260
9.3. Is public funding declining in higher education? ................................... 266
9.4. Concluding remarks .............................................. 279
Notes ................................................................. 281
Bibliography .......................................................... 281

## Chapter 10. Scenarios for Financial Sustainability of Tertiary Education
by Jamil Salmi .......................................................... 285
10.1. Introduction .................................................... 286
10.2. Trends and factors shaping tertiary education financing ........................ 287
10.3. The changing face of public financing: funding approaches and instruments 297
10.4. Three scenarios for the future ..................................... 306
10.5. Conclusion ....................................................... 316
Notes ................................................................. 317
Bibliography .......................................................... 317
Annex 10.A1. Matrix of voucher systems ......................................... 320

by Richard Lewis .......................................................... 323
11.1. Terminology .................................................... 324
11.2. The development of quality assurance ......................................... 325
11.3. The growth in external quality assurance agencies over the last 20 or so years 326
11.4. The “standard model” and the differences within that model ................. 328
11.5. Emerging trends and the future of external quality assurance ................ 333
11.6. The breaking down of national boundaries ..................................... 342
11.7. A possibly more fundamental change – the end of, or the redefinition of, higher education .................................................. 348
11.8. Summary ......................................................... 349
Notes ................................................................. 350
Bibliography .......................................................... 351
Annex 11.A1. .............................................................. 353
List of Boxes

2.1. Foreign and international students in international statistics ................................. 66
10.1. Demographic impact on the student age population in Russia ............................... 289
10.2. Foreign competition in Indian higher education .................................................. 294
10.3. Performance Contracts in Spain: the “contract program” in Madrid ....................... 305
10.4. Enrollment growth and quality crisis in Egyptian tertiary education ....................... 309
10.5. Demand-side funding in Chile .............................................................................. 313

List of Tables

1.1. Selected indicators of global potential, capacity and engagement, OECD countries and selected other countries ................................. 31
1.2. Spoken languages with more than 100 million voices worldwide ............................ 34
1.3. Countries’ share of the top 500 and 100 research universities as measured by Shanghai Jiao Tong University, compared to their share of world economic capacity. .................................................. 36
1.4. Output of published articles in science and engineering (including medicine and social sciences), OECD countries and selected other countries .................................................. 41
1.5. Countries in which the number of scientific papers in science and engineering grew particularly sharply between 1988 and 2005 .................................................. 42
1.6. Selected indicators on selected countries and regions ................................................ 43
2.1. Destination of foreign students in the OECD area by region of origin (%) and changes between 1998 and 2007 (% points). ................................................................. 68
2.2. Breakdown of foreign students in the major OECD regions (%), 2007, and changes between 1998 and 2007 (% points). ................................................................. 68
2.3. Difference in salary between mobile and non mobile higher education graduates, five years after the end of their studies (2005). ................................................................. 79
3.1. Enrolments of students in transnational Australian higher education from 2000 to 2025 by region (actual and forecasted numbers) .................................................. 92
4.1. The Global Super-league: the world’s leading universities as measured by the Shanghai Jiao Tong University (2007), and The Times Higher (2007) .................. 123
5.1. Share of gross domestic expenditure on R&D (GERD) performed by sector, 1981, 2006 (%). ................................................................. 148
5.2. Distribution of domestic basic research expenditures across sectors of performance (%) .................................................................................. 151
5.3. Basic research as a percentage of R&D performed by each sector (% of expenditure) .................................................................................. 152
5.4. Funding sources of higher education R&D (%). .......................................................... 154
5.5. Percentage of government funding of academic research, by mode of funding (% of public funds). ................................................................. 155
5.7. Share and breadth of international scientific collaboration over time, by country/economy .................................................................................. 162
7.1. Implementation of diploma supplement in 2007 ......................................................... 212
7.2. Implementation of European credit transfer system (ECTS) in 2007 ....................... 213
7.3. Implementation of national qualification frameworks in line with the overarching Qualifications Framework for European Higher Education Area (EHEA) in 2007 .................................................. 214
8.1. Tertiary education students enrolled by type of institution in 2006 (full and part-time students) ................................................................. 238
8.2. Population having attained tertiary education in OECD countries in 2006 (%) ................................. 240
8.3. Earnings of the population with tertiary education relatively to upper secondary and post-secondary non tertiary education ( = 100). .................................................. 240
8.4. Evolution of enrolments in Portuguese higher education from 1971 to 2006 ........... 243

List of Figures

1. Four zones of strategy making by nations and higher education institutions ... 27
2. Number and percentage of foreign and international students in the OECD area, 2007 66
3. Number of national students abroad and mobility rate to foreign countries, 2007 (first countries of origin in terms of student numbers) 67
4. Increase in the number of national students abroad and foreign students in OECD countries, 1998-2007 (1998 = 100) 70
5. Mobility rate to foreign countries (countries with a percentage of over 20%), 2007 71
TABLE OF CONTENTS

2.5. Increase in the number of foreign students worldwide (1975-2007) and projections looking forward to 2030 ........................................... 81

3.1. Growth of transnational higher education – Scenario 1 ......................................... 93

3.2. Growth of transnational higher education – Scenario 2 ......................................... 97

3.3. Growth of transnational higher education – Scenario 3 ......................................... 99

3.4. Growth of transnational higher education – Scenario 4 ......................................... 102

5.2. Number of patent applications filed under the Patent Co-operation Treaty, owned by universities in selected regions/countries (1994-2006) .... 160

5.3. Share of world citations of Science and Engineering (S&E) articles, by major region/country (1995, 2000, 2005) ............................................. 163

5.4. Share of citations in top 1% cited S&E journals, by frequency of citation and region or country/economy (1992-2003) ........................................... 163

5.5. Percentage of worldwide S&E articles coauthored domestically and internationally (1988-2005) .......................................................... 166

5.A1. Four scenarios for academic research ............................................................... 174

6.1. Number of higher education students (in millions) in the early 1990s and 2006 ........... 181

6.2. Distribution of international students in China’s higher education ........................................... 188

6.3. Average academic salaries, selected countries ................................................... 194

9.1. Distribution of all tertiary education enrolments (full-time equivalent) by control of institution, 2006 ............................................................... 262

9.2. Distribution of enrolments (full-time equivalent) in advanced research programs by control of institution, 2006 ........................................... 263

9.3. Change in expenditures on tertiary education institutions between 1995 and 2005 (Index of change 1995 = 100, GDP deflator and GDP, constant prices) ............................................................... 267

9.4. Change in expenditures on tertiary education institutions for all services per student between 1995 and 2005 (Index of change 1995 = 100, GDP deflator and GDP, constant prices) ............................................................... 268

9.5. Distribution of direct funding for higher education institutions by source 2005 (%) ........ 270

9.6. Annual expenditure per student on core services, ancillary services and R&D by source of funding (2005) (in equivalent US dollars converted using PPPs for GDP, based on full-time equivalents (FTE)) ............................................................... 271

9.7. Change in the share of resources coming from households in tertiary education institutions’ expenditures, 1995-2005 (% points) ........................................... 272

9.8. Contribution of households to the expenditures of tertiary education institutions, 2005 (USD and PPPs, based on FTE) ............................................................... 273

9.9. Share of direct expenditures to tertiary education institutions coming from households, 2005 (%) ............................................................... 274

10.1. Evolution of tertiary education gross enrolment ratio from 1985 to 2007 (%) ................ 288

10.2. Current and projected population pyramids for Korea and Denmark ..................... 290

10.3. Enrolment rates by age for full-time and part-time students in public and private institutions in 2005 ............................................................... 291

10.4. Average educational attainment of the Chinese and OECD working-age population (2001) ............................................................... 292

10.5. Demographic shape of tertiary education in the future ........................................... 293

10.6. Change in number of students and total per student expenditures from 1995 to 2004 (2004 constant prices, Index of change 1995 = 100) ................................. 297

10.7. Evolution of total expenditures on tertiary education institutions as a percentage of GDP from 1995 to 2004 ............................................................... 298
