Notes:

This map is for illustrative purposes and is without prejudice to the status of or sovereignty over any territory covered by these maps.

The functional urban areas identified with the methodology described in the book *Redefining "urban": A new way to measure metropolitan areas*, OECD Publishing 2012 are here listed by size, according to four classes:

- Small FUAs, with population between 50,000 and 100,000
- Medium-sized FUAs, with population between 100,000 and 250,000
- Metropolitan FUAs, with population between 250,000 and 1.5 million
- Large metropolitan FUAs, with population above 1.5 million

Functional urban areas are economic units characterised by a city (or core) and a commuting zone that is functionally interconnected to the city.

A city is a local administrative unit (i.e. LAU for European countries, such as municipality, local authorities, etc.) where at

least 50% of its population live in an urban centre. An urban centre is defined as a cluster of contiguous grid cells of 1 km² with a density of at least 1,500 inhabitants per km² and a population of at least 50,000 inhabitants overall. Urban centres are defined using the population grid from the Global Human Settlement Layer database, referred to circa year 2015.

The commuting zone is composed of the local administrative units for which at least 15% of their workforce commute to the city. Commuting zones of the functional areas are identified based on commuting data (travel from home-to-work). Commuting data are also used to defined whether more than one city share the same commuting zone in a single polycentric functional urban area.

The list of functional urban areas takes into account the results of the consultation with the European National Statistical Institutes launched by Eurostat in June 2011 on the definition of cities and by the OECD with Delegates from the Working Party on Territorial Indicators. This list of functional urban areas may be reviewed on the basis of additional comments provided by countries. The OECD Metropolitan Areas Database which provides a set of economic, environmental, social and demographic estimated indicators on the 649 OECD metropolitan areas (functional urban areas with 250 000 or more inhabitants).

Additionally, interactive maps, histograms and summary profiles of each metropolitan area are available on the tool [MetroExplorer](#).

Table 1. List of functional Urban Areas

Fua name	Fua code	Classification	Pop.2015 (GHS)	Share Pop. core (%)
Basel	CH003L2	Metropolitan area	510 000	60
Bern	CH004L2	Metropolitan area	400 000	54
Biel/Bienne	CH010L1	Small area	90 000	59
Geneva	CH002L2	Metropolitan area	570 000	63
Lausanne	CH005L2	Metropolitan area	400 000	57
Lucerne	CH008L2	Medium-sized area	210 000	67
Lugano	CH009L2	Medium-sized area	150 000	53
St. Gallen	CH007L2	Medium-sized area	160 000	45
Winterthur	CH006L1	Medium-sized area	140 000	75
Zurich	CH001L2	Metropolitan area	1 320 000	47
