AGENDA
Achieving climate objectives and a broader set of environmental objectives linked to the Sustainable Development Goals (SDGs) will require:

- Domestic ambition to rapidly and efficiently decarbonise and enhance resilience in all sectors;
- Well-aligned policies across the whole of government;
- Strong and consistent signalling and well-targeted policy interventions to engage and mobilise industry and private finance, combined with a conducive investment environment;
- Increased global co-operation between state and non-state actors, including financial and technical support for developing countries; and
- Monitoring of progress in green investment and financing and of environmental outcomes.

Policies need to be cost-effective and supported by robust, evidence-based analysis, and reflect an understanding of the perspectives and constraints of investors, who will be the engine of the transition to a green and sustainable economy.

This event brings together leading actors from the green finance and investment community to promote effective engagement, collaboration and action on green finance and investment. This includes institutional investors, asset managers, ministries of finance and central banks, financial regulators, commercial and investment banks, international climate funds, multilateral development banks, green investment banks, corporations, civil society, the philanthropic sector and more.

About the OECD Centre on Green Finance and Investment

The Centre seeks to produce high-quality policy-oriented research and analysis on green finance and investment, including climate resilience. A key objective of the Centre is to address policy and market challenges and support the scaling up of green investment. The Centre taps into the private, public and philanthropic sectors for cutting-edge expertise and analysis as well as access to the latest innovations and initiatives in a quickly evolving area. This enriches the Centre’s work and reach, contributes to its analysis, and provides direct insights into the policy making process. The Centre seeks to support developed, emerging, and developing economies by pursuing work in the key areas of:

- strategies, policies, and actions for investment in the low-carbon transition
- resilience and adaptation
- financing for green investment
- tracking progress in green finance and investment

9:45-12:45 **Session 3**

**Planning and delivering sustainable infrastructure**

This panel will discuss a new OECD report (oe.cd/project-pipelines) on government efforts to develop robust project pipelines and improve the delivery of sustainable infrastructure. An important step is to mobilise project developers and other providers of equity who commit time, effort and funds to these projects. The following questions will frame discussions: What is holding back project developers and equity investment in sustainable infrastructure? How to ensure infrastructure planning processes prioritise and fast-track sustainable infrastructure projects? What can governments and other public institutions do to help?

**Moderator**
Ilmi Granoff, Director, Sustainable Finance Program, Climate Works Foundation

**Keynote**
Mafalda Duarte, Head, Climate Investment Funds

**Speakers**
Mahua Acharya, Former Assistant Director-General, Global Green Growth Institute (GGGI)
Jason Eis, Executive Director, Vivid Economics
Mark McComiskey, Senior Managing Director, AECOM Capital
Assaad W. Razzouk, Group Chief Executive Officer, Sindicatum Renewable Energy

11:00-11:30 **Coffee Break**

11:30-12:45 **International initiatives for sustainable infrastructure financing and investment**

This panel will explore international initiatives for sustainable infrastructure financing and investment. A key component of meeting climate and development objectives, latest estimates of sustainable infrastructure investment needs point to a global financing gap of trillions of dollars per year until at least the year 2030. The panelists bring first-hand experience and explore the following questions on the role of international initiatives to scale up sustainable infrastructure investment: Are international initiatives covering knowledge and investment gaps comprehensively enough given the needs? Do they substantially contribute to addressing the challenge? If so, how?

**Moderator**
Anthony Cox, Deputy Director, Environment Directorate, OECD

**Speakers**
Amal-Lee Amin, Chief of Climate Change, Inter-American Development Bank (IDB)
Andi Coines, International Director, Coalition for Green Capital
Asger Garnak, Chief Advisor, Ministry of Energy, Utilities and Climate, Denmark
André Laboul, Special Financial Advisor to the OECD G20 Sherpa; Senior Counsellor, Directorate for Financial and Enterprise Affairs, OECD
Marc Sadler, Practice Manager, Climate Change Group, World Bank

**Discussants**
Amar Bhattacharya, Senior Fellow, Global Economy and Development, Brookings Institution
Daniel Wiener, President of the Board, Global Infrastructure Basel

12:45-14:15 **Lunch and Networking**

<tr>
<td></td>
<td>Ensuring universal access to affordable, reliable, sustainable and modern energy, as defined in the Sustainable Development Goal 7, will be instrumental to achieve the whole 2030 Agenda. A substantial increase in the uptake of renewable energies and of the rate of improvements of energy efficiency is essential to achieve the SDG7 access target and the Paris agreement. This high-level session will focus on the challenges and opportunities of increasing energy access in developing countries while achieving the Paris agreement, through increased use of renewable energy.</td>
