EVALUATION OF THE EUROPEAN COMMISSION'S SUPPORT TO THE UNITED REPUBLIC OF TANZANIA

Documentary analysis and evaluation questions (working document for the reference group inception meeting)

April 4th 2005

Evaluation for the European Commission

This evaluation is commissioned by:

the Evaluation Unit common to:

EuropeAid Co-operation Office,

Directorate General for Development and

External Relations Directorate-General

This evaluation is carried out by: EGEval EEIG

Jacques TOULEMONDE is the contact person in EGEval (toulemonde@eureval.fr)

The evaluation is managed by the evaluation unit who also chaired the reference group composed by members of the services (EuropeAid, DG Dev, DG Budget and the EC Delegation in Tanzania) and the Embassy of Tanzania in Belgium.

The opinions expressed in this document represent the authors' points of view which are not necessarily shared by the European Commission or by the authorities of the countries concerned.

Status and versions of the document

Vers.	Date	Status	Feedback /	Date	Reference
1	02/04/05	Internal draft	JT, HA	02/02/05	
2	04/04/05	Version presented to the reference group			

Intervention logic and suggested questions

This working document is a basis for the preparation of evaluation questions. It is to be discussed in the first Reference Group meeting in Brussels and submitted for comments to all Reference Group members, including Tanzania based ones.

- The four main documents analysed are the following:
- EC country strategy paper and National Indicative Programme (1996)
- EC country strategy paper and National Indicative Programme (2002)
- EC regional strategy paper and Indicative Programme (2002)
- Tanzania's Poverty Reduction Strategy Paper (2000)

The analysis proceeded through the following steps:

- Systematic extracts of sentences reflecting the objectives of the European Commission (see appendix 1)
- Translation of extracts into outputs/result/impact statements and presentation in the form of impact diagrams (coloured boxes in the section 2 hereafter)
- First (very draft) overview of instruments applied and activities
- Connection of selected statements through cause-and-effect assumptions (arrows in the section 2 hereafter) and identification of logical gaps (black boxes) where causal links are not (yet) explicit.
- Identification of areas of special interest for asking evaluation questions (grey spots)
- First proposal for evaluation questions, including preliminary comments on how the evaluation team would address the question and what is the likely utility of the question.

The diagrams are an interpretation of the basic documents by the evaluation team

The questions mainly derive from the diagram. However, the comments owe a lot to a series of interviews held in the EC Delegation in March 30th, 31st.

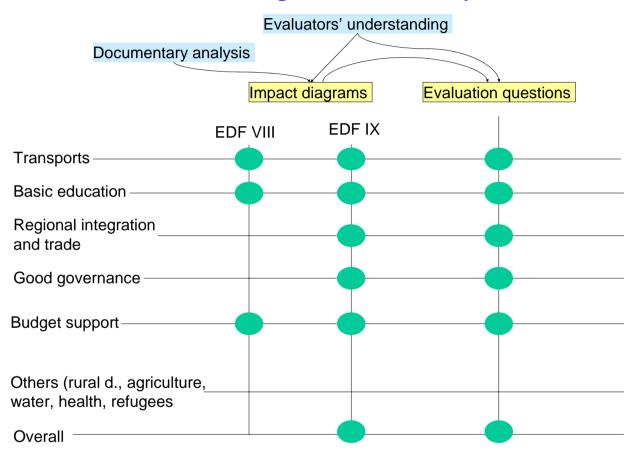

Diagrams and questions are presented in the form of transparencies in the following pages.

The evaluation team will take stock of the Reference Group members' comments in order to propose an amended set of questions.

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

In the framework of the "Evaluation of European Commission Co-operation Strategies, Programmes and Policies for Selected Third Countries", Contract EVA/79-276

Intervention logic and evaluation questions

Impact diagrams- legend

Natural resource support

Instrument or activity implemented by the EC at regional level

Support to the road sector

Instrument or activity implemented by the EC at Tanzania level

Tanzania in regional institutions

Change in Tanzanian institutions at national level

Trade liberalisation

Outputs and results (short term, direct) for targeted groups / organisations (including public authorities at regional & district level)

Expanded equitable enrolment achieved

Impact (longer term, possibly indirect) for targeted groups / ganisations

Improved gender equality

Global impact at macro level

..... 42

Reference to the documents analysed (see appendix)

?

Cause and effect assumption (often made by the evaluation team)

Missing causal link (to date - may result from incomplete evluator's analysis

Programmes

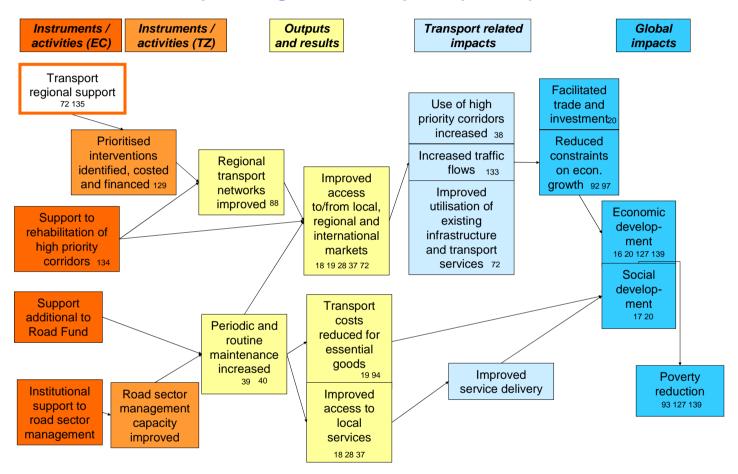

Area of special interest for asking evaluation questions

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

In the framework of the "Evaluation of European Commission Co-operation Strategies, and Policies for Selected Third Countries", Contract EVA/79-276

Impact diagram – Transports (EDF IX)

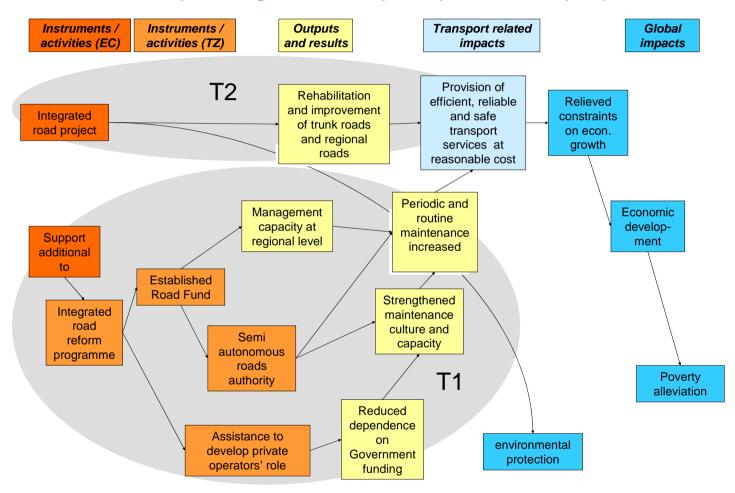

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05 In the framework of the "Evaluation of European Commission Co-operation

and Policies for Selected Third Countries", Contract EVA/79-276

Strategies,

Impact diagram – Transports (EDF VIII – in part)

and Policies for Selected Third Countries", Contract EVA/79-276

ation Strategies,

Evaluation questions - Transports

Road management capacity

To what extent has the EC contributed to creating the capacity to manage the road sector in a coherent, coordinated, complementary and sustainable way?

Evaluation team's approach to the question (preliminary)

- How were EC resources and procedures used for fostering the Tanzanian road reform programme?
- How did EC coordinate with other development parnters in order to fostering the Tanzanian road reform programme?
- Coherent management = means adequately targeted at ends
- Coordinated management = coordinated between various Tanzanian actors
- Complementary management = neither duplication nor holes
- Sustainable management = financially and institutionnally

Utility of the question (+++)

Complex story, partly successful and partly not, of which transferable lessons can be learnt

Strategies,

Evaluation questions - Transports

Efficient transport services

To what extent is the EC support to trunk roads likely to contribute to more efficient transport services for the benefit of Tanzanian population?

Evaluation team's approach to the question (preliminary)

- Who are the current and potential users of the central corridor?
- Which benefits will they get from the rehabilitation of the trunk road?
- Will regional feeder roads be improved in time for the ensuring benefits for all potential users?

Utility of the question (?)

Possibly a too early question since most of EC supported works will be achieved in 2007. The question would be answered on the basis of ex ante impact studies, with limited value added for Tanzanian users and a very low potential for learning transferable lessons.

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05 In the framework of the "Evaluation of European Commission Co-operation

Evaluation questions - Transports

T3

Efficient transport services

To what extent does the EC support to trunk roads integrate environmental protection?

Evaluation team's approach to the question (preliminary)

- Did EC support paid sufficient attention to environmental impacts of road investments? If yes, how? If no, why?
- Were non state actors involved? Which are their current views about future environmental impacts?

Utility of the question (?)

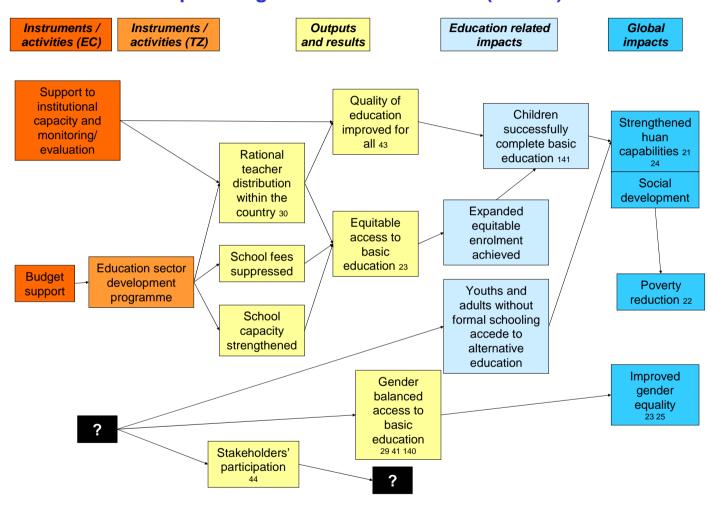

Environmental sustainability is one of the five specific objectives quoted in the NIP An issue which has not been raised in the first interviews in Tanzania Possibly a too early question since most of EC supported works will be achieved in 2007 The question would be answered on the basis of ex ante impact studies mainly

European

Co-operation

Strategies,

Evaluation questions - Education

Basic education for all

How far has EC support assisted in improving the equitable access to quality basic education for all?

Evaluation team's approach to the question (preliminary)

- How far did EC resources and procedures were used as incentives for education sector development?
- How far did EC succeed in promoting results based management and dialog on results?
- How far did EC succeed in promoting non state actors' involvement?
- Basic education = the formal three levels plus informal education e.g. special needs
- Access = actual availability of service (does not include successful completion)
- "for all" includes remote rural areas, girls, disabled

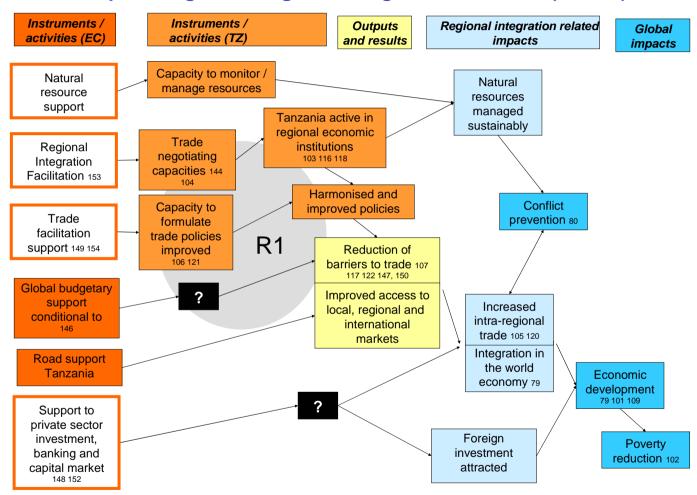

Utility of the question (+++)

and Policies for Selected Third Countries", Contract EVA/79-276

Complex story, partly successful and partly not, from which lessons are expected in the EC Delegation

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05 In the framework of the "Evaluation of European Commission Co-operation

Co-operation

Strategies,

Regional integration and trade (EDF VIII)

There may be particular areas of private sector activity such as trade development which could be appropriate for Community support. This support will be planned in close co-ordination with EIB and will take account of initiatives to stimulate intraregional trade under the Regional Co-operation Programme

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

In the framework of the "Evaluation of European Commission Co-operation Strategies,

Programmes

Evaluation questions - Regional integration and trade

R1 Trade policy

To what extent has EC support contributed to stating relevant trade policy objectives?

Evaluation team's approach to the question (preliminary)

- through an adequately balanced use of aid at national and regional level
- trade policy objectives are relevant if they adequately address internal and external barriers to trade
- coherence with EC agricultural and food policies might be considered

Utility of the question (?)

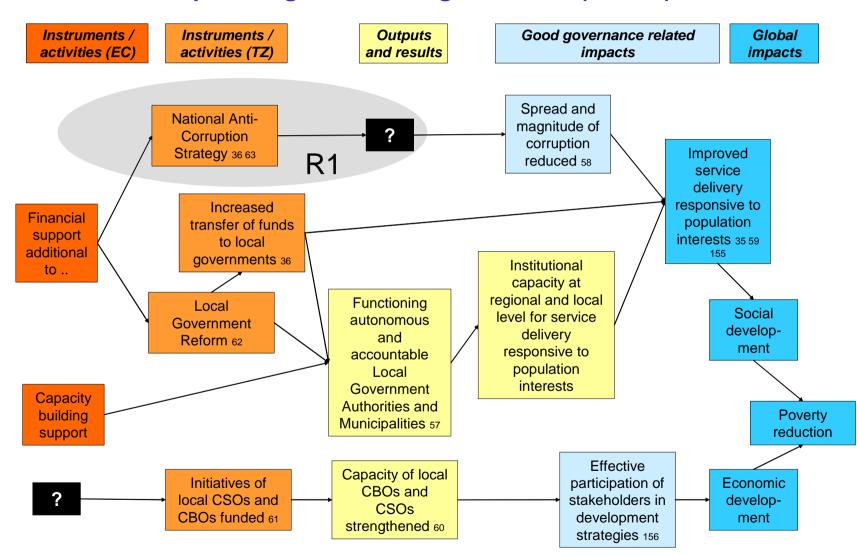

Although the EC Delegation is very active in this domain, the actual support seems to have been limited up to now, which means that the question might be premature.

An alternative option is to question the strategy of the EC in several areas, including trade. See O2

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

In the framework of the "Evaluation of European Commission Co-operation

Impact diagram – Good governance (EDF IX)

Evalu In and F

Good governance EDF VIII

The EC may ... provide support in cross-sectoral areas considered fundamental, e.g. good governance ...

and Policies for Selected Third Countries", Contract EVA/79-276

Strategies,

Evaluation questions – Good governance

G1 Fight against corruption

To what extent has EC support contributed to enhance Tanzania's capacity and ability to fight corruption?

Evaluation team's approach to the question (preliminary)

- Was the EC support additional / influential with respect to the development of the Tanzanian policy, e.g. Prevention of Corruption Bureau?
- Capacity means that relevant institutions, regulations and human resources are in place. Ability means that there is a willingness to implement the policy at all levels

Utility of the question (+++)

Corruption is among the most constraining barriers to economic development and proper service delivery to all.

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

In the framework of the "Evaluation of European Commission Co-operation Strategies, Programmes and Policies for Selected Third Countries", Contract EVA/79-276

Evaluation questions – Good governance

G2

Issue of governance

How far has EC support contributed to promoting good governance at all levels of society?

Evaluation team's approach to the question (preliminary)

- How does the governance issue cross cut EC strategies in all areas?
- How does EC co-ordinates with other donors in its dialog with Tanzanian authorities on good governance issues?
- How does EC encourages public sector reforms, NSA involvement, and prevention of corruption?
- This question is to be addressed in a thematic way, i.e. considering all main areas of cooperation (roads, education, rural development, agriculture, refugees, water, ... and the general budget support)

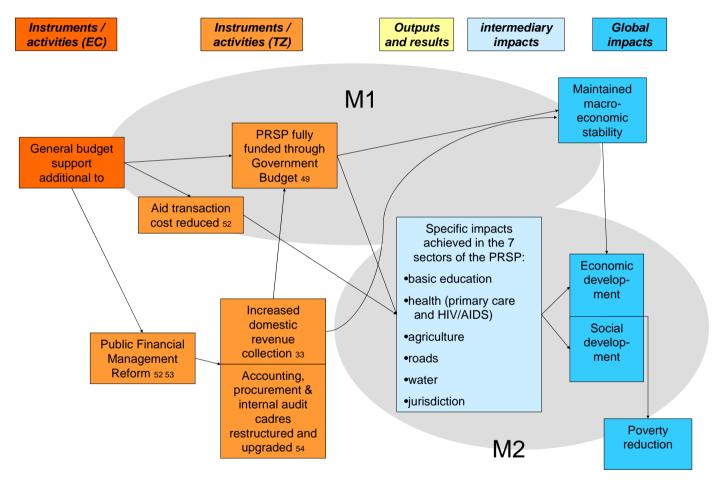

Utility of the question (+++)

Clearly the issue of good governance has been at stake in the road and education sector, as well as in the area of general budget support. Very likely also in all other sectors. High interest in the EC Delegation for learning lessons from a cross sector synthesis.

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

Co-operation

Strategies,

Impact diagram – Budget support (EDF VIII)

Evaluation questions – Budget support

M1

Macro economic stability

To what extent has EC contributed to maintaining and strengthening macro-economic stability?

Evaluation team's approach to the question (preliminary)

- Relates to EC's part of successively adjustment related support and general budget support
- Was EC influential in proportion of its financial weight? Or more? Or less? In which way?
- How did the support contribute to reducing budget deficit?
- How was the support additional / influential in terms of successfully implementing the Tanzanian VAT reform and progress towards sound revenue collection
- What was the contribution of Stabex
- Dimensions of macro economic stability are budget deficit, public debt, inflation and foreign exchange

Utility of the question (+++)

Macro-economic instability was among the most constraining barriers to economic development and a factor of poverty.

Evaluation questions – Budget support

Poverty Reduction Strategy

To what extent and in which way has the EC contribution in the form of general budget support help making progress towards Tanzanian Poverty Reduction Strategy's objectives?

Evaluation team's approach to the question (preliminary)

- Relative contribution of EC
- Higher efficiency through reduced transaction costs and flexible use of funds
- Adequate balance between general budget support and focal sectors
- Allocation of funds could be broken down in various paths to poverty reduction
- The PRS integrates cross cutting issues the question could cover that

Utility of the question

The general budget support to Tanzania has just been subject to a multi-donor evaluation by DFID. Although highly appreciated for its learning of valuable lessons, this evaluation is considered as not sufficient for providing EC institutions and citizens with accountability for EC support.

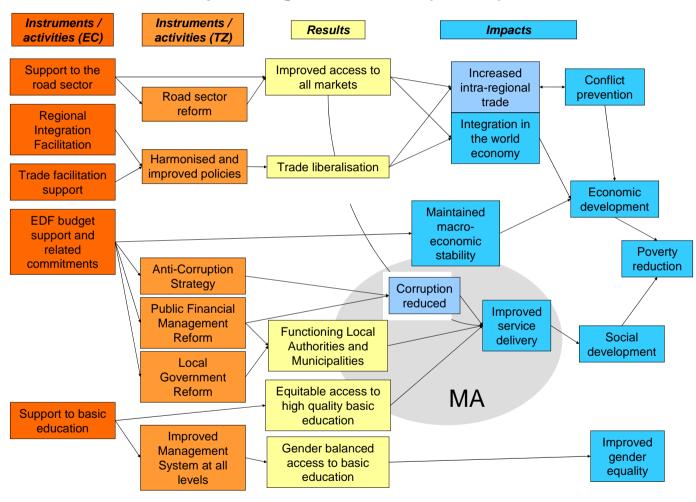

Answering the question in this spirit might help (1) filling this gap as much as possible, (2) learning transferable lessons about what does or does not work in terms of reporting on budget support' impacts

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

In the framework of the "Evaluation of European Commission Co-operation

and Policies for Selected Third Countries", Contract EVA/79-276

-operation Strategies,

Evaluation questions – cross cutting

Donor co-ordination

To what extent does the EC co-ordinate in a coherent and complementary manner with other donors and the Tanzanian administration in order to ensure better delivery of services?

Evaluation team's approach to the question (preliminary)

- Considering comparative advantages and the relative weight of EC
- Considering the Tanzanian Assistance Strategy
- Coherent = means are adequately targeted at ends
- Complementary = neither duplication nor holes

Utility of the question

Lasting efforts of donor co-ordination and the Tanzania Assistance Strategy create particularly interesting opportunity to learn on this issue

Co-ordination is not an end in itself. This is why the question is oriented towards improved service delivery, an objective which proves to be central in the impact diagram

Strategies,

Programmes

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05

In the framework of the "Evaluation of European Commission Co-operation and Policies for Selected Third Countries", Contract EVA/79-276

Evaluation questions – cross-cutting

Relevance of strategy

To what extent are EC strategies at national and regional level coherently addressing the main barriers to the social and economic development of Tanzania?

Evaluation team's approach to the question (preliminary)

- The question relates to areas that are common to both strategy paper, i.e. trade, business support and regional integration
- Natural resource management is also concerned although the issue is addressed in the regional strategy paper only
- Some areas might be missing on both sides

Utility of the question

EC strategy documents have been designed roughly at the same time and they are likely to interfere in many areas.

Strategies,

Programmes

These interferences are not yet visible, but a question related to relevance does make sense

Evaluation of the European Commission's Support to Tanzania, Inception Report, Working document – Version of 04.04.05 In the framework of the "Evaluation of European Commission Co-operation

Areas to be addressed (terms of reference)

- Design and relevance of the strategy
- | Achievement of main objectives
- | Beneficiaries

Who does actually benefit from the EC financial support?

IV V Implementation

Do implementation procedure and mechanisms effectively and efficiently serve the achievement of objectives?

- VI Non state actors
- VII Cross-cutting issues

e.g. gender, environment, human rights, capacity-building across sectors

Strategies,

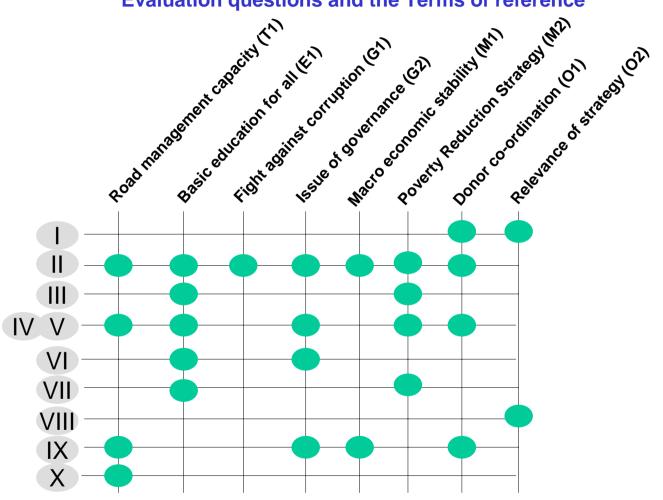

Programmes

- VIII Coherence with other EU policies
- X Coordination with development partners.
- X Sustainability
