WORK PROGRAMME 1999 - 2000

1. This revised work programme has been prepared for consideration at the **February 2000** meeting of the Working Party.
2. The work programme is structured around the tasks specified in the mandate of the Working Party and is closely related to DAC priorities. Activities for which Members have expressed general support but no agency has yet volunteered for leadership, may not be implemented. Further adjustments may also become necessary as a result of discussions of the overall OECD work programme and budget.
3. Feedback to the DAC is an integral part of the work programme and the evaluation process and, therefore, not listed as a separate activity.

Mandate

4. The Expert Group on Aid Evaluation's mandate is:
 - i. "strengthening exchange of information, experience and co-operation between national and, as appropriate, multilateral evaluation units, with a view to:
 - improving the evaluation activities of individual members;
 - encouraging standardisation of methodological and conceptual frameworks;
 - laying the basis for improved donor co-ordination in the planning of major evaluation studies;
 - ii. contributing to improved aid effectiveness by attempting to distil from evaluation studies operational lessons for project and programme planning and design, for consideration by the DAC;
 - iii. examining the feasibility of launching a set of joint or co-ordinated studies, undertaken by interested members, of aid effectiveness in a major sector, such as agriculture, or possibly in particular countries;
 - iv. seeking ways to promote and support developing countries' own evaluation capabilities."
5. The DAC Members will meet on 29 February - 1 March 2000 to review the mandate of all DAC subsidiary bodies. At this meeting the overall "architecture" of DAC Subsidiary bodies will also be discussed to ensure relevance of each subsidiary body's work programme and ways to benefit from possible synergies.

Monitoring and follow up

6. An annual report by the Chair has been issued to review progress made by the Working Party on Evaluation in the implementation of its work programme [see DCD/DAC/EV(2000)1]. Members of the Working Party will review this report in order to ensure that work is on the right track and problems are addressed as appropriate.

7. Strengthen exchange of information, experience and co-operation with a view to:

 - encouraging standardisation of methodological and conceptual frameworks; and
 - improving donor co-ordination in evaluation.
