NEW PRINCIPLES ON GOOD MULTILATERAL DONORSHIP

1. **Adopt whole-of-government approaches** to define expected outcomes of multilateral partnerships and establish adequate co-ordination mechanisms.

2. **Strengthen collective initiatives** to assess multilateral performance, such as multilateral organisations’ evaluation units and MOPAN.

3. **Promote harmonised working practices** of multilaterals and encourage discussions on systemic gaps and division of labour.

4. **Fill gaps** in underfunded areas by funding thematic windows and softly-earmarking funds instead of strictly earmarking at project level.

5. **Increase predictability of funding** by making multi-annual commitments linked to the strategic plans of multilateral organisations.

6. **Use evidence to make decisions** on earmarked funding and ensure alignment with the mandate and priorities of multilateral organisations.
