Climate change disclosure in G20 countries
A majority of G20 countries have some kind of mandatory corporate reporting scheme in place that requires disclosure of climate change related information. This report takes stock of mandatory climate change reporting schemes in G20 countries and identifies commonalities and divergences between the various schemes.

COP21: Getting the most out of corporate climate change disclosure
Corporate climate change disclosure is crucial for providing decision-makers with information that will enable them to integrate climate considerations into their analyses. Angel Gurría will lead this COP21 session on ways to strengthen disclosure frameworks and to scale up the use of corporate climate change-related information.

COP21: Unlocking investment in clean energy
What are the key features of a sound business environment for clean energy investment? What are the main barriers hindering international trade and investment in clean energy? This COP21 session will address these questions and examine policy factors affecting business decisions to invest in clean energy.

COP21: Governance of institutional investments and climate change
This OECD-UNEP COP21 session will explore whether the governance of institutional investments, including in particular any applicable fiduciary standards, adequately considers climate change-related risks and green finance opportunities, and whether guidelines may be needed in this area to support investment decision-making.

Financial instruments for managing disaster risks related to climate change
This article looks at climate change and the financial management of disaster risks. It outlines the contribution of insurance to reducing the economic disruption of disaster events. It also details policy approaches to supporting the penetration of disaster insurance coverage and the capacity of insurance markets to absorb disaster risks.

Climate change and the insurance sector
This special session during COP21 will focus on the potential contribution of the (re)insurance sector to climate change mitigation and adaptation. Debates will focus on managing the financial risks of extreme events, investing in the transition to a low-carbon economy and the role for regulators in addressing climate risks.

Disaster risk financing practices and challenges
Natural and man-made catastrophes present a broad range of human, social, financial, economic and environmental impacts, often with long-lasting consequences. The financial management of these impacts is a significant challenge. This survey reviews the disaster risk assessment and financing practices of a broad range of economies.

Corporate governance and business integrity
Anchored in the G20/OECD Principles of Corporate Governance, this report takes stock of corporate practices tying business integrity considerations into corporate governance frameworks, strategy and operations. It also assesses what factors influence business decisions to implement business integrity measures in practice.
