Background and Objectives of the Latin American Network on Corporate Governance of State-Owned Enterprises

The OECD and CAF - Latin American Development Bank - are co-organizing this sixth meeting of the Latin American Network on Corporate Governance of State-Owned Enterprises (the “Network”) with the support of the Spanish Government and the UK Prosperity Fund. The Peruvian National Financing Fund of State Managerial Activity (FONAFE) will serve as the host of this year’s meeting, which will focus particularly on the themes of board performance and integrity of SOEs. A plenary session involving SOE representatives from Peru is foreseen during the first half-day of the meeting.

The objective of the Network is to enhance SOE governance in Latin America through an ongoing exchange of experience and knowledge on SOE governance policies, practices and reforms, using the OECD Guidelines on Corporate Governance of State-Owned Enterprises (“SOE Guidelines”) as well as for the first time this year, the Guidelines on Anti-Corruption and Integrity in SOEs (“ACI Guidelines”) as the main conceptual framework for discussion. CAF’s Guidelines for Good Corporate Governance of SOEs provide an additional useful reference adapted to the Latin American context. The Network provides a forum to leverage the experience of a range of governments and other institutions to share knowledge on policy, institutional frameworks and best practices to support corporate governance improvements in SOEs across the region.

The Network builds upon a well-established record of collaborating with like-minded institutions, working with policy-makers and other relevant officials concerned with SOE governance throughout the world to support governance reform. Jointly with key regional and global players, the OECD and its Working Party on State Ownership and Privatisation Practices has established regional networks in Asia, the Middle East and North Africa, Russia and Southern Africa, which provide a platform for a structured exchange of reform experiences in key areas for good SOE governance. The more specific objectives of the Latin American Network are to:

- raise awareness of all concerned constituencies on the importance and challenges related to the good corporate governance of SOEs;
- evaluate current SOE corporate governance policy frameworks and practices, and benchmark these against international best practices as described in the Guidelines;
- influence policy making by providing a forum in which policy makers, practitioners and experts can share knowledge and experience among peers;
- support viable and effective reforms, by discussing and analysing policy options, developing relevant recommendations and agreeing on priorities for reforms.

The Network meets regularly in a different Latin American country as a high-level regional hub for a structured policy dialogue on corporate governance of SOEs.

Guidance for chairs, moderators, speakers and participants

Moderators are invited to encourage open discussion among all participants, to maintain the focus on the theme of their session and to be strict in managing time. The objective is to stimulate reflection and encourage an active exchange of views and experience on the discussed issues among all participants. Speakers are reminded that their presentations should be no longer than 10 minutes and should be designed to help frame the discussion. Please limit the use of slides to a maximum of 5 slides, which should be provided to the OECD in advance, so they can be made available on-line. 

Simultaneous interpretation will be provided between Spanish and English.

The OECD SOE Guidelines and ACI Guidelines both highlight the important role that boards play in promoting integrity and ensuring performance in SOEs. This session will explore the many ways in which boards can be empowered to exercise their role and responsibilities, notably through the use of specific training on board duties to act with independent judgement in the interest of the company, on skills required to ensure that internal control systems are effective, compliance with measures necessary to address potential conflicts of interest, and guidelines or programmes to support ethical conduct and integrity.

This session aims to develop a clearer understanding of different approaches in Latin America to carrying out external and internal audit functions, with reference to recommendations of the OECD SOE Guidelines and ACI Guidelines advocating the use of external auditors to review SOE accounts, and a complementary role to be played by state audit institutions. This is particularly relevant in the Latin American context, given the strong role that governmental institutions play in undertaking internal and external audit functions in many Latin American countries’ SOE frameworks.
