

Jeff Dominitz (Ph.D., Economics, University of Wisconsin-Madison) is a Senior Economist at RAND, where he is co-director of the Center on Financial Decision Making and survey director of the American Life Panel. Prior to joining RAND in 2006, he was Associate Professor of Economics and Public Policy in the H. John Heinz III School of Public Policy and Management at Carnegie Mellon University. He has previously held faculty positions at the University of Michigan, the California Institute of Technology, and the University of Southern California. While at Michigan, he was also a research fellow at the Survey Research Center of the Institute for Social Research. While at Carnegie Mellon, he served as Research Director of the Census Research Data Center. In 1998, he co-founded Resolution Economics LLC, one of the nation's premier labor economics and statistics consulting firms, where he served as Senior Economist prior to joining Carnegie Mellon.

His research focuses on the design and application of innovative methods for the collection and analysis of survey data. He has published results of his work in leading journals of economics, statistics, and survey methods. His recent publications include a paper on household expectations of mutual fund returns and portfolio choice behavior, a paper on belief updating by subjects in economic experiments, and a chapter in *The New Palgrave Dictionary of Economics* entitled "Analysis of Survey Data." He also led the analysis of administrative data on financial service providers and assisted in the analysis of household survey data for the recent RAND study on investment advisers and broker-dealers, conducted on behalf of the U.S. Securities and Exchange Commission.
