THE INVESTMENT CLIMATE CONTENT OF THE AFRICAN PEER REVIEW MECHANISM: PERSPECTIVES FROM THE SECRETARIAT

Afeikhana Jerome
APRM SECRETARIAT

NEPAD-OECD Africa Investment Initiative Roundtable
Lusaka, Zambia
27 November 2007
Outline of presentation

- Introduction
- Overview of the APRM
- Investment Content of the APRM
- The OECD PFI
- Conclusion/ Emerging Challenges
Introduction

- The investment deficit in Africa is quite huge. According to World Investment Report 2007, Africa accounted for $36 billion of FDI Inflows, a new record high, which was a mere 2.7 of Global FDI inflows.

- The Continent has so far failed to unleash its investment potential despite considerable efforts over the past decade to improve the investment climate.

- The NEPAD-OECD Initiative which aims to foster sustainable growth, employment creation and poverty reduction by advancing private investment in African countries is quite timely.
Overview of the APRM

Africa entered the new millennium with optimism and a commonly derived and broadly supported roadmap of how to overcome the development challenges of the last decades.

These were exacerbated by a range of factors including conflict, institutional decay, leadership and managerial deficit, endemic corruption and economic mismanagement.

The Africa’s agenda for renewal and overcoming these development deficits includes advancing the basic values of democratization and good governance, which together constitute the key requirements for sustainable development.
Overview of the APRM

The APRM which is turning out to be the most innovative aspect of NEPAD is a self-monitoring instrument voluntarily agreed to by member states of the African Union.

It is unprecedented in scope, compared to even the OECD that invented modern Peer Review. It covers four broad areas, namely: Democracy and Political Governance; Economic Governance and Management; Corporate Governance; and Socio-Economic Development.

The core guiding principles are transparency, accountability, technical competence, credibility and it should be free from manipulation. It is African-owned and African driven.
Djibouti’s accession in July 2007 brings to 27 the total number of AU member countries that have so far acceded. Mauritania has indicated intention to accede.

This represents about 74 per cent of the African population.

We look forward to other countries joining the fold.
Status of Implementation

- So far, **15 out of the 27 member countries have launched the process.**

- **Five countries have been peer reviewed by the APR Forum.** (Ghana, Rwanda, Kenya, South Africa and Algeria).

- **Other countries that have began the process are** Burkina Faso, Lesotho, Mauritius, Mozambique, Mali, Nigeria, Tanzania.

- **Benin** received a review mission in July 2007 and it is expected to be peer reviewed in January 2008.

- **Uganda and Nigeria** review missions are planned for February 2008.
Key Lessons
The APRM is making it possible for countries to benchmark good governance in Africa on shared African and international norms and standards as well as for citizens to participate in the evaluation of how they are governed.

It is showcasing African innovative thinking in governance.

The German President during his opening address at the recently concluded African Partnership Forum 2008 in Algiers indicated that “is this not an area where the rest of the world including Europe can learn useful lessons from Africa?”. 
The primary purpose of the APRM is:
“To foster the adoption of policies, standards and practices that lead to political stability, high economic growth, sustainable development and accelerated sub-regional and continental economic integration through sharing of experiences and reinforcement of successful and best practice, including identifying deficiencies and assessing the needs of capacity building.”

- The 88-Page questionnaire constitute the basis of conducting the self-assessment.

- However, Countries are free to adapt the questionnaire to suit their peculiarities
**APRM Master Questionnaire**

Investment Content of the APRM

- There have been several comparisons of the Investment Content of APRM Questionnaire and the OECD Policy Framework for Investment (Ross 2006; Busia 2007; Copel 2007; and Chigunta 2007).

- Mindful of the objectives of the two initiatives, this is a need to strengthen the investment component of the APRM.

- The Algiers 2007 APRM Workshop has proposed a new Objective 4 in Economic Governance and Management on Trade Policy and Investment. Hopefully, this will also accommodate the relevant Standards and codes on Investment.
The OECD PFI

- The Policy Framework for Investment (PFI) was developed to help governments overcome “private investment deficit”. It represents the most comprehensive multilaterally-backed approach to date for improving investment conditions.

- Founded on the 2002 United Nations Monterrey Consensus on Financing for Development which ascribes to governments the responsibility for creating the right conditions for private investment to flourish, the PFI aims to support development and the fight against poverty amongst others.

- It addresses some 82 questions to governments in 10 policy areas to help them design and implement good policy practices for attracting and maximizing the benefits of investment.
The OECD PFI

- This is a laudable initiative that can easily be implemented by African Countries.

- The OECD has mainstreamed peer review into most aspects of its work including investment policy
Conclusion

Additional Investment Challenges in Africa for both the OECD and APRM

- Most of the FDI inflows in is still targeted at Extractive industries? How can Africa attract efficiency seeking FDI to complement domestic investment?

- Concern has risen in several mineral rich countries on impact of real exchange rate appreciation on other export oriented activities. Zambia, for example, witnessed a 10-fold increase in copper exports from 2000 to 2007. Attractiveness for FDI suffered in export oriented clothing and horticulture.

- Top FDI recipients are not exactly the best reformer? (Top 10 in 2006 – Egypt, Nigeria, Sudan, Tunisia, Morocco, Algeria, Libya, Equatorial Guinea, Chad, and Ghana). How can we ensure pay-off for good reformers?
Thank you for your attention
