

Sam Paltridge, Ph.D., is in the Directorate of Science Technology and Industry, for the Organisation for Economic Co-operation and Development (OECD). He joined the OECD as a communication analyst in the division of information computer and communications policy in 1993. Recent work in communication has included broadband infrastructure as well as Internet issues such as international traffic exchange. He worked on the Communications Outlook series between the 1995 and 2005 editions; and between 2004 and 2007 was principal administrator of ICT statistics in the OECD's Economic Analysis and Statistics Division. Most recently he was one of the organisers of the OECD Ministerial on the Future of the Internet Economy held in Seoul during June 2008.

Dr Paltridge is the OECD's representative on the Internet Corporation for Assigned Names and Numbers' (ICANN) Government Advisory Committee (GAC) and was one of the founding members of the GAC. Sam has also served in a number of advisory roles to governments, such as the Australian Government's Broadband Advisory Group, and he is a former member of the organising committee for the Telecommunications Policy Research Conference (TPRC) held each year in Washington. Sam's work with the OECD involves working closely with other international organisations on ICT policy and, in 2005, he chaired the International Telecommunication Union's World Meeting on Telecommunication/ICT Indicators. He is currently the OECD's representative to the Internet Governance Forum and serves on the International Advisory Board of LIRNEasia.
