## Fifth Annual Conference OECD-CEPII

### DEVELOPING COUNTRIES AND THE GLOBAL CRISIS

26<sup>TH</sup> & 27<sup>TH</sup> NOVEMBER 2009

---

**OECD**  
**Conference Centre**  
**2, rue André Pascal – 75775 Paris Cedex 16**

The current economic and financial crisis have been affecting developing countries through several channels: global trade collapse, decrease of oil and commodity prices, capital outflows, drop in remittances, uncertainty regarding the future of official development assistance...

At a time when global economy is showing its early signs of recovery, the OECD, the CEPII and its business Club, under the auspices of the OECD Development Centre, organize their 5<sup>th</sup> joint conference to take bearings on these issues:

- Should we still trust export-led development strategies? Can the Development Round be concluded?
- What are the prospects for international workers and their contribution to the development of their source countries?
- What are the consequences of the crisis on labor markets?
- After a period of retrenchment, will international investors be back to developing countries?
- Are the Millennium Development Goals still on track?
- What are the reforms needed for more development-friendly global economic governance?
