

Table of Contents

Introduction	9
Chapter 1. Patterns of Health Care Spending Growth	19
Introduction	20
Patterns of expenditure growth over the recent past	20
Contributions to growth in spending.....	23
The share of health-care spending in GDP.....	24
Factors potentially contributing to differences in the level of health care spending ...	27
Demands placed on the health system.....	27
Supply-side factors.....	33
Differences in health care spending: the broader picture	45
Conclusions.....	46
Notes	48
Bibliography.....	50
Chapter 2. Market Mechanisms and the Use of Health Care Resources	53
Introduction.....	54
Experience to date.....	55
Improving policies	67
Conclusions.....	70
Notes	73
Bibliography.....	74
Chapter 3. Improving Health Care System Performance through Better Co-ordination of Care	79
Introduction.....	80
Interest in co-ordination of care issues is increasing.....	80
Care co-ordination: issues, practices and concerns	82
Policies for system-wide improvements in care co-ordination	89
Care co-ordination may benefit from greater health-system integration.....	93
Conclusions.....	94
Notes	96
Bibliography.....	98

Chapter 4. Ensuring Efficiency in Pharmaceutical Expenditures	101
Introduction.....	102
Current policies, instruments and experiences and their impact.....	104
Improving policies.....	117
Conclusions.....	121
Notes.....	124
Bibliography.....	126
Chapter 5. Using ICT to Monitor and Improve Quality in Health Care	129
Introduction.....	130
What is quality of care?.....	132
Improving quality measurement in health care and the role of ICT.....	137
Conclusions.....	145
Notes.....	147
Bibliography.....	148
Chapter 6. The Impact of User Charges on Health Care	151
Introduction.....	152
User charges in high income countries.....	152
Developments in Europe.....	155
Evaluating user charge experiments.....	157
Conclusions.....	158
Notes.....	161
Bibliography.....	162
Tables	
Table 1.1. Summary of factors potentially contributing to differences in health spending across countries.....	45
Table 5.1. Overview of indicators used in the Health Care Quality Indicator Project.....	135
Table 6.1. Annual use and spending per person in the RAND health insurance experiment.....	158
Figures	
Figure 1.1. Annual average growth rate in real health expenditure per capita, 1995-2006.....	21
Figure 1.2. Health spending as share of gross domestic product, 1995 and per capita health expenditure growth, 1995 to 2006.....	22
Figure 1.3. Annual average growth rate in health expenditure and gross domestic product, 1995-2006.....	23
Figure 1.4. Contribution to average annual growth rate in health expenditure per capita, 1995-2006.....	24

Figure 1.5. Total health expenditure as percentage of GDP, 2006	25
Figure 1.6. Total health expenditure per capita (USD PPP 2000), 2006	26
Figure 1.7. Health expenditure per capita and national income per capita, 2006	26
Figure 1.8. Share of the population aged 65 and over and health spending per capita, 2006	29
Figure 1.9. Incidence rate for all types of cancer and health spending per capita, 2002	29
Figure 1.10. Doctors' consultations and health spending per capita, 2005 (or latest year)	30
Figure 1.11. Doctors' consultations and density of physicians, 2005	31
Figure 1.12. Rate of total hospital discharges and share of the population over 65, 2005	32
Figure 1.13. Remuneration of general practitioners in USD PPPs, selected OECD countries, 2004 (or most recent year)	34
Figure 1.14. Remuneration of specialists in USD PPP, selected OECD countries, 2004 (or most recent year)	34
Figure 1.15. General practitioner and specialist remuneration as a multiple of the average national wage and gross domestic product per capita, 2004 (or most recent year)	35
Figure 1.16. Remuneration for nurses: ratio with relation to GDP per capita, 2005	36
Figure 1.17. Potential for reduction in unit costs across countries for seven hospital interventions, 2006	37
Figure 1.18. Practising physicians per 1 000 population, 2006	38
Figure 1.19. Practising nurses per 1 000 bed-days, 2005	39
Figure 1.20. Acute care hospital beds and average length of stay in hospitals, 2005	40
Figure 1.21. Coronary revascularisation procedures, per 100 000 population, 2004	41
Figure 1.22. Per capita spending on curative care and number of MRI machines, 2006	42
Figure 1.23. Pharmaceutical expenditure per capita (USD PPP 2000) and share of gross domestic product, 2006	43
Figure 1.24. Spending on health administration and health insurance as a share of current health expenditure, 2006	44
Figure 3.1. Who refers patients?	84
Figure 3.2. Who refers patients?	84
Figure 3.3. Where do problems of care co-ordination occur?	85
Figure 3.4. Arrangements and incentives for care co-ordination	86
Figure 6.1. Private expenditure as a percentage of total health expenditure, 2005	153
Figure 6.2. Trends in out-of-pocket as a percentage of total health expenditure, 1980-2005	154

Boxes

Box 3.1. OECD questionnaire on co-ordination of care	81
Box 3.2. How disease management works: An example from the United States	87
Box 4.1. Pharmaceutical policy checklist	122
Box 5.1. Data sources for measuring quality	133
Box 5.2. The UK National Quality and Outcomes Framework	141
Box 5.3. Pharmaceutical information systems: the opportunities.....	145
