Editorial: Preventing the Jobs Crisis from Casting a Long Shadow	11
Chapter 1. The Jobs Crisis: What Are the Implications for Employment and Social Policy?	17
Introduction	18
Main findings	20
The labour market impact of the crisis (Part A)	20
Employment and social policy responses to the jobs crisis (Part B)	22
Part A. The Labour Market Impact of the Crisis	25
1. Labour market impact of the crisis in historical context	25
1.1. The impact of the downturn on labour market conditions: how bad is it? ..	25
1.2. The jobs impact of fiscal stimulus packages	27
1.3. Implications of a sharp economic downturn for job losers: three provisional lessons from recent history	33
1.4. Specific features of this downturn as regards its impact on labour markets. . .	35
2. Uneven impact of recessions on the labour market across workforce groups . .	40
2.1. The cyclical sensitivity of total hours worked to the business cycle across workforce groups	41
2.2. The role of different adjustment margins in accommodating cyclical changes in labour demand	48
2.3. The nature of cyclical unemployment	51
Part B. The Employment and Social Policy Response to the Jobs Crisis	60
3. Overview of national labour market programmes and their responsiveness to recessions.	60
3.1. Overview of national labour market programmes	60
3.2. Historical patterns in the cyclicity of programme expenditures	64
3.3. Early responses to the jobs crisis	68
4. Making the most of income-support policies in a downturn	74
4.1. Income support for job losers	75
4.2. Support for low-earning individuals – protecting workers and jobs?	80
4.3. Income support for those experiencing severe hardship.	83
5. Making the most of policies to help the unemployed back into work in a downturn	87
5.1. Activation when labour market slack is high	87
5.2. Does short-time working represent a good way to reduce job losses?	89
5.3. An expanded role for using job subsidies to stimulate new hiring?	93
5.4. Public-sector direct job creation: a back-stop to keep activation credible? ..	93
5.5. Should training be expanded to make productive use of the increased time spent out of work?	95
5.6. Lessons for policy	96

6. Reconciling measures to reduce the social costs of economic downturns with the need to support high labour supply in the long run.	97
6.1. How to avoid measures to ease access to early retirement or disability benefits?	97
6.2. How to help youth in their transition from school to work?	98
6.3. How to help immigrants to continue to integrate?	100
Conclusions.	100
Notes	101
Bibliography	110
Chapter 2. How Do Industry, Firm and Worker Characteristics Shape Job and Worker Flows?	117
Introduction	118
Main findings	119
1. Job and worker flows in the business sector: How do they vary across countries and industries?	120
1.1. Job and worker flows at the industry level.	121
1.2. Looking inside job and worker reallocation	129
1.3. Dismissals	133
2. Labour market flows through the lenses of firms: Which firms create and destroy more jobs?	135
2.1. Entry, exit and continuers	135
2.2. Job creation and destruction conditional on firm survival: The role of firm age and size	137
2.3. Gross job reallocation and productivity	142
3. Labour flows as a source of opportunities and costs for workers: Which are the workers affected by greater mobility?	146
Conclusions.	151
Notes	151
Bibliography	154
Annex 2.A1. Sources and Definitions	158
Chapter 3. Is Work the Best Antidote to Poverty?	165
Introduction	166
Main findings	166
1. Taking the measure of in-work poverty.	168
1.1. Alternative measures of poverty	168
1.2. Poverty among the working-age population: good labour market performance helps to reduce poverty risk, but does not solve all problems	172
1.3. In-work poverty risk is significant in virtually all countries	179
2. Alleviating in-work poverty	185
2.1. Social transfers: A key component of policy packages to fight poverty	185
2.2. In-work benefit schemes can be an effective tool to fight in-work poverty.	193
2.3. Minimum wages alone are not the best instrument to fight in-work poverty, but they may constitute a useful complement to IWBs.	197
Conclusion	201
Notes	201
Bibliography	202

Chapter 4. Pathways onto (and off) Disability Benefits: Assessing the Role of Policy and Individual Circumstances	211
Introduction	212
Main findings	213
1. Disability benefit trends: evolution and recipients' characteristics	214
1.1. Disability trends	214
1.2. Who are the disability benefit recipients?	216
2. Individual and work characteristics determining labour market status	222
2.1. What affects entry to disability benefits?	222
2.2. Which groups are more likely to stay in employment following health problems?	225
3. Pathways into and out of disability benefits	226
3.1. How does health affect transitions across different labour market states? ..	226
3.2. Exits from disability benefits	229
4. How have countries responded in the area of disability policy?	231
4.1. Disability policy indicators in OECD countries	231
4.2. The effect of policy changes on disability rolls	235
Conclusion	238
Notes	239
Bibliography	239
Annex 4.A1. Analysis of the Effects of Health on Labour Force Status	241
Annex 4.A2. Disability Policy Indicator	247
Annex 4.A3. The Effect of Disability Policy on Disability Rates	248
Statistical Annex	249
List of boxes	
Chapter 1	
1.1. Immigrants in the downturn	44
1.2. Broad reductions of employer social security contributions as a support to aggregate labour demand	73
1.3. Are layoffs inefficiently high in a severe recession?	90
1.4. Making hiring subsidies more effective	94
1.5. Second-chance schools and apprenticeship systems	99
Chapter 2	
2.1. Definitions and accounting identities	122
2.2. Comparing worker and job flows: Churning flows	125
2.3. Empirical evidence on the link between employment protection and job flows ..	130
2.4. Firm-level analysis of job flows	141
Chapter 3	
3.1. To what extent does the choice of a particular benchmark affect cross-country comparisons?	171
3.2. OECD tax and benefit models	189
3.3. Key features of in-work benefit schemes	194
3.4. Effectiveness of IWBs and earnings distribution at the bottom of the wage ladder	198

<i>Chapter 4</i>	
4.1.	High reciprocity countries have seen very different trends since 1990. 218
4.2.	Types of disability-related benefits 220
4.3.	Estimating the probability of labour market transitions. 223
4.4.	Policy indicators 232
4.5.	Accounting for changes in disability rates 236

List of figures

<i>Chapter 1</i>	
1.1.	Actual and projected change in unemployment in selected OECD countries . 27
1.2.	Comparing unemployment rate trajectories during previous downturns and the current downturn. 28
1.3.	The scale and labour market impact of fiscal stimulus varies across OECD countries 30
1.4.	Jobs impact of fiscal stimulus packages in selected OECD countries, 2007-10 32
1.5.	Simulated impact of macroeconomic conditions on hiring and separation rates 34
1.6.	Simulated impact of macroeconomic conditions on job vacancy rates 34
1.7.	Severe recessions generate sharp increases in unemployment which are long-lasting and often not reversed completely in recoveries 36
1.8.	Business-cycle sensitivity of total hours worked by industry 42
1.9.	Business-cycle sensitivity of total hours worked by workforce group 45
1.10.	Decomposition of the variance of total hours worked 50
1.11.	Cyclicality of unemployment inflow and outflow rates by country and demographic group. 52
1.12.	Passive and active labour market programmes in OECD countries, 2007 61
1.13.	Passive and active spending on labour market programmes in three groupings of OECD countries according to labour market performance, policies and institutions, 2007 62
1.14.	Evolution of passive and active spending on labour market programmes since 1985 63
1.15.	Responsiveness of passive and active spending to changes in unemployment in OECD countries, 1985-2006. 65
1.16.	Responsiveness of different categories of passive and active spending to changes in unemployment in OECD countries, 1985-2006. 66
1.17.	Discretionary changes in labour market policy in response to the economic downturn 68
1.18.	Discretionary spending on active labour market programmes 71
1.19.	Unemployment benefits are only one element of safety nets for job losers . . 78
1.20.	Net incomes of social assistance recipients in relation to alternative poverty lines, 2007 84
<i>Chapter 2</i>	
2.1.	Job and worker reallocation rates vary by industry. 124
2.2.	There are significant cross-country differences in job and worker reallocation rates across all industries 129
2.3.	Job creation and destruction are positively correlated, as are hirings and separations. 131

2.4. Job creation and destruction are two sides of the same coin, as are hirings and separations	133
2.5. Industry-level dismissal rates are greater than net employment contraction	134
2.6. Average dismissal rates vary by country	135
2.7. Job reallocation due to firm entry and exit varies by country	136
2.8. Job creation declines with firm age in medium and large continuing firms, but no such pattern is found for job destruction	139
2.9. The correlation between job creation and destruction rates across groups of firms is generally negative	143
2.10. Worker mobility is higher among women, young adults and low qualified workers	147
<i>Chapter 3</i>	
3.1. Alternative poverty measures in the United States for a family of four	170
3.2. Poverty in OECD countries	173
3.3. Poverty rates among the working-age population for various types of households, mid 2000s	176
3.4. Cross-country differences in poverty rates among households of working age	177
3.5. In-work poverty in OECD countries	180
3.6. In-work poverty risk varies strongly according to family composition	181
3.7. Average time spent at work over the year and corresponding rates of in-work poverty, 2006	182
3.8. Work participation at the extensive and intensive margins and in-work poverty rates, 2006	184
3.9. By how much do net social transfers reduce poverty?	186
3.10. How much do social transfers affect cross-country differences in poverty rates?	188
3.11. Total amounts of net social transfers granted to households with low-wage workers, 2006	190
3.12. Average effective tax rates for households with low earnings potentials, 2006	192
3.13. How much do low-paid workers get from in-work benefit schemes?	195
3.14. Overlap between in-work poverty and low-paid employment, 2006	200
3.A1.1. Underemployment at the extensive margin and in-work poverty rates, mid-2000s	206
3.A1.2. Sensitivity of in-work poverty rates to the work criteria retained to identify the working population, 2006	207
3.A1.3. By how much do social transfers reduce poverty?	208
3.A1.4. Net incomes of households with a low earnings potential, 2006	209
<i>Chapter 4</i>	
4.1. Trends in disability benefit reciprocity rates in OECD countries, 1990-2007	215
4.2. Change in disability benefit reciprocity rates by age groups in OECD countries, 1990-2007	216
4.3. Disability benefit inflows due to mental health problems have increased greatly and are most common at younger ages, 1990-2007	217
4.4. Demographic and work characteristics of disability benefit recipients	221
4.5. Previous spells of unemployment or inactivity increase the probability of disability benefit reciprocity	225
4.6. Yearly labour force transitions after health shocks	230

4.7.	Ranking of countries according to disability policy indicators, 2007	233
4.8.	Changes in disability policies	234

List of tables

Chapter 1

1.1.	OECD harmonised unemployment rates, 2006-09	25
1.2.	Workforce characteristics interact to influence the business-cycle sensitivity of total hours worked	46
1.3.	The cyclicity of unemployment inflows by reason	54
1.4.	Are average and cyclical unemployment flows related?	55
1.5.	Labour market policies influence unemployment dynamics	56
1.6.	Generosity of unemployment benefits	76

Chapter 2

2.1.	Both country and industry characteristics appear to influence job and worker reallocation rates	127
2.2.	Both country and industry characteristics influence the creation and destruction of jobs and job-matches	132
2.3.	Firm age and countries play the most important roles in shaping job-flow patterns among continuers	138
2.4.	The firm's efficiency levels and employment growth are positively correlated. . .	145
2.A1.1.	Adjusted share of temporary workers and employment protection indicators, 2000-05	163

Chapter 3

3.1.	Correlation coefficients between poverty rates and employment rates	178
3.2.	Correlation coefficients between employment rates and poverty rates among the working-age population, before and after social transfers	189
3.A1.1.	Low-income thresholds used in the analysis	210

Chapter 4

4.1.	Probability of receiving a disability benefit: health and demographics matter. . .	224
4.2.	Work characteristics and health matter for employment retention	227
4.3.	Labour force status of previous disability beneficiaries	231
4.4.	What explains changes in disability rates?	237
4.A1.1.	Probability of receiving a disability benefit (instrumented health measures) . .	244
4.A1.2.	Health influences exit to disability more than to other statuses	245

Statistical Annex

A.	Standardised unemployment rates in OECD countries	251
B.	Employment/population ratios, activity and unemployment rates	252
C.	Employment/population ratios, activity and unemployment rates by selected age groups	255
D.	Employment/population ratios, activity and unemployment rates by educational attainment, 2007	264
E.	Incidence and composition of part-time employment	267
F.	Average annual hours actually worked per person in employment	269
G.	Incidence of long-term unemployment	271
H.	Earnings dispersion, gender wage gap and incidence of low pay	274

I. Average annual wages in the total economy	275
J. Public expenditure and participant stocks in labour market programmes in OECD countries	276
