

**News Release**

**Annual inflation in the OECD area down to 1.8% year-on-year in August 2007**

Consumer price inflation in the **OECD area** fell to 1.8% in the year to August 2007 from 2.0% in the year to July 2007. On a monthly basis, the price level was down by 0.1% in August, after showing no change in July.

Consumer prices for energy decreased by 1.3 % year-on-year in August, compared with a rise by 0.8% in July. Consumer prices for food were up by 3.2% year-on-year in August, compared with 3.3% in July. Excluding food and energy, consumer prices rose by 2.0% in the year to August, unchanged compared with July 2007.

**Consumer prices, OECD-Total<sup>1</sup>**  
*Percentage change on the same month of the previous year*

In the **euro area**, the Harmonised Index of Consumer Prices (HICP) was up by 1.7% in the year to August, compared with 1.8% in the year to July 2007. Month-on-month, the HICP in the euro area rose by 0.1% between July and August after a decrease by 0.2% between June and July 2007. Excluding food and energy, the year-on-year rise in the HICP in the euro area amounted to 1.9% in August, unchanged compared with July.

In the **United States**, the Consumer Price Index (CPI) increased by 2.0% over the twelve months to August, compared with 2.4% in the year to July 2007.

In **Japan**, consumer prices were down by 0.2% in August over a year earlier, after no change in the year to July.

Over the twelve months to August, consumer prices rose by 1.9% in **Germany**, 1.8% in the **United Kingdom**, 1.7% in **Canada**, 1.6% in **Italy** and 1.2% in **France**.

<sup>1</sup> Percentage change Q2 2006 to Q2 2007

e: OECD estimates

<sup>2</sup> Memorandum item: the UK Retail Price Index (all items) rose by 4.1% in the year to August 2007.

Differences from standard definition (see last page):

All items less food less energy: for the United States excludes restaurant meals; for the HICP Euro area excludes alcoholic beverages and tobacco.

**Consumer prices, All items**

## Methodological Notes

Four variables are available for all OECD countries and can be aggregated into zone areas: namely CPI-All items; CPI-Food excluding restaurant meals (COICOP 01); CPI-Energy [Electricity, gas and other fuel (COICOP 04.5) plus Fuel and lubricants for personal transport equipment (COICOP 07.2.2)]; CPI-All items less Food less Energy (food and energy as defined above).

Results reflect national CPIs. In most instances, CPIs are compiled in accordance with international statistical guidelines and recommendations. However, national practices may differ in the coverage and treatment of certain items and in the use of index number formulas. In particular, country methodologies for the treatment of owner-occupied housing in the CPI vary significantly and carry large weights in the index. The European Harmonised Indices of Consumer Prices (HICP) exclude owner-occupied housing as do national CPIs for Belgium, France, Greece, Italy, Luxembourg, Poland, Portugal, Spain and the United Kingdom. HICPs are therefore shown for comparison under the all items column in the first table. For the United Kingdom the national CPI is the same as the HICP.

For the United Kingdom, the Retail Price Index is shown as a memorandum item (footnote 2). It differs in coverage and methodology from the national CPI/HICP. In particular, the RPI includes an estimate of costs of owner-occupied housing and is based on an index number formula that leads to average inflation rates that are approximately 0.5 percentage points per annum higher relative to the formula in the CPI/HICP. Further information is available on the ONS website at: <http://www.statistics.gov.uk/>.

CPI data for zones, based on national indices are annual chain-linked Laspeyres indices. The weights for each individual link are based on the previous year's households private final consumption expenditure using National Accounts data based on the 1993 System of National Accounts (SNA 93). The euro area CPI refers to the HICP published by Eurostat and covers the thirteen euro area countries for the entire period of the time series.

Provisional data are based on press releases by National Statistical Offices which are sometimes rounded to one-digit decimals. Final data transmitted to OECD is more complete and this may lead to differences.

The **OECD-Total** covers the 30 OECD Member countries: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States.

The **G7 area** covers Canada, France, Germany, Italy, Japan, United Kingdom and United States.

The **euro area** covers the following 13 countries: Austria, Belgium, Finland, France, Germany, Greece, Italy, Ireland, Luxembourg, the Netherlands, Portugal, Slovenia and Spain.

The **European Union** refers to the current composition of the European Union (27 countries) for the entire period of the time series.

Detailed information on consumer prices indices is available at [Comparative Methodological Analysis: Consumer and Producer Price Indices \(OECD, 2002\)](#).

More data on OECD member countries are available on the [Statistics Portal](#).
