

Table of Contents

Acronyms and Abbreviations	11
The Outlook in Brief	15
Chapter 1. Overview	17
The principal underlying assumptions	19
Main trends in commodity markets	21
Main developments in trade in agricultural commodities	27
The outlook for world prices	29
Some major issues and uncertainties	31
The policy issues	32
What are appropriate policy responses?	33
Notes	34
Chapter 2. Are High Prices here to Stay?	35
Introduction	36
Recent food commodity price hikes in an historical context	42
Crop and vegetable oil price changes: What happened and what happens next? ...	43
Uncertainties	52
How important are the Outlook assumptions in determining future prices?	53
The bottom line	57
Notes	58
Chapter 3. Macroeconomic and Policy Assumptions	59
The main underlying assumptions	60
Chapter 4. Biofuels	67
World market trends and prospects	68
Main market developments – ethanol	69
Main market developments – biodiesel	74
Key issues and uncertainties	78
Notes	81
Chapter 5. Cereals	83
World market trends and prospects	84
Main market developments: Wheat and coarse grains	86
Main market developments: Rice	91
Key issues and uncertainties	95
Chapter 6. Oilseeds and Oilseed Products	97
World market trends and prospects	98
Main market developments	99
Key issues and uncertainties	105

Chapter 7. Sugar	107
World market trends and prospects	108
Main market developments	109
Key issues and uncertainties	119
Notes	122
Chapter 8. Meat	123
World market trends and prospects	124
Main market developments	126
Key issues and uncertainties	134
Chapter 9. Dairy	137
World market trends and prospects	138
Main market developments	139
Key issues and uncertainties	146
References	148
Methodology	149
The generation of the OECD-FAO Agricultural Outlook	150
Sources and assumptions for the macroeconomic projections	151
The representation of production costs in Aglink-Cosimo	152
Methodology and limitations of partial stochastic analysis	154
Annex A. Statistical Tables	157
Annex B. Glossary of Terms	220
Boxes	
2.1. Measuring the impact of rising commodity prices on food prices	37
2.2. Prices in cash and derivative markets	41
2.3. How income growth affects commodity demand	50
4.1. The US Energy Independence and Security Act	79
7.1. EU sugar production downsize arrangements	113
8.1. Distillers Grains	125
Tables	
1.1. Some decline in population growth	19
2.1. Food price contribution to consumer price inflation (selected countries)	40
2.2. Supply of wheat and coarse grains	43
2.3. Demand for wheat and coarse grains	45
2.4. Supply of oilseed and vegetable oil	46
2.5. Demand for vegetable oil	47
2.6. World coarse grain, wheat and vegetable oil market indicator ratios	49
3.1. Slow down in population growth	62
A.1. Economic assumptions	158
A.2. World prices	160
A.3. World trade projections	162
A.4. Main policy assumptions for cereal markets	166
A.5. World cereal projections	169
A.6. Wheat projections	170

A.7. Coarse grain projections	172
A.8. Rice projections	174
A.9. Main policy assumptions for oilseed markets	176
A.10. World oilseed projections	178
A.11. Oilseed projections	179
A.12. Oilseed meal projections	181
A.13. Vegetable oil projections	183
A.14. Main policy assumptions for sugar markets	185
A.15. World sugar projections (in raw sugar equivalent)	187
A.16. World sugar projections (in raw sugar equivalent)	188
A.17. Main policy assumptions for meat markets	190
A.18. World meat projections	192
A.19. Beef and veal projections	194
A.20. Pig meat projections	196
A.21. Poultry meat projections	198
A.22. Sheep meat projections	200
A.23. Main policy assumptions for dairy markets	202
A.24. World dairy projections (butter and cheese)	204
A.25. World dairy projections (powders and casein)	205
A.26. Butter projections	206
A.27. Cheese projections	208
A.28. Skim milk powder projections	210
A.29. Whole milk powder projections	212
A.30. Milk projections	214
A.31. Whey powder and casein projections	215
A.32. Main policy assumptions for biofuels markets	216
A.33. Biofuels projections: ethanol	218
A.34. Biofuels projections: biodiesel	219

Figures

1.1. World commodity prices at higher average levels	18
1.2. Overall strong growth in world trade	27
1.3. Growth in world exports dominated by developing countries	28
1.4. Outlook for world crop prices to 2017	29
1.5. Outlook for world livestock product prices to 2017	29
2.1. Food commodity prices, 1971-2007 with projections to 2017	36
2.2. Food expenditure shares and per capita income	39
2.3. Deviations from trend of wheat and coarse grain yields	44
2.4. Stocks-to-use ratios of maize and wheat	49
2.5. Sensitivity of projected world prices to changes in five key assumptions, percentage difference from baseline values, 2017	54
2.6. Stochastic crop prices in 2008 and 2017 in nominal terms	56
3.1. Lower GDP growth in selected countries	61
3.2. Despite an increase in some countries, inflation expected to remain under control	63
3.3. US dollar strengthening against most other currencies	64
4.1. Production costs of major biofuel chains	68
4.2. World ethanol projections	69

4.3. EU ethanol market projections	70
4.4. Canadian ethanol market projections	71
4.5. US ethanol market projections	71
4.6. Brazil ethanol market projections	72
4.7. World biodiesel projections	74
4.8. EU biodiesel market projections	75
4.9. Canadian biodiesel market projections	75
4.10. US biodiesel market projections	76
4.11. Brazil biodiesel market projections	77
4.12. Indonesia biodiesel market projections	77
4.13. Malaysia biodiesel market projections	78
4.14. Potential impact of the US EISA on world commodity prices, 2013-17 average	80
5.1. Nominal wheat, coarse grain and rice prices to remain relatively strong, increase in real prices compared to the last decade	86
5.2. Growing cereal demand inside and outside the OECD	87
5.3. Variety share of coarse grains shifts towards maize	88
5.4. Stock levels stay low in historical perspective	89
5.5. Wheat trade increases moderately	90
5.6. Sharp increase in coarse grain exports	91
5.7. Per capita rice food consumption expected to decrease, total use increases . .	93
5.8. World rice stocks to be partly rebuilt prices to fall after peak	94
6.1. Vegetable oil prices and oilseed prices to remain strong over the projection period	98
6.2. Demand for vegetable oil is growing	99
6.3. Growing world oilseed production	102
6.4. Evolution of vegetable oil trade	104
7.1. World sugar prices to recover in near term	109
7.2. World sugar prices to trend down in real terms	110
7.3. Larger sugarcane production to account for most of the additional sugar output.	110
7.4. Changing regional patterns of sugar consumption to 2017	111
7.5. The global stock-to-use ratio to decline in the near term.	112
7.6. EU sugar reform leads to lower production and exports.	114
7.7. Sugar and ethanol production and exports to increase rapidly in Brazil	115
7.8. Global sugar exports are increasingly dominated by Brazil	116
7.9. Net sugar imports of Russia continue to decline	116
7.10. The EU and China emerge as the largest sugar importers	117
7.11. Preferential imports to increase in the EU	120
7.12. Share of developing countries in world sugarcane area devoted to ethanol . .	121
7.13. US rising sugar imports, CCC stocks and HFCS exports	122
8.1. World prices for meat to strengthen	126
8.2. Continued expansion in world meat production	127
8.3. Regional distribution of meat production increases between 2005-07 and 2017	128
8.4. Contribution of different meats to production increases between 2005-07 and 2017	128

8.5. Composition of per capita meat consumption in 2017 compared to 2005-07 ..	129
8.6. Shares of different meat types in growth of consumption.....	130
8.7. Egg consumption in selected regions.....	131
8.8. Development of world meat exports (excluding live animals).....	132
8.9. Major meat net importing countries	133
8.10. LDCs lose ground in trade for meat products	133
9.1. Prices to remain firm over the projection period.....	140
9.2. Prices in real terms 20% to 40% above historical averages.....	140
9.3. Milk production growth from 2005-07 to 2017	142
9.4. United States overtake New Zealand in SMP exports	143
9.5. Major dairy product exporters.....	143
9.6. Major dairy product importers	144
9.7. Outlook for global dairy product consumption	145
9.8. Sustained growth for butter and cheese consumption over 2008-2017	146
