

## Table of Contents

<b>Acronyms and Abbreviations</b> .....	11
<b>Outlook in Brief</b> .....	14
<b>Chapter 1. Overview</b> .....	17
Introduction .....	18
The setting – high and volatile prices dominate markets .....	18
Global agriculture in perspective .....	24
Production costs on the rise with higher energy and feed costs .....	26
Agricultural production to continue to grow, but at a slower rate .....	26
Global fish production driven by aquaculture .....	29
Food consumption growth is strongest in developing countries .....	29
Commodity stocks are critical to market volatility .....	35
Trade will grow more slowly with some new patterns emerging .....	36
Risks and uncertainties .....	39
Notes .....	45
References .....	45
Annex 1.A1. <b>Statistical tables: Overview</b> .....	47
<b>Chapter 2. Special feature: What is driving price volatility?</b> .....	51
Why price volatility is a problem .....	52
Key drivers of agricultural markets and price volatility .....	55
Contributions of the key drivers to price variability .....	65
The policy challenge .....	67
Conclusion .....	73
Notes .....	75
References .....	75
<b>Chapter 3. Biofuels</b> .....	77
Market situation .....	78
Projection highlights .....	78
Market trends and prospects .....	80
Main issues and uncertainties .....	86
Notes .....	90
Reference .....	90
Annex 3.A. <b>Statistical tables: Biofuels</b> .....	91
<b>Chapter 4. Cereals</b> .....	95
Market situation .....	96
Projection highlights .....	96

Market trends and prospects .....	98
Main issues and uncertainties .....	102
Notes .....	104
Reference .....	104
Annex 4.A. <b>Statistical tables: Cereals</b> .....	105
<b>Chapter 5. Oilseeds and oilseed products</b> .....	107
Market situation .....	108
Projection highlights .....	108
Market trends and prospects .....	110
Main issues and uncertainties .....	116
Annex 5.A. <b>Statistical tables: Oilseeds and oilseed products</b> .....	117
<b>Chapter 6. Sugar</b> .....	119
Market situation .....	120
Projection highlights .....	120
Market trends and prospects .....	122
Main issues and uncertainties .....	128
References .....	130
Annex 6.A. <b>Statistical tables: Sugar</b> .....	131
<b>Chapter 7. Meat</b> .....	133
Market situation .....	134
Projection highlights .....	134
Market trends and prospects .....	136
Main issues and uncertainties .....	141
Annex 7.A. <b>Statistical tables: Meat</b> .....	145
<b>Chapter 8. Fish</b> .....	147
Market situation .....	148
Projection highlights .....	148
Market trends and prospects .....	150
Main issues and uncertainties .....	154
Annex 8.A. <b>Statistical tables: Fish</b> .....	157
<b>Chapter 9. Dairy</b> .....	159
Market situation .....	160
Projection highlights .....	160
Market trends and prospects .....	162
Main issues and uncertainties .....	170
Reference .....	170
Annex 9.A. <b>Statistical tables: Dairy</b> .....	171
<b>Glossary of Terms</b> .....	175
<b>Methodology</b> .....	187

## Tables

“Online”: follow the Statlink for the tables available online

1.1. Population growth to decline in coming decade . . . . .	22
1.2. Profile of heavily damaged prefectures . . . . .	30
1.A.1. Economic assumptions . . . . .	48
1.A.2. World prices . . . . .	50
1.A.3. Exchange rate . . . . .	Online
1.A.4.1. World trade projections, imports . . . . .	Online
1.A.4.2. World trade projections, exports . . . . .	Online
2.1. Estimated contributions to world agricultural commodity price increases (%) from simulated appreciation relative to the US dollar . . . . .	59
2.2. Simulated volatility measures in 2019 for international crop prices . . . . .	66
3.A.1. Biofuel projections: Ethanol . . . . .	92
3.A.2. Biofuel projections: Biodiesel . . . . .	93
3.A.3. Main policy assumptions for biofuels markets . . . . .	Online
4.A.1. World cereal projections . . . . .	106
4.A.2. Wheat projections . . . . .	Online
4.A.3. Coarse grain projections . . . . .	Online
4.A.4.1. Rice projections: production and trade . . . . .	Online
4.A.4.2. Rice projections: consumption, per capita . . . . .	Online
4.A.5. Main policy assumptions for cereal markets . . . . .	Online
5.A.1. World oilseed projections . . . . .	118
5.A.2.1. Oilseed projections: production and trade . . . . .	Online
5.A.2.2. Oilseed projections: consumption, domestic crush . . . . .	Online
5.A.3.1. Oilseed meal projections: production and trade . . . . .	Online
5.A.3.2. Oilseed meal projections: consumption . . . . .	Online
5.A.4.1. Vegetable oil projections: production and trade . . . . .	Online
5.A.4.2. Vegetable oil projections: consumption, food vegetable use per capita . . . . .	Online
5.A.5. Main policy assumptions for oilseed markets . . . . .	Online
6.A.1. World sugar projections . . . . .	132
6.A.2.1. Sugar projections (in raw sugar equivalent): production and trade . . . . .	Online
6.A.2.2. Sugar projections (in raw sugar equivalent): consumption, per capita . . . . .	Online
6.A.3. Main policy assumptions for sugar markets . . . . .	Online
7.1. EU beef TRQs for 2006-2011 . . . . .	138
7.2. EU sheep and goat meat TRQs for 2004-2010 . . . . .	139
7.A.1. World meat projections . . . . .	146
7.A.2.1. Beef and veal projections: production and trade . . . . .	Online
7.A.2.2. Beef and veal projections: consumption, per capita . . . . .	Online
7.A.3.1. Pig meat projections: production and trade . . . . .	Online
7.A.3.2. Pig meat projections: consumption, per capita . . . . .	Online
7.A.4.1. Poultry meat projections: production and trade . . . . .	Online
7.A.4.2. Poultry meat projections: consumption, per capita . . . . .	Online
7.A.5.1. Sheep meat projections: production and trade . . . . .	Online
7.A.5.2. Sheep meat projections: consumption, per capita . . . . .	Online
7.A.6. Main policy assumptions for meat markets . . . . .	Online
8.A.1. World fish projections . . . . .	158

8.A.2. Fish projections. . . . .	Online
8.A.3. World fish trade projections. . . . .	Online
9.A.1. World dairy projections (butter and cheese) . . . . .	172
9.A.2. World dairy projections (powders and casein) . . . . .	173
9.A.3.1. Butter projections: production and trade . . . . .	Online
9.A.3.2. Butter projections: consumption, per capita. . . . .	Online
9.A.4.1. Cheese projections: production and trade . . . . .	Online
9.A.4.2. Cheese projections: consumption, per capita. . . . .	Online
9.A.5.1. Skim milk powder projections: production and trade . . . . .	Online
9.A.5.2. Skim milk powder projections: consumption, per capita . . . . .	Online
9.A.6.1. Whole milk powder projections: production and trade . . . . .	Online
9.A.6.2. Whole milk powder projections: consumption, per capita . . . . .	Online
9.A.7. Milk projections: Production, inventories, yield. . . . .	Online
9.A.8. Whey powder and casein projections . . . . .	Online
9.A.9. Main policy assumptions for dairy markets . . . . .	Online

## Figures

1.1. Commodity price variability has increased since 2006 . . . . .	19
1.2. Lower production leads to a drawdown in global stocks. . . . .	19
1.3. GDP growth resumes a quicker pace . . . . .	21
1.4. Crude oil prices projected to rise steadily to 2020 . . . . .	23
1.5. All agricultural commodity prices to average higher in 2011-20 relative to the previous decade . . . . .	24
1.6. In real terms, average 2011-20 cereal prices up to 20% higher; livestock prices up to 30% higher, relative to the previous decade . . . . .	25
1.7. Price trends in nominal terms of agricultural commodities to 2020 . . . . .	25
1.8. Maize price deflated by US cost of production index has not increased. . . . .	26
1.9. Net agricultural and fish production by region. . . . .	28
1.10. Rising fish production driven by aquaculture as capture fisheries stagnate . . . . .	29
1.11. <i>Per capita</i> food consumption stagnant in developed countries but rises elsewhere. . . . .	32
1.12. Value-added products show the strongest growth in <i>Per capita</i> consumption. . . . .	32
1.13. Food and feed use dominate cereal consumption . . . . .	34
1.14. Biodiesel share of vegetable oil use to continue to grow rapidly . . . . .	34
1.15. Ethanol from sugar cane to expand rapidly . . . . .	35
1.16. Wheat and coarse grains stocks to remain relatively low. . . . .	36
1.17. Eastern Europe and Central Asia to gain greater share of trade. . . . .	37
1.18. Imports of North Africa and Middle East countries to grow most rapidly . . . . .	37
1.19. Rice trade to show the largest growth over the Outlook period . . . . .	38
1.20. Coarse grain prices show more upside potential . . . . .	41
1.21. Variable oil prices affect agricultural input and product prices . . . . .	41
1.22. Yield changes have strong impact on product prices . . . . .	42
1.23. Income changes have modest impact on commodity consumption . . . . .	43
1.24. Food price inflation for selected OECD and developing countries: 2007-11 . . . . .	44
2.1. Annualised historical real price volatility (1957-2010). . . . .	53
2.2. Implied volatility of wheat, maize and soybeans (1990-2020) . . . . .	54
2.3. Expected demographic change: 1961-2008 . . . . .	60
2.4. <i>Per capita</i> arable land availability: 1963-2008 . . . . .	62

2.5. Simulated median price variability in 2019 . . . . .	66
3.1. Strong ethanol and biodiesel prices over the Outlook period . . . . .	79
3.2. Development of the world ethanol market . . . . .	79
3.3. Development of the world biodiesel market . . . . .	79
3.4. Projected development of the US ethanol market . . . . .	81
3.5. Projected development of the European biodiesel market . . . . .	82
3.6. Projected development of the Brazilian ethanol market . . . . .	84
3.7. Evolution of global ethanol production by feedstocks used . . . . .	84
3.8. Evolution of global biodiesel production by feedstocks used . . . . .	85
4.1. Cereal prices in nominal and real terms . . . . .	97
4.2. Cereal production, demand and closing stocks . . . . .	97
4.3. Wheat production and stock ratios . . . . .	98
4.4. Coarse grain production and stock ratios . . . . .	99
4.5. World rice production and stock ratios . . . . .	99
4.6. Wheat consumption in developed and developing countries . . . . .	100
4.7. Coarse grain consumption in developed and developing countries . . . . .	101
4.8. Share of world wheat exports by major exporters: 2001-10 and 2020 . . . . .	103
5.1. Oilseeds and oilseed products prices to remain above historical levels . . . . .	109
5.2. Developing countries to dominate the rise in vegetable oil consumption . . . . .	109
5.3. Oilseed production to be dominated by few market players . . . . .	110
5.4. Biodiesel production to account for 16% of total vegetable oil consumption . . . . .	112
5.5. Oilseed meal consumption to slow down compared to the previous decade . . . . .	113
5.6. Vegetable oil exports to remain concentrated . . . . .	113
5.7. <i>Per capita</i> food consumption and real price of vegetable oils . . . . .	115
6.1. World sugar balance moves into surplus . . . . .	121
6.2. World prices to decline but to remain on a higher plateau . . . . .	121
6.3. Global stocks-to-use to rise in near term and then decline . . . . .	122
6.4. India's production cycle to influence world prices . . . . .	123
6.5. Sugar exports remain highly concentrated and dominated by Brazil . . . . .	125
6.6. Sugar production and exports to grow in Brazil as ethanol output expands . . . . .	125
6.7. Sugar importers are more diversified . . . . .	126
6.8. China's imports to rise strongly . . . . .	127
6.9. Higher US consumption fed by rising Mexican imports . . . . .	127
7.1. World meat prices adapt to high feed costs and firmness of demand . . . . .	135
7.2. Meat production growth dominated by developing countries . . . . .	135
7.3. Increase in meat demand, by region between 2020 and the base period . . . . .	137
7.4. Evolution of world export of beef, pigmeat, poultry and sheep . . . . .	140
7.5. Total GHG emissions of beef, pork, poultry and sheep and goat meat produced in EU27 in 2004, calculated with a cradle-to-gate life-cycle analysis with CAPRI . . . . .	143
8.1. Declining growth rate of fish production . . . . .	149
8.2. Rising world prices, with those for farmed fish increasing more than wild fish . . . . .	149
8.3. World fish utilisation and consumption projections . . . . .	151
8.4. Increasing role of aquaculture in fish consumption . . . . .	152
8.5. General growth of fish consumption . . . . .	153
8.6. Trade of fish for human consumption by major exporters and importers in 2020 . . . . .	154
9.1. After a downward correction prices continue rising in nominal terms . . . . .	161
9.2. Prices in real terms are expected to stay relatively flat . . . . .	161

9.3. Substantial regional differences in production growth remain . . . . .	163
9.4. Large disparity in consumption levels and growth . . . . .	165
9.5. Oceania production levels – Monte Carlo draws . . . . .	166
9.6. Simulation results for world butter prices . . . . .	167
9.7. Results for world dairy prices in 2020 . . . . .	167
9.8. The declining trend in trade for butter and SMP is to reverse . . . . .	168
9.9. Rising importance of China imports on global milk powder markets. . . . .	168
9.10. Imports remain fragmented and import product mix continues to vary by country.	169
9.11. Russian Federation growth in butter imports limited but cheese imports continue rising. . . . .	169

### This book has...

**StatLinks** 

**A service that delivers Excel® files  
from the printed page!**

Look for the *StatLinks* at the bottom right-hand corner of the tables or graphs in this book. To download the matching Excel® spreadsheet, just type the link into your Internet browser, starting with the <http://dx.doi.org> prefix.

If you're reading the PDF e-book edition, and your PC is connected to the Internet, simply click on the link. You'll find *StatLinks* appearing in more OECD books.
