

## Productivity and income levels, 2008

Percentage point differences with respect to the United States

**Notes:** Labour productivity and income levels were calculated using GDP at current prices and converted in US dollars using current PPPs. Labour utilisation is measured as total hours worked per capita. Data for Australia, Canada, Greece, Ireland, Japan, Mexico, New-Zealand, Switzerland, Turkey, United States and Estonia, Slovenia are estimates. OECD-Europe includes EU member countries that are also members of the OECD. Euro-Zone includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain. France includes overseas departments.
