

Social and Welfare Statistics

Social and Welfare Statistics

Benefits and Wages

Purpose

Monitor reforms of tax and benefits systems and their impact on work incentives and income adequacy. Results are used as the basis of the OECD's "Benefits and Wages" publication and as inputs into a wide range of studies produced within and outside the OECD. In addition, the group develops and maintains tax-benefit models. These computer models allow a wide range of tax and benefit indicators to be produced. Finally, an online "tax-benefit calculator" has now been made available on the web-page www.oecd.org/els/social/workincentives and will be maintained and updated in the future.

Objectives and outputs

The Benefits and Wages series addresses the complicated interactions of tax and benefit systems for different family types and labour market situations. The series is a valuable tool used to compare the different benefits made available to those without work and those with different levels of in-work income. The resulting indicators (such as 'net replacement rates') are useful for addressing issues of both work incentives and adequacy of household incomes.

Recent extensions include calculation of incomes and work incentives net of childcare costs. Country coverage is currently being extended to include Turkey and, as part of a grant agreement with the European Commission, six of the new EU Members States who are not currently members of the OECD.

An interface for interactive web access to tax-benefit models has been developed ("tax-benefit calculator") and is available on the web-page www.oecd.org/els/social/workincentives. It will be maintained and updated in the future.

Non-member countries involved in the activity:

Cyprus, Estonia, Latvia, Lithuania, Malta, Slovenia

Databases

Benefits and Wages

Main Developments for 2008

General aspects:

Improved modelling of child-related policies, including transfers available to parents of very young children (e.g. maternity benefits). Improved modelling of the gender dimension of social policies (e.g. by collecting better earnings data for men and women).

Social and Welfare Statistics

Family Outcomes and Policies

Purpose

To include cross-national information on family outcomes and policies as categorised under 4 broad headings: the structure of families, families and children, the labour market position of families, public policies for families and children, and child outcomes.

Objectives and outputs

Following up on the OECD Babies and Bosses reviews on the reconciliation of work and family life in selected Member States, and in view of the strong demand for cross-national indicators on the situation of families and children, the OECD has developed an on-line database on family outcomes and family policies with indicators for all OECD countries. The database brings together information from different OECD databases (for example, the OECD Social Expenditure database, the OECD Benefits and Wages database, or the OECD Education database), and databases maintained by other international organisations.

Development of the database is an ongoing process. The first batch of indicators on policies and outcomes has been released.

Databases

OECD Family Database

Main Developments for 2008

General aspects:

The first batch of indicators was released by the end of 2006, new indicators from existing OECD databases have been released throughout 2007, these existing indicators will be updated on a regular basis.

In 2008, new indicators will be developed concerning child health, time use, different types of families, labour market position of families and out of school hours care.

Social and Welfare Statistics

Income Distribution and Poverty

Purpose

Analysis of main trends in the distribution of incomes, from 1980s to mid 2000s, based upon the OECD Income Distribution Questionnaire (every 5 years).

Objectives and outputs

Two papers were discussed at the Working party on Social Policy - "Report on the distribution of resources in OECD countries: Stylised facts" (DELSA/ELSA/WP1(2007)15, and "Child poverty in OECD countries: trends, causes and policy responses".

A report will be published in Spring 2007 covering various dimensions of "resource distribution". The chapters will be analytic, aiming to disseminate findings from the rich OECD database to policy analysts and researchers. A final chapter will discuss policy implications.

Databases

OECD Income Distribution questionnaire

Main Developments for 2008

General aspects:

In 2008 the results of the project will be disseminated.

Social and Welfare Statistics

Pension Monitoring

Purpose

In order to ensure that pension reforms are both financially and socially sustainable, it is essential to monitor the outcomes of changes in pension system parameters and rules. The activity uses a microeconomic approach which is particularly suitable for international comparison of pension policies. Prospective individual benefit entitlements from mandatory pension arrangements are modelled for full-career workers at different earnings levels. The framework uses the same economic assumptions for all countries and thereby abstracts from non-pension factors, which often distort international comparisons of pension systems.

Objectives and outputs

To monitor pension systems and pension policies in OECD countries, to collect, up-date and analyse information on pension system rules and parameters and to model prospective pension entitlements for standard retirement, early retirement and interrupted careers. The output of this activity is published in regularly updated reports.

The second edition of Pensions at a Glance was published in 2007. The report included up-dates of the models with 2004 parameters, and a comparison of pre- and post-reform pension systems in countries which have had major reforms since 1990.

Non-member countries involved in the activity:

Cyprus, Estonia, Latvia, Lithuania, Malta, Slovenia

Databases

Pension monitoring database

Main Developments for 2008

General aspects:

No major changes.

Social and Welfare Statistics

Social Expenditure

Purpose

The database has been developed to monitor trends in aggregate social expenditure as well as changes in its composition. SOCX includes historical series from 1980 on public and mandatory private social expenditure at programme level classified under the major social policy areas.

Objectives and outputs

Social Expenditure Database: data collection (in co-operation with Eurostat for EU countries) and dissemination on the internet www.oecd.org/els/social/expenditure of expenditure data, programme by programme, grouped in the main expenditure categories, from 1980 to 2003.

SOCX (2007) came out in February 2007, including net (after taxes) and voluntary social spending.

Databases

Social expenditures

Main Developments for 2008

General aspects:

SOCX (2008) will come out in the summer 2008, with data from 1980 to 2005, including net (after taxes) for 2005.

Data collection:

Data update every other year. 2004 and 2005 data will be collected in first semester of 2008.

Social and Welfare Statistics

Social Indicators

Purpose

Social indicators have been developed to provide the broad perspective needed for any international comparison and assessment of social trends, outcomes and policies. By linking social status and social response indicators across a broad range of policy areas, social indicators help to identify whether and how the broad thrust of social policies and societal actions are addressing key social policy issues.

Objectives and outputs

The fourth edition of "Society at a Glance", the OECD report of social indicators, was released early 2007. The report has established the key role of the OECD in the field of social reporting and statistics.

The discussion by delegates of the Working Party on Social Policies in November 2006 has confirmed the importance they attach to this activity, and identified concrete steps (e.g. the establishment of a steering group of country representatives) to make the report more relevant in the future.

Databases

Social indicators

Main Developments for 2008

General aspects:

The fifth edition of "Society at a Glance" is planned for December 2008.

This edition will update some of the indicators included in the first four editions, and will add new ones including measures of mental health. This report will also include a special chapter on patterns of time-use in OECD countries.

Data collection:

Data update every other year (data update in 2008).
