

The Future Digital Economy

**Digital Content Creation,
Distribution and Access**

30-31 January 2006, Rome - Italy

**New ways to access
knowledge and content:
*content digitisation by commercial
players and public institutions***

Mihály Jambrik

Hungarian State Secretary, Ministry of Informatics and Communications

Radical approach

- **Demanding regulation**
- **All organizations**
- **All public data**

Gradual approach

- **Limited scope of PSI**
- **Entering into force in three steps**

Institutions (cca 30 000)

Wide variety of institution types (size, function)

Different organizational capabilities (HR, infrastructural resources)

Involvement of all public institutions

Consistency and searchability of data

New financing model

Privacy vs publicity

Language issue
