

# OECD Database on Research into the Safety of Manufactured Nanomaterials

- Global resource which collects research projects that address **environmental, human health and safety (EHS)** issues of manufactured nanomaterials
- Tool to identify EHS research gaps and assist researchers in developing networks as well as in future collaborative efforts
- Access to research information to support projects of the OECD's Working Party on Manufactured Nanomaterials (WPMN)

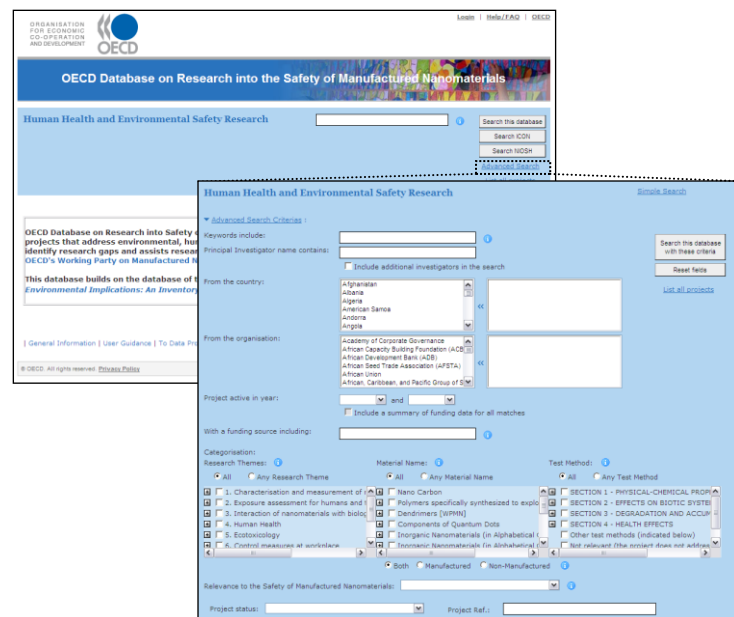

## • What information is included in the database?

- Project Title
- Project Status (current, planned, completed)
- Country or Organisation
- Project Summary and Related Web Links
- Research Area
- Type and Name of Material
- Test Methods Used
- Relevance to the Safety Aspect
- Funding Information
- Investigator Information
- Overall Outcomes and Outputs

## • How can I contribute to the database?

- If you wish to contribute to the database, please contact the OECD Secretariat ([nanosafety@oecd.org](mailto:nanosafety@oecd.org)).
- The Secretariat will contact your respective country or organisation representative to co-ordinate your participation.

The screenshot displays the search interface for the OECD Database on Research into the Safety of Manufactured Nanomaterials. The page title is "OECD Database on Research into the Safety of Manufactured Nanomaterials". The search criteria are as follows:

- Human Health and Environmental Safety Research: [Search the database]
- Advanced Search Criteria: [Search ICDs], [Search NCDs]
- Keywords include: [Search the database with these criteria]
- Principal Investigator name contains: [Include additional investigators in the search]
- From the country: [Algeria, Albania, Algeria, American Samoa, Andorra, Angola]
- From the organisation: [Academy of Corporate Governance, African Security Building Foundation (ASBF), African Development Bank (ADB), African Seed Trade Association (ASTA), African Union, African, Caribbean and Pacific Group of States]
- Project active in year: [Include a summary of funding data for all matches]
- With a funding source including: [Search the database with these criteria]
- Category: [Research Themes: All, Any Research Theme; Material Name: All, Any Material Name; Test Method: All, Any Test Method]
- Relevance to the Safety of Manufactured Nanomaterials: [Both, Manufactured, Non-Manufactured]
- Project status: [Project Ref.:
