

MONITORING emissions

- COUNTRY LEVEL ; INVENTORIES
incl.sectors outside the EU ET sheme

- EU ET SCHEME 2005..

2008... 2012

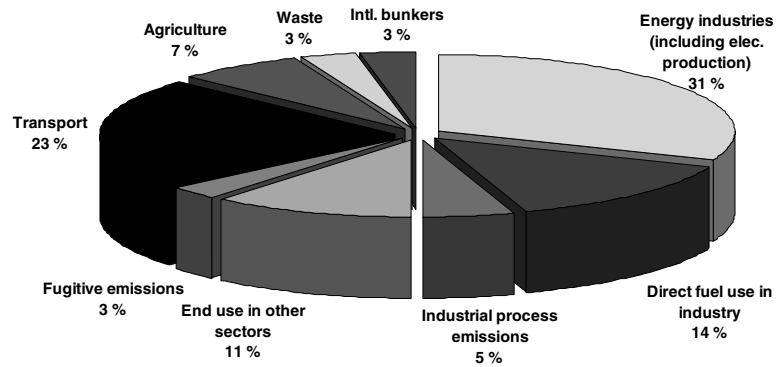

independent verification at site level, for
sectors included in EU ET ; but how?

Site level monitoring; verification

Starting 2005 !

- Needs competence requirements,
- training staff in advance,
- equal treatment of sites ie.
- written monitoring procedures
- there are no harmonised
measurement methods for CO₂

Shares of aggregated GHG emissions in 2000 by sector

Source: Adapted from UNFCCC 2002a/OECD

Registries, accounting

Costs of establishing and maintaining an ET registry?: exact functions not specified

Links from the site level registry accounting system to inventory input data? if any?

Consequencies of non compliance of monitoring requirements?

CPR and company trading / KP

EU: liberalised trading for sites

vs.

KP: eligibility criteria for countries

CPR and EU companies ?

KP international transaction log should notify transfers from a country in the case of an eventual failure of the country...2008 onwards..

Which transfers should be stopped and by whom? What are the legal consequences for companies if a transfer is stopped?
