

## Session 2

Eva JEDLICKOVA, CZSO

[eva.jedlickova@czso.cz](mailto:eva.jedlickova@czso.cz)

### The Czech experimental calculations in education

1. Present appearance of calculation of education output – input method
2. Experimental calculation of education volume measurement – based on unit costs
  - number of pupils/students (in the school year form - transfer to the calendar year)
  - public costs (in the calendar year)
  - quality adjustment:
    - non university education (class size)
    - university education – unit costs are calculated for each university, weighted sum as index for university education.
