

Table of contents

Executive summary	7
Assessment and recommendations	9
The economic recovery has been broadly balanced but risks to the outlook have increased	9
The strong appreciation of the Swiss franc is threatening the export sector	11
Some concerns are emerging that a housing market bubble may start building up ..	12
Monetary policy needs to remain expansionary	13
Fiscal policy should remain prudent	13
Incentives for households to leverage their wealth should be reduced	14
Changes in the tax structure could strengthen potential activity	15
Cross-border issues in taxation need to be addressed	16
Reform of regulation of the large, internationally active banks is essential to limit potential financial risks	17
Macroprudential considerations need to be incorporated effectively in prudential regulation	19
Some reform of the regulatory framework for the small banks active in domestic lending markets would help reduce potential risks further.	20
Meeting greenhouse gas emission reduction targets requires more cost-effective policies	20
The implicit carbon price in road transport is low	21
The policy mix in the residential sector can be made more cost effective	22
Linking the Swiss and the EU emission trading system will help, but steps are required in the transition to the new system	23
Annex A1. Progress in structural reforms	25
Chapter 1. Making the tax system less distortive	31
The main characteristics of the Swiss tax system	32
Making the tax system more supportive of growth	34
Reducing distortions in households' financial decisions	40
Alleviating some negative impacts of tax decentralisation and competition on efficiency and equity	43
Notes	47
Bibliography	48
Chapter 2. Reducing risks in the financial system	49
The largest Swiss financial institutions require adequate legislation to limit systemic financial risks	50
Regulation of smaller financial institutions	61
Towards a new macroprudential policy framework	65
Notes	70
Bibliography	70

Chapter 3. Reducing greenhouse gas emissions in a cost effective way	73
Greenhouse gas emissions reduction – meeting new challenges	74
More could be done at low cost in road transport	78
The policy mix in the residential sector could be made more cost effective.	82
Incentives to reduce emissions would have to be improved in industry and agriculture	86
Notes	93
Bibliography	94
Boxes	
1. Three key recommendations on improving the tax system	16
2. Three key recommendations on reducing risks in the financial system	20
3. Three key recommendations on reducing greenhouse gas emissions	24
1.1. Tax setting powers	33
1.2. Health insurance contributions and support for low income households	38
1.3. Recommendations to improve the tax system	46
2.1. Summary of main recommendations for strengthening financial regulation .	69
3.1. Current policies in the transport sector impacting climate policy goals	80
3.2. Swiss climate change mitigation policy in the residential sector	84
3.3. Swiss climate change mitigation policy in industry	87
3.4. Main policy recommendations for reducing greenhouse gas emissions in a cost effective way	92
Tables	
1. Short-term economic projections	12
2. Banks' total assets in percent of GDP	18
1.1. Structure of tax revenue	35
1.2. Property taxes	37
2.1. Financial system profile	50
2.2. Currency deposit (CD) ratings by bank category, 2011	62
2.3. Breakdown of funding ratios of Swiss pension funds (May 2010)	64
3.1. Model based estimations of CO ₂ prices under the 2020 scenario	77
3.2. Estimated external costs from transportation in 2005	79
Figures	
1. Real GDP growth and its main contributors	10
2. Macroeconomic indicators	11
3. Current account and main components	12
4. Household assets and liabilities in high-income OECD countries, 2009	14
5. Total per capita greenhouse gas emissions and percentage contributions to greenhouse gas emissions by sector	21
1.1. Swiss tax and compulsory contribution revenues in comparison to tax revenues in neighbouring countries	32
1.2. Expenditure by level of government	33
1.3. VAT revenue ratio	36
1.4. Total contribution wedge and total tax wedge on labour income by main family type and wage levels in international comparison	38
1.5. Measure of the income tax wedge for the second earner relative to the main earner	39
1.6. Corporate tax burden of Swiss cantons in international comparison	44
1.7. Income distribution and tax rates across cantons, 2007	45
2.1. Swiss big banks' total and risk-weighted assets	51

2.2.	Capital adequacy ratio of Swiss big banks (in %)	54
2.3.	The new capital regime for SIFIs	55
2.4.	Leverage and capital adequacy ratios of major international banks	58
2.5.	Geographical composition of assets of Swiss big banks	59
2.6.	Total domestic mortgage lending by type of bank	61
2.7.	Funding ratios of pension funds in Switzerland	63
2.8.	Policy framework	67
2.9.	Interest rates on mortgage loans, 1996-2011	68
2.10.	Real house price developments in Switzerland.	69
3.1.	GHG emissions in a selection of countries, 1990 and 2009	74
3.2.	Structure of GHG emissions, 2009	75
3.3.	GHG emissions from fuel combustion over time	76
3.4.	Excise duties on transport fuels across selected countries, 2010	81
3.5.	Role of residential per capita GHG emissions across countries, 1990-2009.	82
3.6.	Principal energy sources for residential heating.	83
3.7.	Energy intensity in the manufacturing sector.	86
3.8.	Developments in non-CO ₂ greenhouse gas emissions in Switzerland	90

This Survey is published on the responsibility of the Economic and Development Review Committee of the OECD, which is charged with the examination of the economic situation of member countries.

The economic situation and policies of Switzerland were reviewed by the Committee on 25 October 2011. The draft report was then revised in the light of the discussions and given final approval as the agreed report of the whole Committee on 18 November 2011.

The Secretariat's draft report was prepared for the Committee by Andrés Fuentes and Anita Wölfl under the supervision of Pierre Beynet. Statistical assistance was provided by Patrizio Sicari. The survey also benefited from external consultancy work done by Dirk Schoenmaker.

The previous Survey of Switzerland was issued in December 2009.
