

“World Statistics Day”

*George Marshall Room, [OECD Conference Centre](#), Paris, France,
20th October 2010*

12:00 – 12:05	Welcoming Remarks via pre recorded video: Martine Durand, Chief Statistician, STD
12:05 – 12:15	Chair: STD – David Brackfield Marcos Bonturi, Deputy Chief of Staff of the Secretary-General, OECD
12:15 – 12:25	DEV – Christopher Garroway <i>Measuring Progress in Developing Countries: Challenges and Opportunities</i>
12:25 – 12:35	ENV – Helen Mountford <i>Challenges of Measuring Progress towards Green Growth:</i> What is possible, what is needed and how can we avoid the pitfalls of overly ambitious systems?
12:35 – 12: 45	EDU – Eric Charbonnier <i>Ten Years of Education Statistics Development</i> Why educational statistics are becoming more and more utilised by policy makers in making reforms
12:45 – 12: 55	ELS – Simon Chapple <i>Adult height across the OECD</i> Adult height is an indicator of growth conditions during childhood. There are considerable differences in adult height of 10 cm or more between the tallest and shortest country. OECD countries where people are relatively short are getting taller faster.
12:55 – 13: 05	STI – Alessandra Colecchia <i>Experimental Indicators for Innovation Policy</i> The power of micro and administrative data to tell a story on the determinants and impacts of innovation
13:05 – 13: 10	PAC – Toby Green <i>Discovering and Citing Data</i> Maximising dissemination means thinking about discoverability and citability. The launch of OECD iLibrary makes OECD’s data outputs more discoverable and, uniquely, citable
13:10 – 13.15	Around the World in 15 minutes – pre recorded video feed
	<i>Refreshments</i>
Displays 13:15 - 14:30	ITN – OECD.Stat STD – Wikiprogress GOV – Regional eXplorer PAC – OECD iLibrary and Factblog STI – IT Outlook SPG – ITF, IEA
