Siwa Msangi is a senior research fellow within the Environment and Production Technology Division, and co-leads IFPRI's research theme on Outlooks and Global Change. His research focuses on the major socio-economic and bio-physical drivers affecting agricultural production and trade, and their impacts on nutrition, poverty and the environment.

Dr. Msangi has a research background in natural resource management, with a focus on surface and groundwater policy, and also has interests in quantitative dynamic economics, and empirical agricultural production analysis for environmental policy.

Dr. Msangi joined IFPRI in August 2004 as a post-doctoral fellow, after receiving his doctorate in Agricultural Economics from the University of California at Davis.
