

# **CBD work on monitoring and indicators**

**OECD workshop**

**Incentives to Capture Climate Change and Biodiversity Benefits  
from Reducing Deforestation  
Paris, 26 March 2008**

*Markus Lehmann  
Secretariat of the Convention on Biological Diversity  
Montreal, Canada*

## *The 2010 biodiversity target*

*“...to achieve by 2010 a significant reduction of the current rate of biodiversity loss at global, regional and national level...”*

- adopted by COP-6 and endorsed by WSSD in Johannesburg, in 2002

## *Framework for assessing progress towards the 2010 target*

<i>Focal Areas</i>	<i>Goals</i>	<i>21 Targets</i>

## *Framework for assessing progress towards the 2010 target*

- **Some 20 global headline indicators (flexibility in design and use of datasets)**
- **Global coverage (with homogenous methodology)**
- **Based on existing data**
- **Lead organizations for their development**
- **Encouragement of national target setting and monitoring on the basis of indicators**
- **Guidance on and support to national indicator development**

## *Framework for assessing progress towards the 2010 target (cont.)*

- COP-8 reviewed indicator status and identified further work (decision VIII/15, Annex V)
- Overview identifies, for each headline indicator:
  - Status
  - Potential measures (by biome)
  - Data and methodology availability
  - Possible data sources
  - Coordinating organizations

## *Applicability for REDD?*

- **Global trend indicators – not designed for fine-scale compliance monitoring, but:**
- **A number of measures are relevant to forest biodiversity**
- **data sources may offer more disaggregated data**
- **May provide useful starting points for further work**
- **May also provide information e.g. for prioritization (see also gap analysis called for under the CBD programme of work on protected areas)**
