

TELECOMMUNICATIONS DATABASE 2005

Content Documentation

Septembre 2005

◆ GENERAL DESCRIPTION

The *Telecommunications Database 2005* on CD-ROM is produced in association with the biennial publication *OECD Communications Outlook*. The Database provides time-series data covering thirty OECD Member countries. It contains both telecommunication and economic indicators.

The data are provided for the years 1980 to 2004, where available.

Further information about the OECD's work on telecommunications is available at: <http://www.oecd.org/sti/telecom>

◆ BEYOND 20/20

Beyond 20/20 is Windows-based software that allows the user to select the series, years, and countries desired to produce tables, graphics and maps. Users can easily move the series, country, and time period elements to the axis of their choice. *Beyond 20/20* allows users to save a table to the clipboard or to save tables as TXT, comma delimited text, WKS, Aremos, or DBF files.

For detailed instructions on how to use *Beyond 20/20*, a QuickStart Guide is provided. This product also has an on-line help feature.
