

TABLE OF CONTENTS

ASSESSMENT AND RECOMMENDATIONS	7
I. ECONOMIC DEVELOPMENTS, THE FISCAL STANCE AND PROSPECTS	15
Overview	15
Recent trends	16
Household consumption has remained relatively buoyant.....	16
Housing investment remains strong, while property prices rise briskly	16
The downturn in equipment spending was fairly moderate	20
Exports falter due to weakening markets and competitiveness	21
Job creation slows	22
The persisting weakness of productivity gains partly reflects increased employment flexibility	24
...but it could be problematic if this trend were to persist	25
The recent increase in unemployment is mainly cyclical	26
Nominal wage rigidity partly explains the persisting inflation differential with the euro area.....	26
Profit behaviour in certain sectors also keeps inflation high... ..	28
...while certain specific factors have prevented greater price moderation	29
Fiscal policy in the short run	30
Prudent fiscal policy has limited the expansionary effect of monetary conditions.....	30
Fiscal consolidation has been structural in recent years	31
As in 2002, the 2003 Budget is designed to balance the accounts.....	33
In the present context, the neutral stance of fiscal policy is appropriate	34
Prospects.....	35
II. MEDIUM AND LONG-TERM FISCAL POLICY CHALLENGES	38
Fiscal policy: being prudent, while ensuring flexibility	38
A prudent fiscal policy and further structural reforms are necessary in certain areas	38
The reform of autonomous communities' finances will increase the regions' responsibilities... ..	39
...as will the fiscal stability law... ..	40
...which needs to be implemented flexibly.....	41
Increasing public sector efficiency has to remain a priority	41
Another reform of the personal income tax in 2003	41
The rationalisation of the local tax system has also progressed.....	43
The tax to GDP ratio is well below the EU average	43
Following decentralisation, the authority should reassess their mode of action in several areas	44
The effectiveness of spending would benefit from a greater use of benchmarking.....	45
...and management based on output and from enhanced co-ordination between regions	45
Provision of health care and control over pharmaceutical spending should be more efficient.....	45
The consequences of ageing: pension reform is more urgent than generally perceived	48

III. STRUCTURAL REFORMS TO SUSTAIN A STRONG PERFORMANCE.....	50
Labour markets	52
The wage bargaining system is in need of a major reform	52
A recent reform has changed several aspects of unemployment benefits.....	55
... and is a step in the right direction... ..	57
... but needs to be better co-ordinated with active labour market policies.....	58
Interactions across different labour market policies could be exploited further	60
Education and R&D	61
Pre-primary schooling is well developed.....	62
Primary and secondary education has been reformed.	63
... but further increasing school autonomy would help to avoid failure and maintain equity	65
The reform of vocational training aims at building a bridge to life-long learning.....	65
The university system has a large potential for efficiency gains... ..	66
... which could be seized by raising university fees	66
Spending on research and development should be enhanced and better targeted.....	68
Housing market	70
Policy undermines the functioning of the housing market.....	70
Distortions should be removed	73
Competition policy	75
More resources have been provided for the competition authorities	75
Regional entry barriers to retail distribution should be scrapped	76
Reforms in telecommunications are following technological innovation.....	76
The energy sectors are dominated by a small number of firms	78
EU aid to modernise the fishing fleet will be phased out by 2005	79
Financial markets.....	80
A new reform of financial markets has been approved.....	80
Bank solvency remains high despite losses in Argentina	81
The benefits from deepening structural reforms.....	81
Sustainable development	83
Climate change.....	84
Waste management	87
Sustainable use of natural resources	93
IV. THE ECONOMIC IMPACT OF MIGRATION.....	97
Introduction	97
Migration stocks and flows	97
From emigration to immigration.....	97
The factors inducing migration are going to persist.....	101
Migration policy: still in the making	103
Past policies	104
In search for a new policy framework.....	105
Economic aspects of immigration	109
Labour market outcomes.....	109
Output, productivity, growth.....	113
Fiscal effects	114
Balance of payments: remittances and trade.....	117
Integrating immigrants	118
Conclusions and recommendations	120
Notes	123
Glossary of acronyms.....	137
Bibliography.....	139

Annexes

I. Supporting material	146
II. The decentralisation and financing reform of autonomous communities and local authorities	150
III. Main measures of the personal income tax reform.....	153
IV. Rental supply and demand incentives	154
V. The effect of employment shifts on labour productivity growth and the contribution of immigration of non-EU foreigners.....	156
VI. Calendar of main economic events.....	158

Boxes

1. Risks to the outlook.....	36
2. Private rates of return from non-compulsory education.....	67
3. Analysis of rental supply and demand incentives	74
4. The integration of environmental concerns into government policy.....	84
5. EU-wide immigration policies	103
6. The new quota system for work permits	107
7. Projections of public pension expenditure	116
8. EU agricultural market access for South Mediterranean countries	118

Tables

1. Demand and output	17
2. Financial position of the economic sectors.....	17
3. Financial performance of non-financial firms	21
4. Productivity and real wage growth by sector	25
5. Inflation differential between Spain and the euro area.....	30
6. The fiscal consolidation process.....	32
7. General government accounts	33
8. Short-term prospects.....	35
9. Stability Programme 2002-06.....	39
10. Expenditure by level of government	40
11. Local government revenue in OECD countries with federal structure.....	43
12. Tax revenues in OECD countries	44
13. Evolution of health expenditure	46
14. Recommendations for further structural reforms	53
15. International comparison of unemployment benefits	56
16. Public expenditure on labour market policies	59
17. Educational attainment by age.....	61
18. Participation in education at typical ages	62
19. Student performance at age 15	63
20. Private rates of return on education.....	68
21. Household assets	70
22. Tenure and availability of housing	72
23. Main indicators: climate change.....	85
24. Performance indicators: waste.....	89
25. Treatment systems for waste in Spain	90
26. Fees for extended producer responsibility schemes in Europe.....	90
27. Recovery and recycling rates and targets	91
28. Costs of composting in selected European countries	92
29. Main indicators for water withdrawal and land degradation	93
30. Immigration statistics in Spain	99
31. Regularisation processes	104
32. Annual quota for work permits in the 1990s	104

33. Work permits.....	106
34. Education level and type of employment: foreigners versus natives.....	110
35. Workers affiliated with the social security system.....	111
36. Unemployment rates of foreigners and natives.....	112
37. Fiscal impact of non-EU immigrants.....	115

Annexes

A1. Balance of payments.....	147
A2. Inflation decomposition: comparison between Spain and the euro area.....	148
A3. Greenhouse gas emissions and sectoral indicators.....	149
A4. Local governments' expenditure by function.....	152
A5. The effect of employment shifts on labour productivity growth and the contribution of immigration.....	157

Figures

1. Key indicators in international perspective.....	15
2. Output gap and economic activity indicators.....	18
3. Credit to households and asset prices.....	19
4. Household indebtedness.....	20
5. Competitiveness indicators and export performance.....	22
6. Contributions to GDP growth.....	23
7. Employment and unemployment: key features.....	24
8. Inflation decomposition for Spain and the euro area.....	27
9. Profit margins by sector.....	29
10. Consumer prices.....	30
11. The macroeconomic policy stance.....	31
12. Budget balances.....	32
13. Risks of a weaker European recovery.....	37
14. Decomposition of the business sector potential growth.....	51
15. Real GDP growth by sector.....	51
16. Public expenditure on active labour market policies and unemployment rates.....	60
17. Annual educational expenditure per student, 1999.....	64
18. Business R&D expenditure.....	69
19. Internet infrastructure.....	69
20. Housing market trends.....	71
21. Wealth developments linked to housing purchase/rental.....	75
22. Telecommunications prices.....	77
23. Medium-term effects of structural reforms.....	83
24. Greenhouse gas emissions.....	85
25. Application of efficient irrigation methods.....	95
26. Foreign population in selected OECD countries.....	98
27. Foreign population by nationality for the top 15 source countries.....	100
28. Length of stay of foreigners.....	101
29. Income differentials.....	101
30. Population projections for Spain and selected source countries.....	102
31. Population of selected source countries/regions, aged 15-44.....	102
32. Workers' remittances.....	117
33. Disadvantage in reading of 15 year-old children.....	120

Annexes

A1. Investment cycles.....	146
A2. Wealth developments linked to housing purchase/rental.....	155
