

## TABLE OF CONTENTS

ASSESSMENT AND RECOMMENDATIONS .....	8
I. RECENT DEVELOPMENTS: WILL THE CYCLICAL RECOVERY LEAD TO SUSTAINED GROWTH? .....	19
Recent trends and forces at work: a re-run of the 2000 recovery? .....	19
Exports have slowed after the rapid recovery in the first half .....	21
With low inventories, production has recovered.....	23
Monetary conditions have tightened somewhat due to the stronger yen .....	24
Profits have improved but the recovery is likely to be modest .....	25
Investment has been constrained by balance sheet adjustment.....	28
The labour market remains under pressure from restructuring .....	29
Deflation and the decline in real asset prices have continued.....	31
Prospects and risks .....	34
II. THE POLICY FRAMEWORK: ACHIEVEMENTS AND EVOLVING CHALLENGES.....	37
Overview .....	37
An overview of the government's reform programme .....	38
Fiscal policy and public sector reform.....	42
Fine tuning the fiscal stance in FY 2001: the supplementary budgets.....	42
The FY 2002 and 2003 budgets: are new priorities being achieved? .....	45
Sustainability issues and the medium term fiscal perspective .....	48
Short term stability in the bond market conceals evolving risks.....	49
The government's medium run fiscal perspective: is it ambitious enough? .....	54
Tax reform .....	59
Reform of special-status public corporations and the FILP .....	61
Fiscal reform in local governments .....	63
Dealing with financial sector weakness.....	64
Increased transparency of the non-performing loans .....	64
Strengthened resolve and the special inspection of loans .....	64
The amount of NPLs is still regarded as greater than disclosed.....	66
Dealing with bad debtors and bad loans .....	67
Options for the banks .....	67
The Resolution and Collection Corporation.....	68
Are the banks and insurance companies strong enough to cope? .....	68
Toward the capping of deposit insurance and further restructuring.....	71
Capping deposit insurance.....	71
... led to concern about the structure of the banking system.....	72
Assessment.....	73
Monetary policy: the experience with quantitative easing in a deflationary situation .....	74
The monetary base has expanded markedly.....	74
... but why have results been seemingly modest .....	77
Options for the future.....	80

III. IMPROVING THE SOURCES OF GROWTH AND HIGHER LIVING STANDARDS.....	82
The productivity and growth record .....	83
Productivity has been slowing for several decades with growth being factor intensive .....	83
The 1990s saw this slowing growth trend continue .....	86
The macro perspective of the Growth Project does not explain the Japanese slowdown .....	87
Leaving much to be explained by structural factors .....	88
Promoting a competitive environment.....	91
Competition policy.....	92
Increasing the openness of the economy.....	94
Trade policy: promoting regional trading arrangements .....	95
Incoming foreign direct investment: informal barriers .....	96
Outward FDI and trade: increased regional integration should drive future growth.....	97
Entrepreneurship: promoting entry and exit .....	97
Entry .....	99
The process of exit: bankruptcy and restructuring institutions.....	102
The developing framework and practice of corporate governance .....	104
Improving the quality of regulation .....	105
Improving the allocation and supply of labour.....	106
Easing the restrictive employment protection practices.....	107
Active labour market policy - recent progress and remaining problems .....	110
Better job matching .....	111
Grants for job creation.....	111
Public employment programmes .....	112
Despite unemployment, more should be done to stimulate labour supply.....	112
Improving the fundamentals: an overall assessment of structural policy .....	113
Competition in wide areas of the economy must be fostered .....	119
The regulatory system needs to be improved to ease barriers to entry and exit .....	119
Labour markets need to support mobility and increased labour supply.....	120
IV. HUMAN CAPITAL, TECHNOLOGY AND SECTORAL POLICIES FOR GROWTH .....	121
Promoting competition and thereby lower prices in the network sectors.....	121
Telecommunications .....	121
Promoting the effective diffusion and use of ICT .....	124
Electricity and gas.....	127
Postal services and reform of the post office .....	128
Transport infrastructure .....	129
Maintaining a high level of human capital .....	129
The traditional system of human capital formation has been successful up till now .....	129
...but pressures for change are rising.....	130
Policy needs to strengthen the post-compulsory education system .....	131
While improving individual training outside the firm .....	132
Enhancing productivity through strengthening technology and innovation.....	133
Private sector R&D activity .....	136
Improving the returns from universities and national research institutes .....	139
Fostering clusters and regional dynamism.....	140
Overall assessment of policy .....	142
NOTES.....	144
 ANNEX I. ASSESSMENT OF THE GOVERNMENT'S STRUCTURAL REFORM PROGRAMMES ..	157

**Boxes**

Postscript .....	18
Box 1. Forecasting deflation.....	32
Box 2. Improving the market for JGBs .....	53
Box 3. The scale and financing of special-status public corporations.....	61
Box 4. The case of two low productivity sectors: a lack of competitive pressure.....	90
Box 5. Innovation and growth.....	91
Box 6. Barriers to entry in the professions .....	102
Box 7. The spread of regulation and increased barriers to entry: the example of fitness clubs.....	106
Box 8. Labour market institutions and growth.....	107
Box 9. Which factors aid diffusion and effective use of ICT: lessons from the Growth Project .....	125
Box 10. A successful case of a local cluster: Kyoto.....	141

**Tables**

1.	The current account and external trade
2.	Recent labour market indicators
3.	Short-term outlook
4.	Summary of the government's reform schedule
5.	Fiscal packages since 1992
6.	FY 2001 supplementary budgets and the 30 trillion yen ceiling on issuance of public bonds
7.	Reallocation of funds in the FY 2002 budget
8.	Budgets of central and local governments
9.	General government deficit and debt
10.	Net lending by sector
11.	The government's economic and fiscal perspective from FY 2002 to FY 2006
12.	Different scenarios for fiscal balance of general government
13.	Non-performing loans declared by the financial system
14.	Stricter loan classification doubles the estimate of NPL
15.	Net profit of the Japanese commercial banking sector has plunged
16.	Banks have no incentive to expand their balance sheet
17.	Measures relating to money market operation in support of higher liquidity targets
18.	Productivity is low
19.	Accounting for growth
20.	A number of sectors have poor productivity growth
21.	Open sectors have high labour productivity
22.	The relative quality of the Japanese business environment
23.	The new three-year programme for regulatory reform: a summary
24.	Japan has relatively strict employment protection
25.	Expenditures on labour market policy are much lower than in Europe
26.	Grants for private sector employment remain underutilised
27.	Recommendations for structural reform and assessment of progress
28.	The reform of higher education
29.	International comparison of incubators

## Figures

1. Recent economic indicators point to recovery
2. Inventories are at a level where production rises
3. Business confidence has rebounded
4. Monetary conditions have eased
5. Profitability has been helped by better terms of trade
6. Firms still suffer from earlier wage increases
7. Excessive debt is a problem in non-manufacturing
8. Investment is still high
9. Household income remains weak
10. The output gap and deflation are only loosely related
11. The structural reform programme: Progress in implementation
12. The structural reform programme: Progress in fulfilling goals
13. Public debt continues to rise
14. Interest payments remain low
15. The public sector is a major holder of government bonds
16. The budget's tax base has steadily eroded
17. The monetary base and money supply have diverged
18. Banks reserves have surged
19. The new monetary policy has pushed down interest rates
20. Markets expect low rates to continue
21. Factors underlying growth
22. Labour productivity growth has declined
23. Growth has slowed more in Japan
24. Less stringent regulation is associated with improved productivity
25. The economy is remarkably closed
26. The level of start-up activity is low
27. Japan is behind in venture capital
28. Some communications prices remain high
29. The use of secure servers is lagging
30. The cost of leased telephone lines for business
31. Subsidies encourage participation in training
32. Japan has a high level of patent activity
33. Japan's relative importance in world patents has declined
34. Japan lags in linking science with patents
35. Tax treatment of R&D for large firms, 2001/2002
36. Firms don't finance much work in government laboratories and universities

Figure Box 2. Redemption of 10 year JGBs could peak in 2008
