

## Whitney International University System (WIUS)

**W**hitney International University System (WIUS) was founded to address the issues of access and quality in higher education around the world. WIUS offers a strategic combination of academic and business acumen that will bring proven results to those countries seeking to expand access to the highest-quality, lowest-cost relevant postsecondary education designed to support their economic growth. Whitney International University System is a network of universities that share a common vision and mission. By sharing resources, programs, delivery systems, and expertise, member institutions focus on delivering high-quality programs aligned with the economic needs of the respective countries at a cost that enables a country to address scalable training needs essential to their economic plan.

**WIUS is primarily concentrating its efforts on two educational initiatives.**

- Training existing or new teachers to implement scientific research-based instructional methods and strategies which are directly linked to improving student performance. Improving a country's overall student performance will increase its capacity to meet its economic goals and compete in the world economy. Having a literate population is essential to economic and social growth of the country.
- Providing mass access to the highest-quality, lowest-cost post secondary education in harmony with the economic needs of each country. Ensuring that more people are prepared for work that is aligned with the economic needs of the country will accelerate the growth of the individual and national economy.

**W**IUS is building international educational joint ventures and university acquisitions which range in enrollment from 5,000 to more than 50,000 students in North and South America, North Africa, and the Middle East, Europe and the Far East. These institutions – which already have prestigious accreditation and high quality courseware – have access to WIUS' relevant offerings, U.S. accredited degree programs, and its unique next-generation delivery system.

**What makes WIUS different from other higher education programs?**

- Research - Programs built on the most current content. Evidence-based instruction is designed around the most effective delivery methods to ensure strong student performance.
- Relevance - Programs are aligned with the economic needs of the country and sensitive to the local workplace needs.
- Effective - Programs produce graduates that are prepared for success in the workplace.
- Affordable - Low cost enables a country to put in place a scalable training solution to address the economic needs of the country.
- Accessible - The WIUS delivery system provides the capability to provide programs in any region of the country, making programs accessible to all targeted students.
- Results - Programs are closely aligned with career requirements and relevant content which emphasizes a practical application approach ensures competent graduates.
- Alliances - The WIUS international network of universities offers the best in program offerings and content resources worldwide.

Universities as historic institutions are more than a thousand years old. Throughout history, universities have been designed for a few, privileged individuals. Adapting the university for the demands of a global economy and for the needs of the many people who must have a quality education to succeed in life is not a mysterious process of happenstance. It is the result of thoughtful planning, of relevant and effective teaching, of applying proven technologies, and of challenging outdated ideas. That is the goal of Whitney International University System.
