

## Other Activities

### WikiProgress

#### Purpose

To create a centralized web community around the vision of measuring the progress of societies by creating a place where progress data and research articles can be loaded, visualised and analysed so good decisions about societies can be made at the local, national and international levels.

#### Objectives and outputs

1 - Wikiprogress : A database of articles submitted to the wiki by the community on measurements of progress.

- Over 10,000 unique visitors per month (from 4,800 in 2010)
- The number of registered users has doubled in the past 12 months to 862 registered users (from 480 in 2010)
- An average of 100 new articles are created each month
- There are currently 30,000 subscribers to the Wikiprogress eBrief

1a) New networks created: Wikiprogress Latin America Network, Child Well-being (wikichild)

1b) eBrief a monthly communication going out to networks on latest in progress news (community portal, latest publications, latest articles, latest data, etc)

1c) Arab Spring article series written

1d) Child Well-being indicator book published

1e) Gender equality and progress monthly series started

1f) A data visualisation strategy was developed

1g) 7 new content partners added to the community

1e) An interactive map of progress initiatives was developed and integrated into the site.

2- Wikigender : as inequality is a major dimension of the progress initiative, gender equality will be a main emphasis in wikiprogress work and thereby merits its own platform and specialized community which will feed wikiprogress.

Key figures:

At the end of 2011, Wikigender had over 1,370 articles maintained by more than 1,350 editors. In the course of 2011, Wikigender gained more than 350 new editors (over 70 more editors than in 2010)

An average of 22,000 unique visitors per month

An average of 50 new articles are created each month

## OECD Statistical Programme of Work

2a) Wikigender University - Wikigender University gathered a total of 20 students and over 140 articles from partner Universities American University in Paris and Sciences Po.

2b) Wikigender progress series - monthly articles on the link between gender equality and dimensions of well-being

2c) Wikigender monthly reminders - 12 were sent this year

2d) Outreach to other networks and partners -

2e) The Wikigender team published its first book in 2011 via PediaPress, Wikigender University 2010-2011, a selection of articles (2011). The book includes 15 of the best quality articles from the Wikigender University programme

3- Wiki.stat: a database of progress related data continually filled.

3a) Data visualisation tools utilised

3b) Data upload application developed

4-The PROG BLOG: a regular communication on progress which will inform the progress interested community on the latest in research, data, initiatives and development on the wiki. 4a)With over 114 blogs posted in 2011 and a significant online following, the blog is a successful driver of traffic to Wikiprogress

- Research

5a)The paper "Trust and Communicating Statistics" was completed in 2011 in cooperation with the European Central Bank.

5b) Research and reflection on data visualisation resulted in a paper completed at the end of 2012

Wikichild:

A research network on child well-being indicators was integrated in cooperation with ELS.

## **Non-member countries involved in the activity:**

World

## **Main Developments for 2012**
