

INDEX OF TABLES

Main available indicators

SECTION I

Scientific and technological base, scientific transfer capacity and industrial absorptive capacity

HUMAN RESOURCES

R&D personnel

- TABLE I.1 R&D personnel for 1000 units of labour in some OECD countries, 1981, 1992 (OCDE)
- TABLE I.2 Percentage of total R&D personnel for 1000 units of labour in some OECD countries (OCDE)
- TABLE I.3 Total R&D personnel by function and institution, ITALY, 1992 (ISTAT)
- TABLE I.4 Total R&D personnel by function and institution, ITALY, 1992 (ISTAT)
- TABLE I.5 Scientific and technical personnel by qualification and institution, ITALY, 1992 (ISTAT)

Researchers

- TABLE I.6 Total researchers in some OECD countries: size and rates of change, 1971, 1981, 1992 (OECD)
- TABLE I.7 Percentage of total researchers by institution in some OECD countries, 1981, 1992 (OECD)

Skill level of workforce

- TABLE I.8 Total employees by education in Europe, 1992 (EUROSTAT)
- TABLE I.9 Total employees by sector and type of diploma, ITALY, 1992 (ISTAT)
- TABLE I.10 Total employees by and position on the job and type of diploma, ITALY, 1992 (ISTAT)
- TABLE I.11 Full time research personnel in some public institution in ITALY -1992 (ISTAT)
- TABLE I.12 Total employees by education (ISTAT)

FIGURE I.1 Managers and employees with university degree by institution, ITALY, 1992 (ISTAT)

FIGURE I.2 Number of scientific and technological personnel on total university degree personnel, 1989.(OECD)

S/T RESEARCH

Total R&D expenditure

TABLE I.13 Size of R&D expenditure (OECD)

TABLE I.14 R&D intensity for the national economy: R&D expenditure as a % of GDP (OECD)

Industry

TABLE I.15 Industry financed and performed R&D as a percentage of domestic product of industry:average of annual shares (%), 1992 (OECD)

TABLE I.16 R&D expenditure by performing institution (OECD)

TABLE I.17 R&D budget appropriation of public scientific institutions, ITALY, 1992 (ISRDS)

TABLE I.18 R&D expenditure by performing institution, ITALY, 1992 (ISTAT)

TABLE I.19 Business enterprises R&D expenditure by industrial sector (OECD)

TABLE I.20 Share in R&D high-tech sectors on total BERD in France, Germany, ITALY, United Kingdom, Japan, United States (CESPRI-ENEA)

TABLE I.21 R&D expenditure by dimension of firms, ITALY (OECD)

University

TABLE I.22 R&D expenditure of firms by proprietary structure, ITALY (CSC)

TABLE I.23 Higher education R&D in some OECD countries (ISRDS-OECD)

TABLE I.24 Business firms with R&D activity and with innovative activity by dimension, ITALY,1990-1992 (ISTAT)

TABLE I.25 Business firms with R&D activity and with innovative activity by sector, ITALY,1990-1992 (ISTAT)

Scientific knowledge output available in a suitable way

Publications

TABLE I.26	Size and impact of scientific activities in some OECD countries (ISRDS-CHI Research)
TABLE I.27	Scientific papers in major scientific and technical journals, 1990 (Sci Search)
TABLE I.28	The degree of scientific specialization by papers and citations (ISRDS-CHI Research)
TABLE I.29	Revealed Scientific advantages by discipline, 1990 (ISI data base)

Patents

TABLE I.30	Patent applications by Universities and Research Organizations in some European countries, 1978-1990 (EPO-CESPRI)
TABLE I.31	Major Institution Patenting in four European Countries 1978-1991 (EPO-CESPRI)
TABLE I.32	Specialization of Patent Applications by Universities and Research Organization by Technological classes in some European Countries, 1992 (EPO-CESPRI)
TABLE I.33	Importance of scientific knowledge for industry by disciplines and sectors, ITALY, 1993 (CSC)

Technological activities output available in a suitable way

Patents

TABLE I.34	External patent applications by inventor's country of residence in some OECD countries, 1970, 1980, 1990, (OECD)
TABLE I.35	Distribution of technological activities in main industrialized countries, 1982-86, 1987-91, (OECD-EPO)
TABLE I.36	Ratio of patents per billion GDP: average of citations by patent, 1971, 1980, 1990, (OECD-EPO)
TABLE I.37	Rate of revealed technological advantage by patents and citations, 1987-91, ITALY (EPO)
TABLE I.38	Rate of revealed technological advantage by patents and citations: rank of the top five fields of specialization, ITALY (OECD)

Manufacturing production and demand structure

TABLE I.39	National production and demand structure, distribution by sectors, ITALY, 1992 (ISTAT)
FIGURE I.1	Number of scientist and engineers (% of total graduated, 1989, (OCSE)

SECTION II

General intra-institutional and inter-institutional flows

Financial flows

TABLE II.1 R&D intra-muros expenditure by performing and financing institutions, ITALY, 1991 (ISTAT)

TABLE II.2 Total higher education R&D founded by business enterprises in some OECD countries, 1975, 1980, 1992 (OECD)

R&D subcontracting

TABLE II.3 R&D extra-muros subcontracting expenditure by size of firms: some ratios, ITALY, 1991 (ISTAT)

TABLE II.4 R&D extramuros subcontracting expenditure by industrial sector, ITALY, 1991 (ISTAT)

R&D collaborations

TABLE II.5 R&D intra-muros expenditures for collaborations by institutional partner, ITALY, 1991 (ISTAT)

Information sources

TABLE II.6 Intensity of use of different sources of knowledge finalized to innovative activities by firms, ITALY, 1990-1992 (ISTAT)

TABLE II.7 Intensity of use of different sources of knowledge by size, by industrial sector, by Pavitt classification: percentage of innovating firms ITALY, 1990-1992 (ISTAT)

TABLE II.7.1 Intensity of use of different sources of knowledge by size, by industrial sector, by Pavitt classification: average score, ITALY, 1990-1992 (ISTAT)

TABLE II.8 Innovation expenditure distribution by costs and firm size, ITALY, 1990-1992 (ISTAT)

Modes of acquisition and transfer

TABLE II.9 Intensity of technological exchanges of innovating firms, ITALY, 1990-1992 (ISTAT)

TABLE II.10 Technology acquisition and transfer by firm size, ITALY, 1990-1992 (ISTAT)

- TABLE II.11 Technology acquisition and transfer by industrial sector (Pavitt classification) size, ITALY, 1990-1992 (ISTAT)
- TABLE II.12 Modes of technology acquisition and transfer of innovating firms , ITALY, 1990-1992 (ISTAT)
- TABLE II.13 Modes of technology acquisition and transfer of innovating firms by geographical area of origin, ITALY, 1990-1992 (ISTAT)
- TABLE II.13.1 Modes of technology acquisition and transfer of innovating firms by geographical area of destination, ITALY, 1990-1992 (ISTAT)
- TABLE II.14 Modes of technology acquisition by industrial sector (Pavitt classification), ITALY, 1990-1992 (ISTAT)
- FIGURE II.1 Modes of technology acquisition of innovating firms, ITALY, 1990-1992 (ISTAT)
- FIGURE II.2 Technology acquisition and transfer by industrial sector (Pavitt classification) ITALY, 1990-1992 (ISTAT)
- FIGURE II.3 Modes of technology transfer of innovating firms, ITALY, 1990-1992 (ISTAT)

SECTION III

The inter-industrial distribution of knowledge

Disembodied flows

R/D matrix

- TABLE III.1 R&D flows by industrial sector, ITALY, 1991 (ISTAT)
- TABLE III.2 R&D diffusion and spill-over indexes by industrial sector, ITALY, 1991 (ISTAT)
- TABLE III.3 Importance of patents acquisition as an innovative source, ITALY, 1993 (CSC)
- TABLE III.4 R&D subcontracting activities by industrial sector and subcontractor, ITALY, 1991 (ISTAT)
- TABLE III.5 R&D collaborations by industrial sector and partner, ITALY, 1991 (ISTAT)

Embodied flows

Innovation matrix

TABLE III.6.1 Innovation linkages between suppliers and users: inter-industry and total matrices, ITALY, 1981-85 (De Bresson C., Sirilli G.)

TABLE III.6.2 Innovation linkages between suppliers and users: inter-industry and total matrices, ITALY, 1990-1992, (ISTAT)

TABLE III.7.1 Innovation linkages: diffusion and spillover indexes, ITALY, 1981-85

TABLE III.7.2 Innovation linkages: diffusion and spillover indexes, ITALY, 1990-1992

TABLE III.8.1 First most innovative supplying industries: innovation frequency (total and percentage), number of different user industries, lead users, ITALY, 1981-85

TABLE III.8.2 First most innovative supplying industries: innovation frequency (total and percentage), number of different user industries, lead users, ITALY, 1990-1992

TABLE III.9.1 First most innovative user industries: innovation frequency (total and percentage), number of different supplier industries, main supplier, ITALY, 1981-85

TABLE III.9.2 First most innovative user industries: innovation frequency (total and percentage), number of different supplier industries, main supplier, ITALY, 1990-1992

TABLE III.10 Density indexes for different matrices, ITALY, 1981-85 (De Bresson C., Sirilli G.)

TABLE III.10.1 Concentration indexes for innovation and total requirement matrices, ITALY, 1981-85 (De Bresson C., Sirilli G.)

R/D embodied in capital flows

TABLE III.11 Input-output inter-industry matrix: estimated indirect technology embodied in gross output and technology multiplier, 1972-77-82-85-90 (OECD)

TABLE III.12 Direct and total technology intensities for high, medium, low manufacturing industries (OECD)

TABLE III.13 Rates and level of diffusion of some new capital good and service: diffusion of telematic equipments, ITALY, 1991 (SIP) TABLE

III.14 Rates and level of diffusion of some new capital good and service: diffusion of telecommunications equipments, ITALY, 1991 (SIP)

TABLE III.15 Rates and level of diffusion of some new capital good and service: expenditure on information technology services and software, ITALY, 1991 (NOMOS)

TABLE III.16 Sources of financing of industrial R&D expenditure by sector, ITALY, 1991 (ISTAT)

SECTION IV

The triangular distribution

Financing

TABLE IV.1 Public R&D intramuros expenditure by modes of financing and performing institution, 1991 (ISTAT)

TABLE IV.2 University R&D expenditure by source of funds in some OECD countries, 1991 (OECD)

R/D contracts and collaborations

TABLE IV.3 Business firm's relations (contracts and collaborations) with university and internal R&D intensity by sector, 1990 (CSC)

TABLE IV.4 Various cooperative Programs with public R&D institutions: the importance for business firms by sector, 1991 (CSC)

TABLE IV.5 Business firm participation to public R&D programs by type and sector, 1991 (ISTAT)

Copatenting

TABLE IV.6 Public copatenting activities: main technological classes in some OECD countries, 1978-1991 (EPO-CESPRI)

TABLE IV.7 Major institutions copatenting in four European countries, 1978-1991 (EPO-CESPRI)

TABLE IV.8 Partners in copatenting activities in four European countries, 1978-1991 (EPO-CESPRI)

Scientific outputs

TABLE IV.9 Importance of various research outputs of public research institutes and University to the innovative activities, by type and country (PACE)

Transfer carriers

TABLE IV.10 Importance of various transfer activities from public institutions to business firm's innovative activity, 1991 (CSC)

TABLE IV 11 Importance of various sources or methods of learning about research conducted in public institutes to the business firm's innovative activities (PACE)

Typology of industries related to University

TABLE IV 12 The typology of firms collaborating with university, by sector and intensity of various linkages in innovative activities

FIGURE IV.1 Source of funds of the Universities expenditure, ITALY, 1990 (ISTAT)

SECTION V

Intra-firm linkages

- TABLE V 1 Intra-firm organization links among R&D and other functions, 1991 (CSC)
- TABLE V. 2 Importance of internal channel of knowledge as a source of innovative activities, 1991 (CSC)

SECTION VI

Performances

Technical performance

- TABLE VI.1 Innovating firms: sales distribution by type of innovation (percentages)- (ISTAT)
- TABLE VI.2 Innovating firms: sales distribution by the novelty of products - (ISTAT)
- TABLE VI.3 Innovating firms: sales distribution by degree of novelty products (percentages) - (ISTAT)
- TABLE VI.4 Product innovation by incremental content of innovation: percentages of new products on sales, 1992 (ISTAT)

Economic performance

- TABLE VI.5 Export specialization by type of industry in some OECD countries, 1980-1992 (OECD)
- TABLE VI.6 Export/import ratios by type of industry in some OECD countries, 1980-1992 (OECD)
- TABLE VI.7 Rate of revealed comparative advantage by sector (%): Pavitt classification, 1981-84; 1985-87; 1988-91. (OECD)

SECTION VII

The S/T policies

- TABLE VII.1 Innovating firms with relevant or very relevant score to S/T policy measures for the innovation introduced in 1990-1992 (percentage on total innovating firms) (ISTAT)
- TABLE VII.2 Innovating firms with relevant or very relevant score to S/T policy measures for the innovation introduced in 1990-1992 by

firm size (percentage on total innovating firms) (ISTAT)

TABLE VII.3 Innovating firms with very relevant score to S/T policy measures for the innovation introduced in 1990-1992 by firm size (percentage on total innovating firms) (ISTAT)

TABLE VII.4 National research programs available funds: distribution by industrial main contractor and university or other subcontractor, 1992 (MURST)

TABLE VII.5 Finalized projects: distribution of annual funds by institutions, cumulated funds 1985-1993, (CNR)

FIGURE VII.1 Innovating firms with very relevant score to S/T policy measures , ITALY, 1990-1992(ISTAT)
