

Procurement Information Systems Used in the United States

– Pre-award

- Solicitations are available for competition online.
- Contractor information and self-representations of compliance are collected online; including electronic fund transfer (EFT) information.
 - Reduces payment errors
 - Improves accuracy of contractor data
- Transactional data, including contract award information and vendor socio-economic status, are online.
 - Provides 'how much' and 'with whom' statistics

– Post-award

- Contractor performance evaluations with government ratings all online.
 - Ensures the government awards to only vendors with a history of successful performance
 - Rewards contractors who correct problems
- Debarment information.
 - Ensures the government awards to vendors who are in good standing and comply with laws and regulations
