DRAFT AGENDA

The first workshop on “Measuring Education and Health Volume Output” was held in London on the 3rd-5th of October 2006. The London workshop was jointly organised by OECD, Office of National Statistics and the Government of Norway. This second workshop develops some of the issues presented in the first workshop through the preparation of a first draft of the chapters for the OECD Handbook “Measuring Education and Health Volume Output”. The Handbook will be finalised by the end of 2008. The objective of the workshop is to discuss the chapters, to enable improvements and modifications for the definitive version of the Handbook.
