

E-Gov started with a Task Force

- ◆ The Quick Silver Task Force August - September 2001
- ◆ The Task Force members did 75 interviews
- ◆ Received 300+ ideas, projects, gaps in performance
- ◆ Narrowed it down to business lines that most agencies “do”
- ◆ **The following criteria was used to rate the projects/ideas:**
 - **Is it largely doable in 18 -24 months**
 - **Are there measurable milestones in 6 -12 months**
 - **Is there a large and repetitive impact**
 - **Does it cross agencies**

The GOAL was to affect the incoming budget cycle:

- ◆ Funding for these projects will come from redirection of the FY 02 funds and in the FY 03 budget.

Guiding Principles - Require Teamwork

1. Data is entered by the data owner at the lowest level/first step of the process
2. Data is owned by the person who generates it
3. Data should only be entered once
4. If an application is already in use by someone else, explore how to use it and if possible, do not build a new one
5. Integration of data to share
6. Integration of applications and exchanges

The 16 “Lanes” of Contracting

Micro-purchases and other credit card buys, to include payments

Simplified Acquisition Procedures up to 5M for commodities

Large Dollar Value, Negotiated FAR type contracts for research & development, services, base operations, construction, and major weapons or other systems

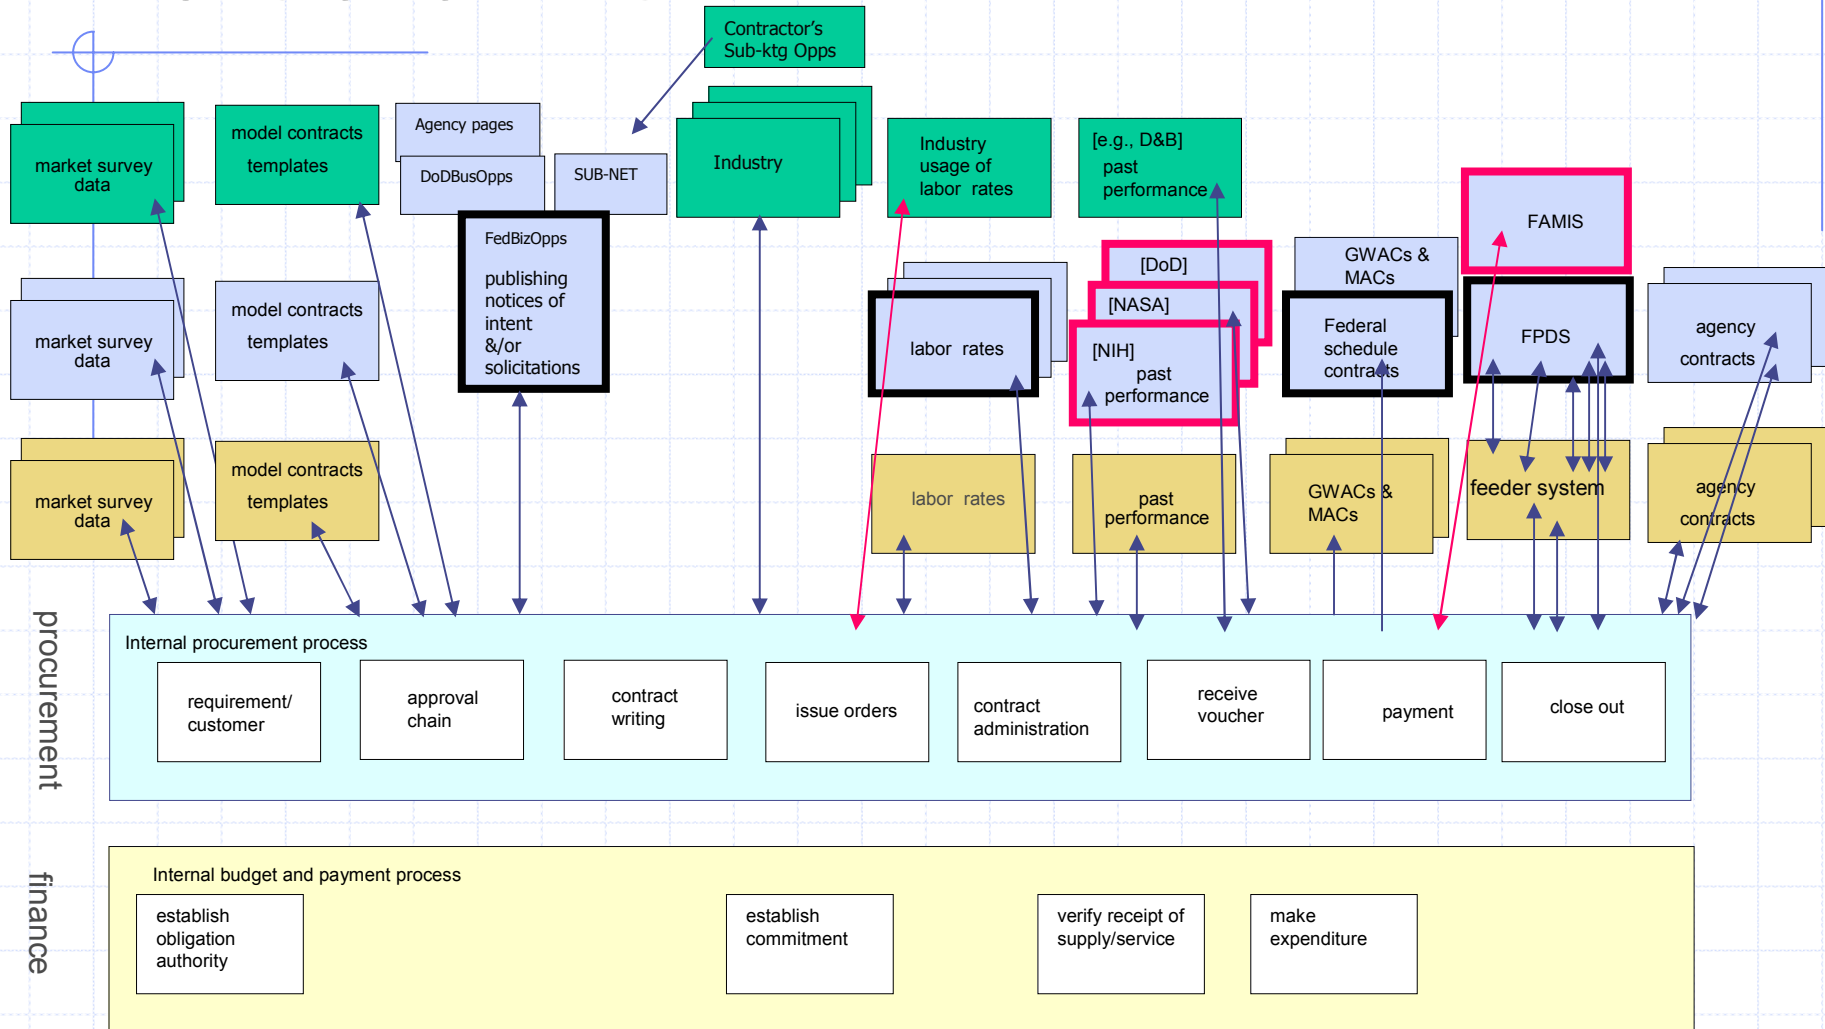

Yes, they do differ.

What might be fixed for e-Procurements

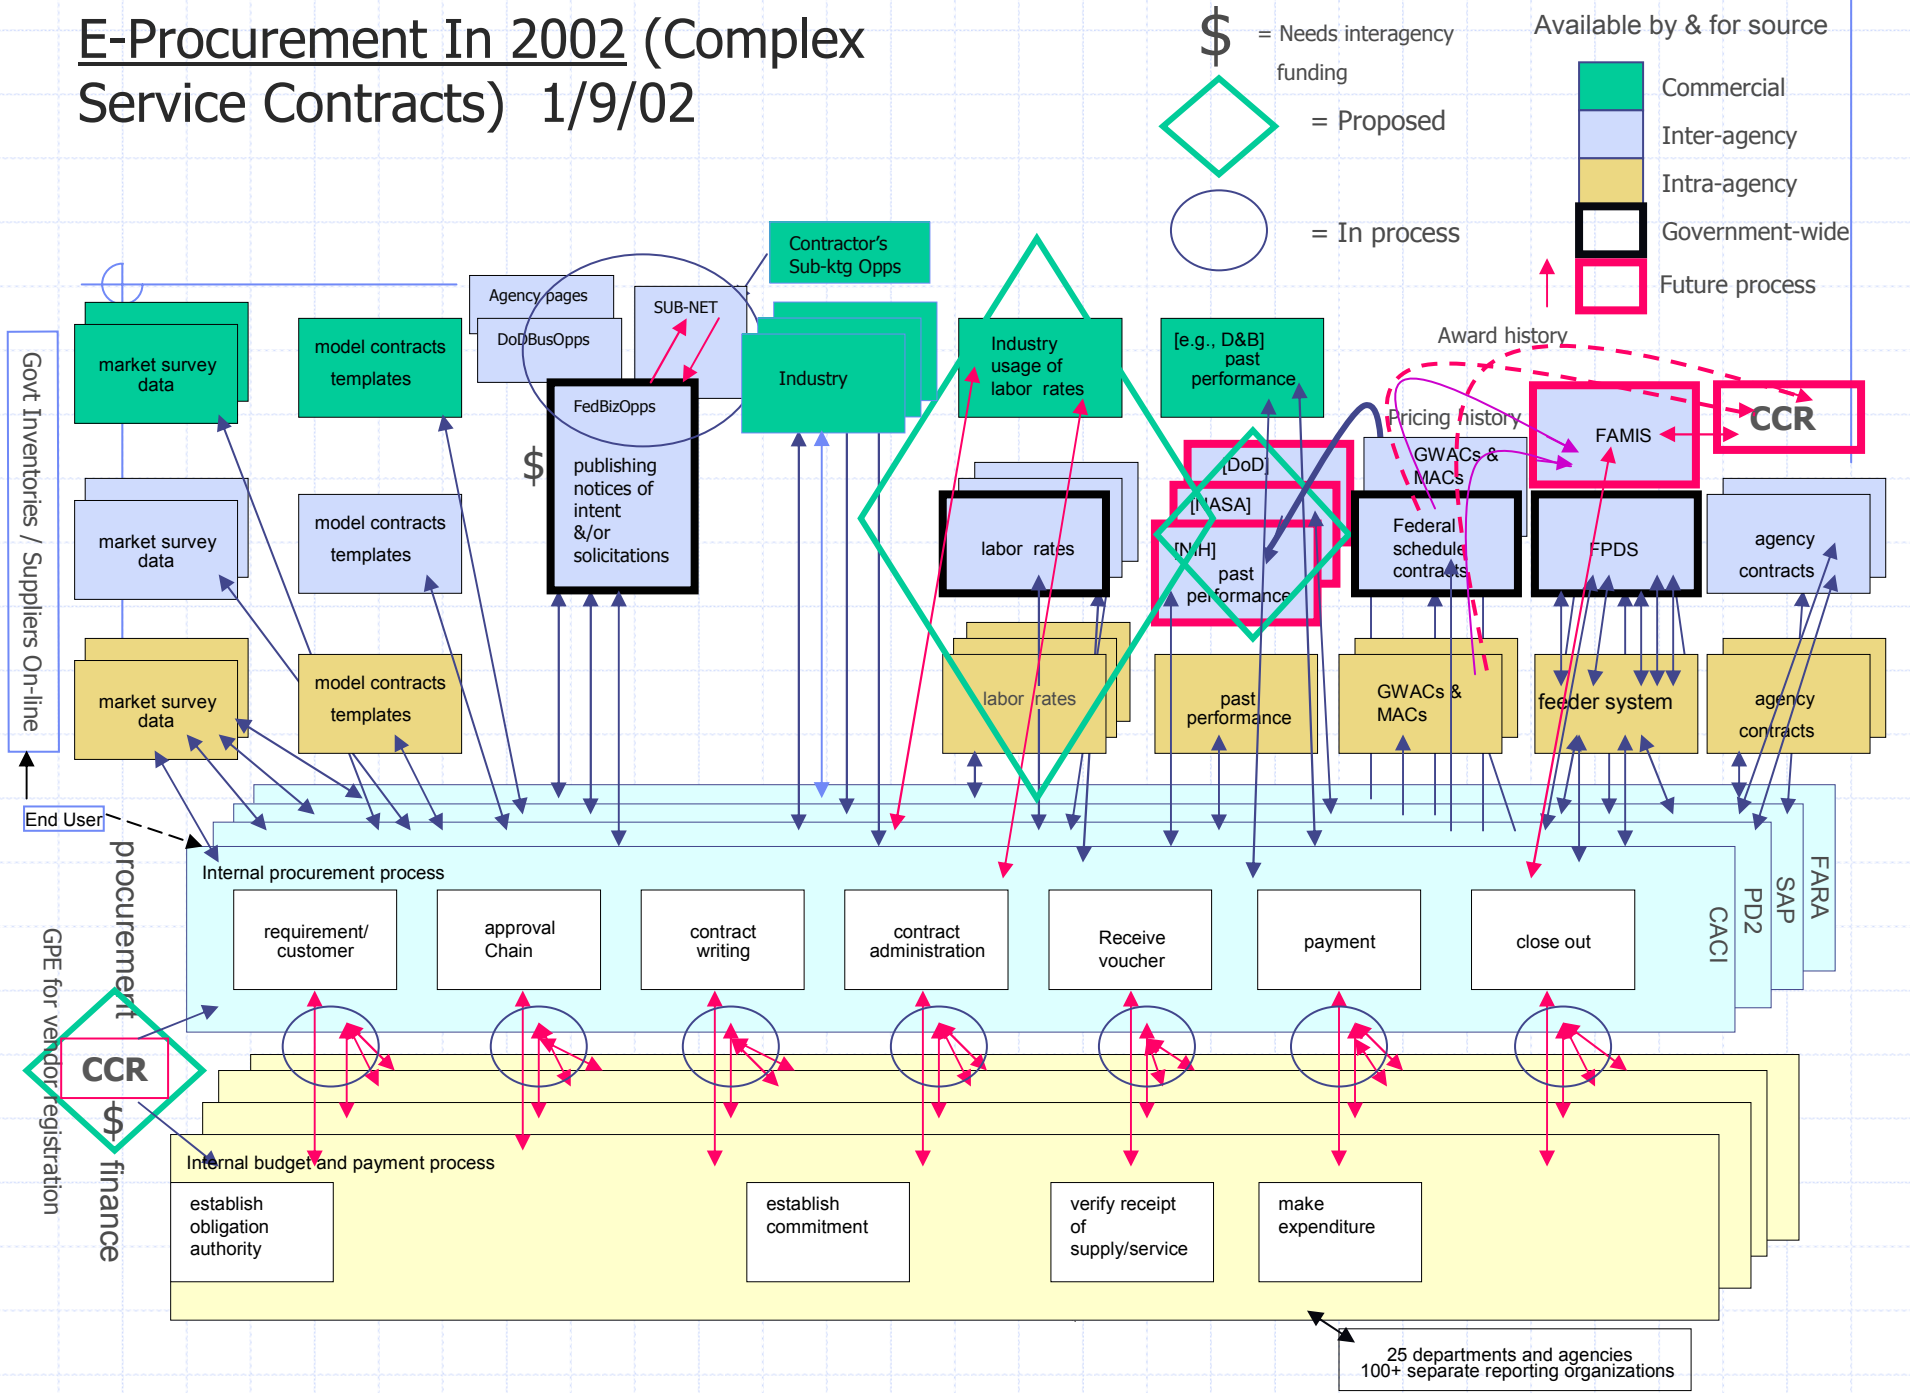

- ◆ Collect all the various types of e-catalogs and e-malls into a system-to-system integration or in a portal to:
 - Administer who has access to what applications they need
 - Monitor usage, review all the e-catalogs and e-malls
 - Periodically review who is the “weakest link”; consolidate what is needed from it and then turn it off

Traditional Procurement steps

- one at a time

E-Procurement In 2002 (Complex Service Contracts) 1/9/02

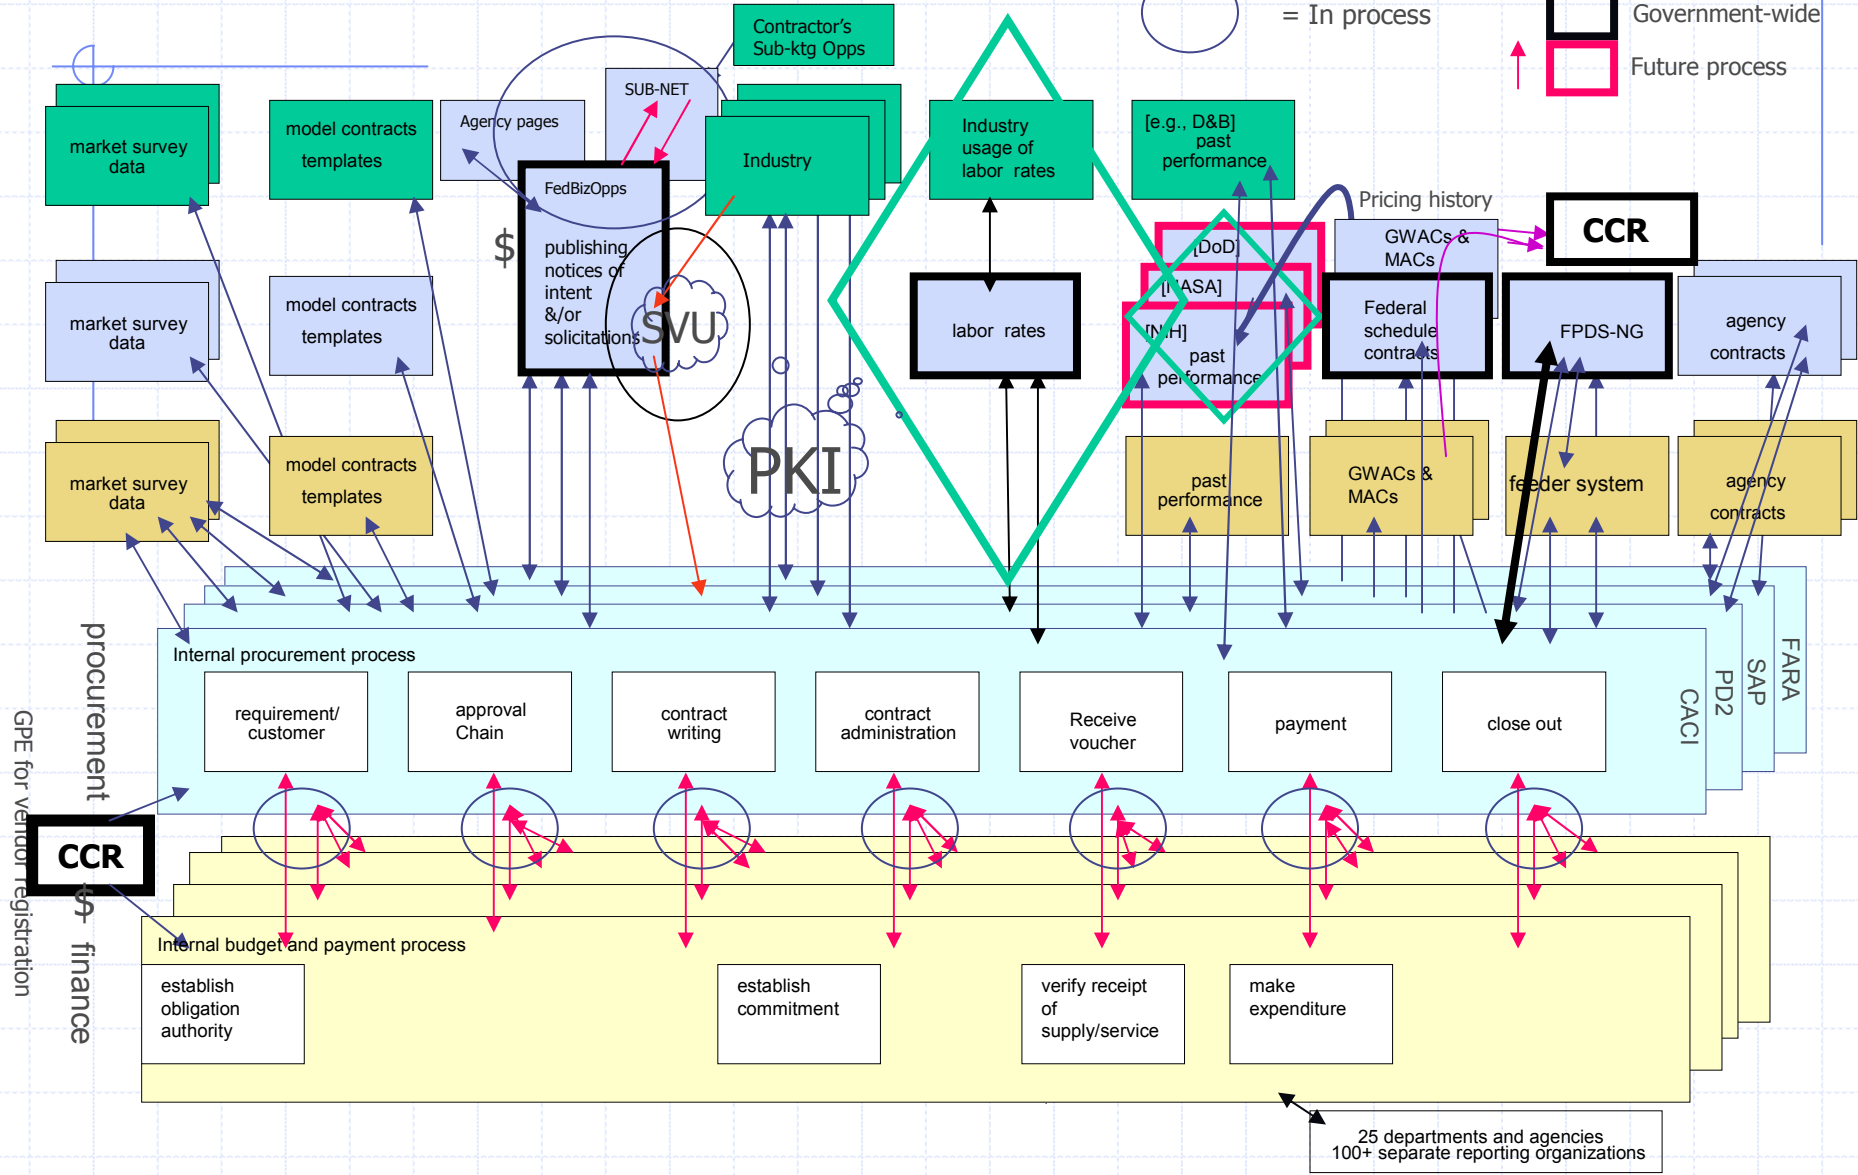

E-Procurement In-Progress 2005 (Complex Service Contracts)

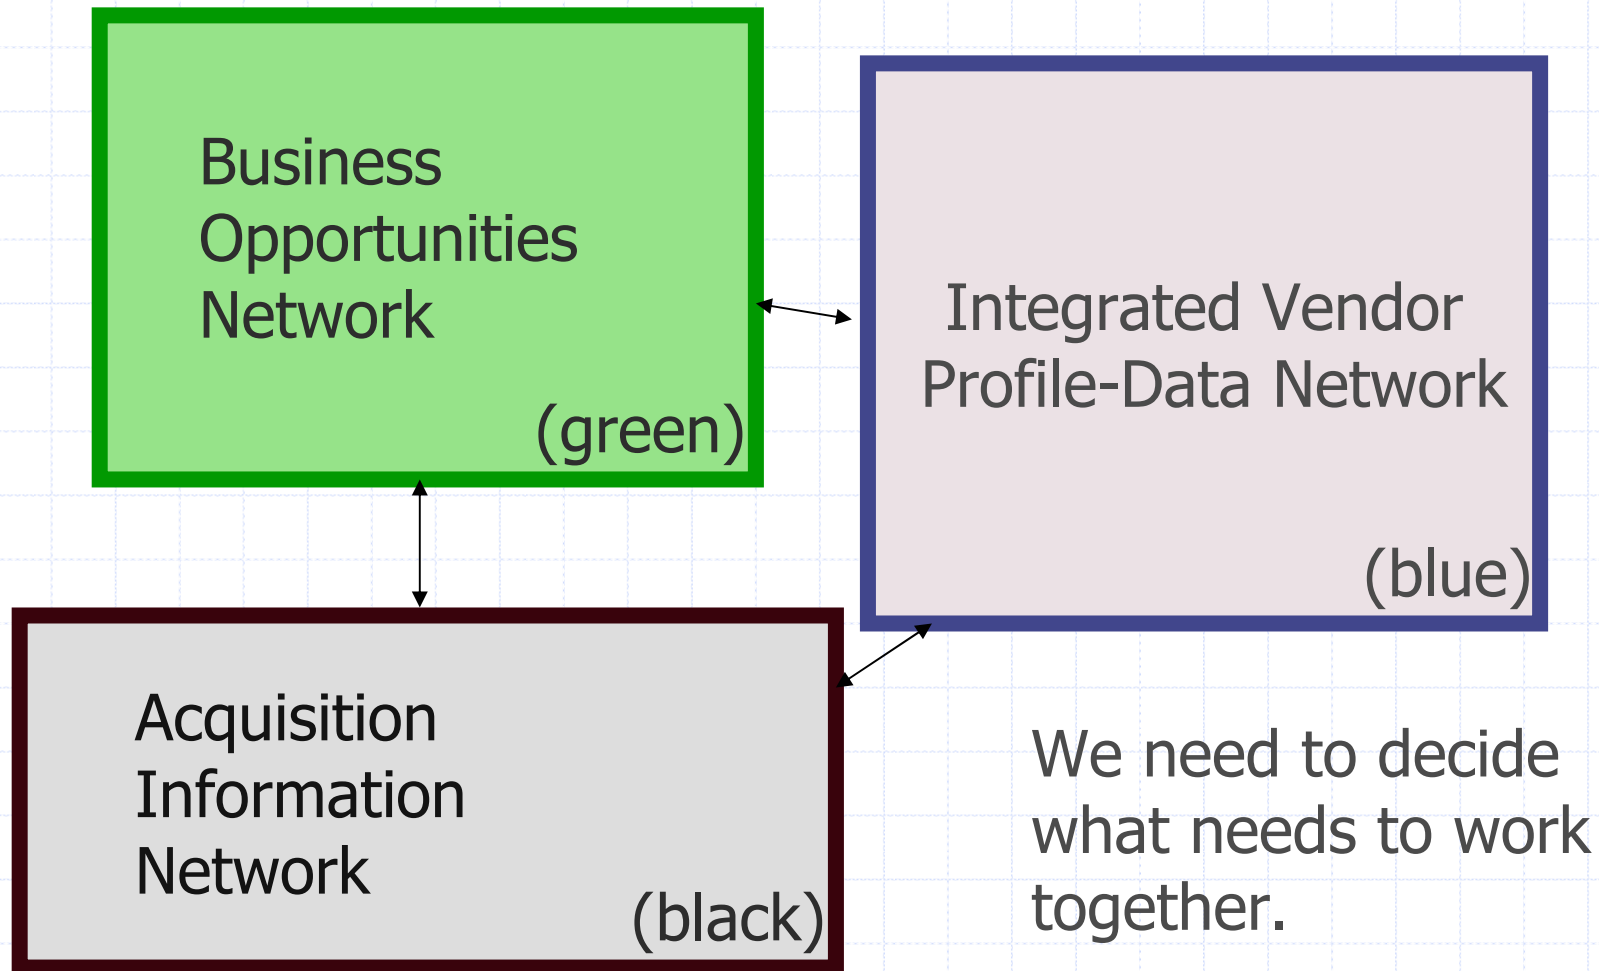

\$ = Needs interagency funding
 ◇ = Proposed
 ○ = In process

Available by & for source

- Commercial
- Inter-agency
- Intra-agency
- Government-wide
- Future process

“City planning” vs. building a system

The Circle of "Neighborhoods" or Networks
