## Education at a Glance

OECD INDICATORS 2005

The 2005 edition of *Education at a Glance: OECD Indicators* provides a rich, comparable and up-to-date array of indicators on the performance of education systems. In doing so, it represents the consensus of professional thinking on how to measure the current state of education internationally.

The indicators look at who participates in education, what is spent on it and how education systems operate, and at the results achieved. The latter includes indicators on a wide range of outcomes ranging from comparisons of student performance in key subject areas to the impact of education on earnings and adults' chances of employment.

Excel™ spreadsheets used to create the tables and charts in this book are available via the *StatLinks* printed in this book.

### NEW TO THIS EDITION

- Selected results of the 2003 survey of OECD's Programme for International Student Assessment (PISA)
- Earnings distribution for individuals with different educational levels
- Non-economic outcomes of education
- Participation of labour force members in continuing education and training
- Student learning time out of school
- Public and private schools performance
- Secondary school systems policy and practices to differentiate among students and the impact of these on outcomes

- > **A CHILD AT THE AGE OF 5** in the OECD area can generally now expect to undertake between 16 and 21 years of education during his or her lifetime.
- > **GIRLS ARE COMPLETING** both upper secondary and tertiary education at faster rates than boys, yet remain less likely to study maths or sciences.
- > **FOREIGN STUDENT INTAKE** in OECD countries increased by 11.5% between 2002 and 2003.
- > **OVER HALF OF FUNDING** for tertiary education comes from private sources in Australia, Japan, Korea and the US, compared to less than 5% in Denmark, Finland, Greece and Norway.
