Editorial	17
An Overview of Growing Income Inequalities in OECD Countries: Main Findings ..	21
1. The big picture: inequality on the rise in most OECD countries	22
2. What drives growing earnings and income disparities?	28
3. Lessons for policies.	40
Notes	42
References	42
Annex A1. Trends in Different Income Inequality Measures	44
Special Focus: Inequality in Emerging Economies (EEs)	47
1. Introduction	48
2. Inequality patterns in EEs	50
3. Economic factors behind inequality	53
4. Institutional arrangements shaping redistribution	58
5. Policy challenges for tackling inequality while creating more and better jobs.	64
Notes	77
References	78
Annex 0.A1. Main Features of Social Protection Systems in EEs	81

Part I

How Globalisation, Technological Change and Policies Affect Wage and Earnings Inequalities

Chapter 1. Trends in Wage Inequality, Economic Globalisation and Labour Market Policies and Institutions	85
1.1. Introduction	86
1.2. Trends in wage dispersion	86
1.3. Globalisation: recent trends in global economic developments	88
1.4. Trends in labour market policies, institutions and regulations	99
1.5. Summary and conclusions	104
Notes	105
References	106

Chapter 2. The Impact of Economic Globalisation and Changes in Policies and Institutions on Rising Earnings Inequality	109
2.1. Introduction	110
2.2. Effects of economic globalisation, technological change, and changes in policies and institutions on wage inequality	111
2.3. Effects on the top and the bottom of the wage distribution: tail-sensitive analyses	123
2.4. Summary and conclusions	125
Notes	126
References	128
Annex 2.A1. Data Sources and Variables	133
Annex 2.A2. Changes in the Skill Wage Gap and the Role of Sectors	136
Chapter 3. Inequality Between the Employed and the Non-employed	143
3.1. Introduction	144
3.2. Earnings inequality among the whole working-age population	145
3.3. Linking globalisation and developments in policies and institutions to changes in earnings inequality among the working-age population	151
3.4. Globalisation, regulatory reforms and changes in overall earnings inequality: bringing together the evidence	154
3.5. Summary and conclusions	156
Notes	157
References	159
Annex 3.A1. Data for the Analyses in Section 3.2	161
Annex 3.A2. Additional Tables and Figures	163

Part II

How Inequalities in Labour Earnings Lead to Inequalities in Household Disposable Income

Chapter 4. Hours Worked, Self-Employment and Joblessness as Ingredients of Earnings Inequality	167
4.1. Introduction	168
4.2. Trends in inequality among full-time workers and all workers	169
4.3. Compositional changes and their impact on trends in earnings inequality ..	171
4.4. Earnings inequality and joblessness	179
4.5. Summary and conclusions	181
Notes	182
References	184
Annex 4.A1. Additional Tables	185
Annex 4.A2. Accounting for the Effect of Joblessness on Earnings Inequality Among the Whole Working-Age Population	189

Chapter 5. Trends in Household Earnings Inequality: The Role of Changing Family Formation Practices	193
5.1. Introduction	194
5.2. Levels and trends in household earnings inequality	195
5.3. The determinants of changes in household earnings inequality: labour market and demographic factors	198
5.4. Explaining changes in household earnings inequality	204
5.5. Summary and conclusions	211
Notes	212
References	214
Annex 5.A1. Additional Tables and Figures	216
Chapter 6. From Household Earnings to Disposable Household Income Inequality ..	225
6.1. Introduction	226
6.2. Inequality: trends in the distribution of market and disposable income.	227
6.3. How much of inequality is explained by each of the income sources?	236
6.4. Redistributive effects of marginal increases in individual income components	243
6.5. Summary and conclusions	245
Notes	246
References	247
Annex 6.A1. Additional Tables	248
<i>Part III</i>	
How the Roles of Tax and Transfer Systems Have Changed	
Chapter 7. Changes in Redistribution in OECD Countries Over Two Decades	261
7.1. Introduction	262
7.2. Measured changes in redistribution	264
7.3. The role of policy reforms	281
7.4. Summary and conclusions	292
Notes	293
References	295
Annex 7.A1. Additional Tables and Figures	299
Chapter 8. The Distributive Impact of Publicly Provided Services	309
8.1. Introduction	310
8.2. Defining public social services	312
8.3. The overall distributive impact of publicly provided services on the distribution of income	314
8.4. The distributive impact of particular public services	318
8.5. The distributive impact of public services over time	329
8.6. Summary and conclusions	330
Notes	331
References	332
Annex 8.A1. How to Account for Publicly Provided Services in Household Income: Conceptual and Methodological Issues	335
Annex 8.A2. Additional Tables and Figures	340

Chapter 9. Trends in Top Incomes and Their Tax Policy Implications	343
9.1. Introduction	344
9.2. Data on top incomes	345
9.3. Trends in the share of top incomes	346
9.4. Explanations of the trends in top incomes	355
9.5. Tax policy implications	361
9.6. Summary and conclusions	369
Notes	370
References	371
Annex 9.A1. Characteristics and Limitations of Income Data from Tax Returns	374
Annex 9.A2. Additional Data and Figures	379

List of figures

1. Income inequality increased in most, but not all OECD countries	24
2. Inequality increased in most countries over the long term, but recently fell in some high-inequality countries	25
3. The integration of trade and financial markets and technological progress grew rapidly, especially from the mid-1990s	29
4. Product and labour market regulations and institutions became weaker	30
5. Levels of earnings inequality are much higher when part-timers and self-employed are accounted for	33
6. Hours worked declined more among lower-wage workers	34
7. Demographic changes were less important than labour market trends in explaining changes in household earnings distribution	35
8. Capital income became a greater source of household income, but mainly in rich households	35
9. Market incomes are distributed much more unequally than net incomes. ...	36
10. While market income inequality rose, redistribution through tax/transfers became less effective in many countries	37
11. In-kind benefits from public services are redistributive in all OECD countries	39
12. The share of top incomes increased, especially in English-speaking countries	39
0.1. GDP per capita	49
0.2. Change in inequality levels, early 1990s versus late 2000s	51
0.3. Change in real household income by quintile	52
0.4. Inequality in urban and rural areas	54
0.5. Informality in emerging economies	55
0.6. PISA scores in mathematics, 2009 (proficiency levels)	57
0.7. Earnings inequality, decile ratios	58
0.8. Public social expenditure in OECD countries and emerging economies	59
0.9. Unemployment benefit reciprocity rates in OECD countries and emerging economies	61
0.10. Employment protection legislation	64
0.11. Minimum wages in G20 countries, 2009	69

1.1. Trends in wage dispersion, selected OECD countries, 1980-2008	87
1.2. Country-specific regression of wage inequality (D9/D1) on time trend (years indicated)	88
1.3. Change in trade intensity by region of origin, 1980-2008	89
1.4. Change in trade intensity with developing countries, by income group of developing country	90
1.5. Association between trends in wage dispersion and trade openness, 1985-2007	91
1.6. Cross-border liabilities by components (% of GDP), OECD average, 1980-2007	92
1.7. Cross-border assets by components (% of GDP), OECD average, 1980-2007	92
1.8. Inward (liabilities) foreign direct investment stock to GDP ratios, 1980-2008	93
1.9. Outward (assets) foreign direct investment stock to GDP ratios, 1980-2008	94
1.10. Association between trends in wage dispersion and foreign direct investment restrictiveness, 1985-2006	95
1.11. BERD as a percentage of GDP, 1981-2008	95
1.12. Total patent counts, 1980-2007	96
1.13. Patents per capita (per million persons)	96
1.14. Shares of ICT investment in non-residential gross fixed capital formation	97
1.15. Share of ICT employment in business sector employment	97
1.16. Association between trends in wage dispersion and R&D intensity, 1985-2007	98
1.17. Association between trends in wage dispersion and ICT intensity, 1985-2007	98
1.18. Changes in labour market institutions and policies, 1980-2008	101
1.19. Association between trends in wage dispersion and labour market policies and institutions, 1985-2007	103
2.1. Share of outward FDI stock by industry sectors, selected OECD countries, 2007	118
2.2. Robustness tests: influential country in the regression of wage inequality	121
2.3. Accounting for changes in wage inequality: the role of globalisation, technology and labour market policies and institutions	122
2.A2.1. Increased gap between the wages of high and low-skilled workers, 1985-2005	137
2.A2.2. Wage gaps and trade openness by sector, 1985-2005	138
2.A2.3. Wage gaps and technological change by sector, 1985-2005	139
2.A2.4. Wage gaps and trade in intermediate inputs, 1995-2005	140
2.A2.5. Changes in wage gaps and outward FDI, 1995-2005	141
3.1. Change in employment rate needed to compensate change in wage inequality among workers, in order to keep earnings inequality among the whole working-age population unchanged	147
3.2. Estimated contributions of wage dispersion and employment effects to overall earnings inequality among the working-age population	148
3.3. Decomposing changes in the Gini coefficient of earnings among the entire working-age population	149

3.A1.1. Actual <i>versus</i> simulated changes in Gini coefficients among the working-age population	161
3.A2.1. Contributions of wage and employment effects to overall earnings inequality among the working-age population: alternative scenario	164
4.1. Earnings inequality (Gini coefficient) among full-time workers, full-time and part-time workers and all workers, mid-2000s	170
4.2. Evolution of earnings inequality among full-time workers, full- and part-time workers and all workers, mid-1980s to mid-2000s	171
4.3. The contribution of paid employment earnings and self-employment income to earnings inequality (Gini coefficient) among all workers, mid-1980s to mid-2000s	174
4.4. Inequality of hourly wages <i>versus</i> inequality of annual earnings, all paid workers	175
4.5. Changes in annual hours worked and in hourly real wages by earnings quintile, mid-1980s to mid-2000s	178
4.6. Inequality of earnings (Gini coefficient) among the entire working-age population, mid-1980s and mid-2000s	180
4.7. Earnings inequality among workers and the entire working-age population and developments in non-employment rates	181
4.A2.1. Static decomposition of earnings inequality among the working-age population, by earnings dispersion among workers and employment status, mid-2000s	190
4.A2.2. Dynamic decomposition of changes in earnings inequality among the working-age population (GE0)	191
5.1. Inequality (Gini coefficient) of annual earnings among individuals and households, all working-age households (including individuals and households with no earnings)	196
5.2. Inequality (Gini coefficient) of annual earnings among individuals and households, workers and working households	196
5.3. Evolution of equivalent household earnings inequality (Gini coefficient)	197
5.4. Polarisation of men's earnings distribution	200
5.5. Women's employment rates have increased markedly	200
5.6. Female employment rates increased the most among wives of top earners ..	201
5.7. Degree of assortative mating, stricter and broader definitions	203
5.8. The share of single-headed households has increased in all OECD countries	204
5.9. Explaining changes in household earnings inequality: contributions of labour market and demographic factors	209
5.A1.1. Working wives' annual earnings by husband's earnings decile, couple households, mid-1980s and mid-2000s	221
6.1. Gini coefficients of inequality of market and disposable incomes, persons of working age, late 2000s	228
6.2. Trends in inequality of disposable and market income, working-age population	229
6.3. Shares of disposable income components, working-age population, mid-2000s	230

6.4. Shares of income components in lower and higher income groups, mid-2000s	233
6.5. Gini coefficients of concentration of market income sources, mid-1980s and mid-2000s	235
6.6. Decomposition of income inequality by income source, average of 14 OECD countries, mid-2000s	238
6.7. Contribution of wages and self-employment income to overall inequality, mid-1980s to mid-2000s	238
6.8. Contribution of capital income to overall inequality, mid-1980s to mid-2000s	240
6.9. Contribution of social insurance and means-tested transfers to overall inequality, mid-1980s to mid-2000s	241
6.10. Contribution of income taxes and social security contributions to overall inequality, mid-1980s to mid-2000s	242
6.11. Redistributive effects of marginal increases in individual income components, mid-2000s	244
7.1. Overall amounts of taxes paid and benefits received in the mid-2000s	265
7.2. Redistribution tends to be higher when incomes are more unequal	272
7.3. Drivers of redistribution: progressivity and size of transfers and taxes	278
7.4. Unemployment benefit reciprocity	281
7.5. Unemployment benefit coverage	282
7.6. Net replacement rates of unemployment support	286
7.A1.1. Gains and losses in net transfers, percentage of disposable income, 1995-2005: policy changes and fiscal-drag	302
7.A1.2. Position in the income distribution under different policy scenarios	305
8.1. Public expenditure for in-kind and cash transfers, in percentage of GDP, 2007	311
8.2. Income-increasing effect of in-kind benefits from public services, 2007	316
8.3. Income poverty rates before and after including total of public services (floating poverty line), 2007	318
8.4. Gini coefficient before and after inclusion of public education services	320
8.5. Distribution of education services over income quintiles, 2007	321
8.6. Gini coefficient before and after inclusion of public health care services	323
8.7. Distribution of in-kind benefits from social housing by income quintiles, 2007	324
8.8. Income-increasing effect from ECEC services, 2007	325
8.9. Distribution of ECEC in-kind benefits over quintiles	326
8.10. Distribution of elderly care expenditures over income quintiles	328
8.11. Association between trends in size of public services and changes in inequality reduction, 2000-2007	330
8.A1.1. Gini coefficient before and after inclusion of all types of public services, comparing three equivalence scales for extended income	339
9.1. Top 1% income share, 1910-2008	347
9.2. Top 1% income share, 1900-2009	348
9.3. Effect of capital gains on share of top percentile, 1940-2008	350
9.4. Top 0.1% income share and composition, United States, 1916-2008	351

9.A1.1. Share of top 1% of income recipients in the United States under alternative income definitions.	376
9.A2.1. Top 10% income share	380
9.A2.2. Top 1% income share	381
9.A2.3. Top 0.1% income share	382
9.A2.4. Shares of gross income by fractile group	383

List of tables

1. Household incomes increased faster at the top	23
2. Trends in technology, policies and education were the key drivers of changes in wage inequality and employment in the OECD area.	32
A1.1. Trends in different income inequality measures	45
0.1. Total tax revenue as a percentage of GDP for major non-OECD economies. . .	62
0.2. Tax systems of selected EE countries: a comparative overview	63
2.1. The impact of globalisation, technological progress and regulatory reform on trends in wage dispersion.	112
2.2. The impact of trade integration on trends in wage dispersion	114
2.3. The impact of trends in financial openness on trends in wage dispersion . . .	117
2.4. Impact of changes in product and labour market policies and institutions on trends in wage inequality	120
2.5. Globalisation, labour market policies/institutions and inequality among lower-wage and higher-wage workers	124
2.A1.1. OECD structure of earnings database	133
2.A1.2. Explanatory variables and data sources.	134
2.A2.1. Changes in the share of high-skilled workers wages, 1985-2005	139
2.A2.2. Data sources, country and sector coverage	142
3.1. Wage inequality and employment effects on overall inequality among the working-age population	148
3.2. Globalisation, policies and institutions and changes in the employment rate	152
3.3. Main drivers for changes in the earnings distribution among the whole working-age population	155
3.A2.1. Simulation of the wage and employment effects by country, entire working-age population	163
3.A2.2. Wage and employment effects on overall inequality among the working-age population: alternative scenario	164
4.1. Decomposition of the variance of log annual earnings, paid workers, mid-2000s	177
4.A1.1. Decomposition of annual earnings inequality by income source, all workers (aged 25-64)	186
4.A1.2. The developments of hourly wages and annual hours worked by top and bottom quintiles of the annual earnings distribution.	188
5.1. Factors influencing changes in household earnings inequality	207
5.A1.1. Labour market and family formation factors impacting on household earnings inequality	217
5.A1.2. Factors influencing on changes in household earning inequality, robustness test	219

6.1. Changes in shares of disposable income components in selected OECD countries	232
6.2. Changes in wage, capital and other income shares for poorer and richer income segments	234
6.A1.1. Gini coefficients from the <i>OECD Database on Household Income Distribution and Poverty</i> and from the LIS dataset	249
6.A1.2. Decomposition of (disposable) income inequality by income sources, countries reporting gross incomes	250
6.A1.3. Decomposition of (disposable) income inequality by income sources, countries reporting net incomes	253
6.A1.4. Marginal effects of changes in income components	256
7.1. Tax revenues: trends and components	266
7.2. Redistribution: general country trend	268
7.3. Redistribution trends: detailed results by country	269
7.4. A higher degree of redistribution at the bottom than at the top of the income distribution	273
7.5. Main changes in generosity of four benefit programmes, mid-1980s to mid-2000s	283
7.6. Net replacement rates of unemployment support	287
7.A1.1. Public social expenditure: trends and components	300
8.1. Income-increasing effect of in-kind benefits from public services by quintile, OECD27 average, 2007	316
8.2. Summary inequality indicators for cash income and extended income (imputing total public services), 2007	317
8.3. Income-increasing effect of benefits from public education services by quintile, OECD27 average, 2007	319
8.4. Income-increasing effect of benefits from public health care services by quintile, 2007	322
8.5. Income-increasing effect of social housing, all individuals and reduced rent tenants by quintile, 2007	324
8.6. Percentage of young children enrolled in ECEC services, by income quintile	326
8.7. Income-increasing effect of long-term care in-kind benefits by quintile, 2007	328
8.8. Impact of total services on inequality (Gini coefficients), 2000 and 2007	329
8.A1.1. Allocation methods applied for different public services	336
8.A1.2. Imputation of education services in household income for a typical low-income family with two children, example with three alternatives	338
8.A2.1. Inequality indicators and percentage change when taking into account different services	340
8.A2.2. Changes in inequality reduction through services, S80/S20, 2000 and 2007	341
9.1. Share of top 1% in selected years	349
9.2. Percentage of primary taxpayers in the top 0.1% of the income distribution (including capital gains) that are in each occupation, United States, 2004	352
9.3. Taxpayers analysed by industry, United Kingdom, 2007-08	352
9.4. Turnover rates for the top 1% (exits compared with previous year)	353
9.5. Income mobility of the top percentile group of United States taxpayers, 1996-2005	355

9.6. International comparison of average PIT rates	362
9.7. Average personal income tax burdens on top percentile group	363
9.8. Shares of pre- and post-tax income in the United States, 2004	363
9.9. Top marginal rates of central governments personal income tax (%)	364
