

**Report on the Test Results of
Endocrine Disrupting Effects of Tributyltin (TBT) on Fish
(Draft)**

August, 2001

**Environmental Health Department
Ministry of the Environment
Government of Japan**

Table of Contents

1.	Background and Development	1
2.	Properties, uses, etc.	1
	(1) Chemical structure	1
	(2) Major properties	2
	(3) Uses	3
3.	State of use, regulation, etc.	3
	(1) State of use and regulation in Japan	3
	(2) State of production and regulation outside Japan	3
4.	Distribution and degradation in environment, fate in body, and concentration in the environment	3
	(1) Distribution and degradation in the environment	3
	(2) Fate in the body	5
	(3) Result of environmental surveys in Japan	6
5.	General toxicity	8
	(1) Acute toxicity	8
	(2) Chronic toxicity	8
	(3) Reproductive toxicity	9
6.	Literature search and reliability assessment concerning suspected endocrine disrupting effects on fish etc.	10
	(1) Effects on fish	10
	(2) Effects on other aquatic organisms	11
7.	Results, etc. of Screening endocrine disrupting effects in fish.....	11
	(1) <i>In vitro</i> assays	11
	(2) <i>In vivo</i> studies using medaka	12
8.	States of research, etc. for elucidating the effects of very low concentration TBT on snails such as rock shell	15
	(1) Characteristics of imposex	15
	(2) Substances causing imposex	16
	(3) Hypotheses about imposex induction mechanism	16
9.	Assessment results on endocrine disrupting effects of tributyltin (TBT).....	17
	(1) Effects on fish	17
	(2) Effects on other aquatic organisms	18
	(3) Effects on mammals	18
10.	Assessment results and future challenges	19
11.	Additional remarks	19

(Appendix 1)

1. International regulations, etc.....	20
(1) IMO	20
(2) Europe and North America	20
2. Regulations outside Japan.....	21

(Appendix 2)

National survey results on imposex of rock shell (September 1996 - January 1999)	22
--	----

(Appendix 3)

Summary of effects of tributyltin (TBT) on mammals

1. General toxicity	23
(1) Acute toxicity.....	23
(2) Chronic toxicity	23
(3) Reproductive toxicity	23
(4) Other toxicity	24
2. Literature search and reliability assessment concerning suspected endocrine disrupting effects on mammals etc.	24
(1) <i>In vitro</i> test	25
(2) Animal test (<i>in vivo</i> test).....	25
