Editorial: Ensuring Equality of Job Opportunities for All	11
Recent Labour Market Developments and Overview of the Publication	15
Chapter 1. Off to a Good Start? Youth Labour Market Transitions in OECD Countries ..	25
Introduction	26
Main findings	26
1. Employment outcomes by age	28
1.1. Changes in the situation of youth in the labour market during the past decade	28
1.2. Sensitivity of youth unemployment and employment rates to the business cycle	33
1.3. Activity status by single year of age	33
2. The transition from school to work	37
2.1. Descriptive analysis of the school-to-work transition	37
2.2. The average duration of the school-to-work transition	45
3. Job quality issues related to the school-to-work transition	48
3.1. How long does it take to find a stable job?	48
3.2. Mobility of youth in temporary and low paid-jobs	51
3.3. Mobility of youth not in education, employment or training (NEETs)	58
Conclusion	60
Notes	63
Annex 1.A1. Supplementary Tables and Figures	67
Bibliography	77
Chapter 2. Declaring Work or Staying Underground: Informal Employment in Seven OECD Countries	79
Introduction	80
Main findings	81
1. Extent and characteristics of informal employment	84
1.1. Informal employment is difficult to define and measure	84
2. Reducing the cost of formal employment	88
2.1. Minimum wages	89
2.2. Taxes	93
2.3. Employment protection legislation (EPL)	103
3. Increasing the benefits of formalisation	105
3.1. Social protection delivery and financing	106
3.2. Encouraging tax compliance through better governance	111
4. Improving enforcement	112

4.1. Tax administration and enforcement	113
4.2. Labour inspection and enforcement	116
4.3. Better inter-agency coordination	120
4.3. Conclusion	122
Notes	126
Annex 2.A1. Characteristics of Employees who Earn Less than the Minimum Wage in Turkey	130
Annex 2.A2. Recent Changes in Employment Protection Legislation	132
Bibliography	133
Chapter 3. The Price of Prejudice: Labour Market Discrimination on the Grounds of Gender and Ethnicity	139
Introduction	140
Main findings	141
1. Some stylised facts: gender and ethnic gaps in labour market performance	142
1.1. Gender disparities in the labour market	142
1.2. Employment and wage gaps of ethnic minorities	147
2. From labour market disparities to discrimination	149
2.1. Entering into the black box	150
2.2. Direct evidence on discrimination: field experiments	150
2.3. Indirect evidence on specific sources of discrimination	156
3. Anti-discrimination laws across OECD countries	162
3.1. Raising public awareness	162
3.2. Worker incentives to bring a case before courts	168
3.3. Employer incentives to comply with anti-discrimination legislation and follow an equality policy	175
3.4. Alternative resolution mechanisms: mediation and conciliation procedures	179
3.5. How effective are these anti-discrimination frameworks?	182
Conclusion	184
Notes	185
Annex 3.A1. Data Sources and Definition	189
Annex 3.A2. Supplementary Tables	193
Bibliography	197
Chapter 4. Are All Jobs Good for Your Health? The Impact of Work Status and Working Conditions on Mental Health	203
Introduction	204
Main findings	205
1. Why study the link between work and mental health?	206
1.1. Poor mental health accounts for a rising share of disability	206
1.2. Prior research shows that work affects mental health	206
1.3. Trends in employment rates and working conditions	208
2. Has mental health worsened?	211
2.1. Trends in suicide rates	212
2.2. Trends in morbidity-related mental health	214
2.3. Trends in work-related mental problems	222

3. What is the impact of labour force status and workplace on mental health?	224
Conclusion	237
Notes	240
Annex 4.A1. Presentation of Data Sources	241
Annex 4.A2. Analysis of the Effects of Work on Health	255
Bibliography	260
Chapter 5. Do Multinationals Promote Better Pay and Working Conditions?	263
Introduction	264
Main findings	265
1. The social dimension of foreign direct investment	267
2. The direct effects of FDI on wages and working conditions in the foreign affiliates of MNEs	271
2.1. Why would MNEs provide better pay and working conditions than comparable domestic firms?	271
2.2. Descriptive evidence	273
2.3. New micro-level evidence for selected countries	275
3. The indirect effects of FDI on wages and working conditions in domestic firms	288
3.1. Why might pay and working conditions spill over from foreign to domestic firms?	289
3.2. FDI and wage spillovers	289
3.3. Spillovers through backward linkages and worker mobility	291
4. Promoting socially responsible investment	296
4.1. Promoting foreign direct investment	296
4.2. How to ensure minimum labour practices in the foreign operations of MNEs?	301
Conclusion	311
Notes	312
Annex 5.A1. Data Sources and Variable Definitions	319
Annex 5.A2. Summary of Previous Research on Foreign Wage Premia	323
Annex 5.A3. Econometric Methodology for Estimating Wage Spillovers	325
Bibliography	327
Annex A. Statistical Annex	333
A. Standardised unemployment rates in 27 OECD countries	335
B. Employment/population ratios, activity and unemployment rates	336
C. Employment/population ratios, activity and unemployment rates by selected age groups	339
D. Employment/population ratios, activity and unemployment rates by educational attainment, 2006	348
E. Incidence and composition of part-time employment	351
F. Average annual hours actually worked per person in employment	353
G. Incidence of long-term unemployment	355
H. Earnings dispersion, gender wage gap and incidence of low pay	358
I. Average annual wages in the total economy	359
J. Public expenditure and participant stocks in labour market programmes in OECD countries	360

List of Boxes*Chapter 1*

- 1.1. Student employment. 34
- 1.2. A multivariate perspective on the factors influencing employment, unemployment and inactivity for out-of-school youth 41
- 1.3. The school-to-work transition in Japan 50
- 1.4. A multivariate perspective on the type of job held by youth 51

Chapter 2

- 2.1. Informal employment: segmentation, choice or somewhere in-between? 85
- 2.2. The minimum wage as a tax-enforcement mechanism in Hungary 92
- 2.3. Chile's job-loss compensation scheme: improving incentives to be formal? 111
- 2.4. Encouraging formalisation: a country-by-country synthesis 124

Chapter 3

- 3.1. Some theoretical considerations on labour market discrimination 151
- 3.2. Audits and correspondence tests: strengths and weaknesses 153
- 3.3. Evidence on taste-based discrimination from country-specific studies. 157
- 3.4. Model specification. 159
- 3.5. More legal guidance or support in gathering evidence of discrimination would be useful 169

Chapter 4

- 4.1. Measuring mental health. 211
- 4.2. Decomposing the total change in health status. 220
- 4.3. The impact of labour market conditions on mental health 226

Chapter 5

- 5.1. Why would MNEs provide better pay and working conditions than comparable domestic firms? 272
- 5.2. Econometric methodology. 277
- 5.3. The impact of corporate social responsibility (CSR) on working conditions in the supply chain 293
- 5.4. Export Processing Zones (EPZs) 300
- 5.5. The OECD Guidelines for Multinational Enterprises and the system of National Contact Points (NCPs). 308
- 5.6. Better Factories Cambodia 310

List of figures*Chapter 1*

- 1.1. The situation of youth (15-24 years) in the labour market, 1996 and 2006. 29
- 1.2. Sensitivity of youth labour market performance to the business cycle, 1980-2006 35
- 1.3. Activity status by single year of age in OECD countries, 2006 36
- 1.4. Employment rates by gender of youth and young adults one, five and ten years after leaving initial education, 2006 39
- 1.5. Employment rates by qualification of youth and young adults one, five and ten years after leaving initial education, 2006 40
- 1.6. Speed of transition to work of youth by educational attainment and gender: four country examples 43

1.7.	Average school-leaving age and two estimates of the duration of the school-to-work transition, 2006	47
1.8.	Average duration of transitions to first and permanent jobs: panel data estimates	49
1.9.	Alternative measures of low-paid employment of youth, over five years	56
1.10.	Alternative incidence measures of NEET status of youth, over five years	61
1.A1.1.	Speed of transition to work of youth by educational attainment and gender	73
<i>Chapter 2</i>		
2.1.	Earnings distribution of full-time, non-farm employees	90
2.2.	Tax wedge level and composition, 2006	94
2.3.	Average effective tax rates for short-term unemployed persons re-entering low-wage employment, 2005	96
2.4.	Marginal tax wedge for a single worker with no children (% of labour cost), 2007	98
2.5.	Tax rates on distributed profits, 2007	99
2.6.	Employment protection legislation index in selected countries, 2003	104
2.7.	Less redistributive pension systems do not systematically lead to higher pension coverage	107
2.8.	Government effectiveness and corruption control	112
2.9.	Audit staffing and activity, 2004	115
2.10.	Labour inspectors per 10 000 employed persons, 1995-2006	117
2.11.	Labour inspections by firm size	118
<i>Chapter 3</i>		
3.1.	The gender employment gap has narrowed over time and converge towards countries with low gaps	143
3.2.	The gender employment gap still varies widely across OECD countries	145
3.3.	Gender wage and employment gaps are weakly correlated	146
3.4.	Differences in educational attainment play a role in shaping racial employment and wage gaps	148
3.5.	The second generation has a lower employment rate than the native-born without a migration background, but its lower educational attainment explains about one half of the employment gap	149
3.6.	Pro-competitive regulatory reforms in the product market lower the gender employment and wage gaps	161
3.7.	Public awareness about legal anti-discrimination provisions	165
3.8.	Public awareness about discrimination in the workplace and support for equality policies in selected European countries	167
<i>Chapter 4</i>		
4.1.	Change in selected labour market outcomes and working condition indicators in OECD countries, 1995-2006	210
4.2.	Evolution of age-standardised suicide rate in OECD countries, 1960-2005	213
4.3.	Change in the prevalence of psychological distress and mental illness in selected OECD countries	216
4.4.	Relative prevalence of psychological distress by socio-economic variables in selected OECD countries	217
4.5.	Relative prevalence of mental illness by socio-economic variables in selected OECD countries	219

4.6.	Changes in mental health by socio-economic variables in selected OECD countries	221
4.7.	Change in the share of employees reporting three or more work-related mental health problems in Europe, 1995-2005	222
4.8.	Increased exposure to some stressful working conditions was associated with increased prevalence of work-related mental problems in Europe, 1995-2005	224
4.9.	Effect of leaving employment on mental health distress	227
4.10.	Effect of transition from non-employment to employment on mental health distress	229
4.A1.1.	Age-profile of suicide rates in selected OECD countries, 1950-2004	243
4.A1.2.	Relative prevalence of psychological distress by socio-economic variables in selected OECD countries	246
4.A1.3.	Relative prevalence of mental illness by socio-economic variables in selected OECD countries	247

Chapter 5

5.1.	Trends in foreign direct investment, 1990-2005	268
5.2.	MNE policies on working conditions	270
5.3.	A comparison of employment conditions and productivity between MNEs and local firms.	274
5.4.	A comparison of employment conditions and productivity in domestic firms that engage with MNEs and with other local firms	295
5.5.	The role of market access and production costs for FDI	298
5.6.	Inward FDI and labour law enforcement.	299

List of tables

Recent Labour Market Developments and Overview of the Publication

0.1.	Growth of real GDP in OECD countries	17
0.2.	Employment and labour force growth in OECD countries	19
0.3.	Unemployment in OECD countries.	20
0.4.	Real compensation per employee in the business sector in OECD countries	22

Chapter 1

1.1.	Alternative estimates of the average duration of the school-to-work transition, 2006	46
1.2.	Share of workers in temporary and permanent jobs by gender, qualification and years since leaving school	53
1.3.	Five-year experience of temporary jobs by out-of-school youth with some employment: average cumulative duration and number of spells	55
1.4.	Five-year experience of low-paid employment by out-of-school youth: average cumulative duration and number of spells	57
1.5.	NEET status of youth one, three and five years after leaving school by gender ...	59
1.6.	Five-year experience of NEET status by out of school youth.	62
1.A1.1.	The situation of youth in the labour market, 1996 and 2006	68
1.A1.2.	Employment and earnings of young workers compared to those of adult workers, 1996 and 2006	70
1.A1.3.	Average duration of school-to-work transition by gender in selected European countries, 2006.	72

<i>Chapter 2</i>	
2.1. Alternative measures of informal employment and undeclared work	86
2.2. Taxation of SMEs' business income, 2007	100
2.3. Coverage by social protection schemes and contribution conditions for the self-employed	102
2.4. Unemployment insurance schemes: contribution requirements, benefits and coverage	110
2.5. Maximum fines imposed for breaches of selected labour regulations	119
2.A1.1. Factors affecting the probability of full-time workers earning less than the minimum wage in Turkey	130
<i>Chapter 3</i>	
3.1. Ethnic minorities have a lower probability of being called back for an interview .	154
3.2. Public awareness of discrimination issues and public access to the anti-discrimination framework	163
3.3. Worker incentives to bring a case before courts	170
3.4. Employer incentives to comply with anti-discrimination legislation and follow an equality policy	176
3.5. Mediation and conciliation procedures	181
3.6. Ratification of anti-discrimination conventions is associated with a lower gender employment and wage gaps.	184
3.A1.1. Wage data (except for Figure 3.4)	189
3.A1.2. Data for Figure 3.4: Employment and wage gaps between "white" and "non-white" groups in Canada, the United Kingdom and the United States. . .	190
3.A1.3. Aggregate variables	190
3.A1.4. Industry-level variables	192
3.A2.1. National legal and institutional framework to fight labour market discrimination on gender and ethnic grounds	193
3.A2.2. Selected studies estimating the impact of anti-discrimination laws in the United States	196
<i>Chapter 4</i>	
4.1. Share of inflows into disability due to mental diseases in selected OECD countries	207
4.2. Impact of some socio-economic variables on the log of suicide rates in OECD countries	215
4.3. Work-related mental health problems are often associated with poor working conditions and low job satisfaction in Europe	223
4.4. Effect of changes in the type of employment on mental health distress	230
4.5. Effect of changes from non-employment to different types of employment on mental health distress	233
4.6. Effect of changes from sick leave to different types of employment on mental health, taking into account previous mental health distress	238
4.A1.1. Data sources for morbidity	244
4.A1.2. Change in selected labour market outcomes in OECD countries, 1995-2006	250
4.A1.3. Change in selected working conditions indicators in European countries, 1995-2005	252
4.A1.4. Work-related mental health problems are often associated with poor working conditions and low job satisfaction in Europe	253
4.A2.1. Effect of changes in labour market activity on mental health distress	259

Chapter 5

5.1. The effects of cross-border takeovers on average wages and employment	279
5.2. The effects of cross-border takeovers on individual wages	281
5.3. The effects of worker mobility between domestic and foreign firms on individual wages	283
5.4. The effects of foreign takeovers of domestic firms on average wages by skill group	284
5.5. The effects of foreign takeovers of domestic firms on wages by skill group	285
5.6. The effects of foreign takeovers of domestic firms on working conditions	287
5.7. Foreign direct investment and wage spillovers to domestic firms	290
5.8. Ratifications of the fundamental labour rights conventions	303
5.9. The enforcement of labour laws	304
5.A1.1. EIRIS policies	319
5.A1.2. National data sources	320
5.A1.3. Variable definitions	321
5.A1.4. Variable definitions and data sources	322
5.A2.1. An overview of the literature on foreign wage premia	323

Statistical Annex

A. Standardised unemployment rates in 27 OECD countries	335
B. Employment/population ratios, activity and unemployment rates	336
C. Employment/population ratios, activity and unemployment rates by selected age groups	339
D. Employment/population ratios, activity and unemployment rates by educational attainment, 2005	348
E. Incidence and composition of part-time employment	351
F. Average annual hours actually worked per person in employment	353
G. Incidence of long-term unemployment	355
H. Earnings dispersion, gender wage gap and incidence of low pay	358
I. Average annual wages in the total economy	359
J. Public expenditure and participant stocks in labour market programmes in OECD countries	360
