

TABLE OF CONTENTS

INTRODUCTION – HISTORY AND CONTEXT

CHAPTER 1. TERMINOLOGY AND CONCEPTS

- 1.1. Production and consumption of education and health at current prices
- 1.2. Production and consumption of education and health in volume
 - 1.2.1 Identification of products
 - 1.2.2 Aggregation of products
 - 1.2.3 New products and quality change
- 1.3. Inputs, Output and Utility
- 1.4. Quality change, new and disappearing products
- 1.5. Cost and value weights
- 1.6. Times series and cross-section analysis
- 1.7. Ensuring consistency between market and non-market measures
- 1.8. Measure for different purposes: national accounts and performance indicators

CHAPTER 2. EDUCATION SERVICES

- 2.1. Terminology and concepts in education services
 - 2.1.1 What are education services?
 - 2.1.2 Inputs, processes, output and outcomes in education
 - 2.1.3 Stratification, weights and formulas
 - 2.1.4 Ensuring consistency between market and non-market education estimates
- 2.2. Cross country comparisons of education output
 - 2.2.1 International databases on education
 - 2.2.2 Computing relative volumes of education services
 - 2.2.3 Planned developments in international databases and suggestions
- 2.3. Time series of education output: guidelines and review of good practices
 - 2.3.1 General guidelines
 - 2.3.2 Review of practices in EU-25 and OECD countries
 - 2.3.3 Could PISA scores be used for national time series?
 - 2.3.4 The British case and the use of examination data
 - 2.3.5 The Finnish case and the use of ECTS credits in tertiary education
 - 2.3.6 The Italian case, the use of a class-size model and the accounting of actual time for graduation in tertiary education

CHAPTER 3. HEALTH

3.1. Terminology and concepts in health

- 3.1.1 Introduction
- 3.1.2 Input, activities, output and outcome
- 3.1.3 Categorisation of health care output volume
- 3.1.4 Ideal measure of health care volume output
- 3.1.5 Problems with measurement by disease or interventions
- 3.1.6 Identification
- 3.1.7 Quantity indicators
- 3.1.8 Improvements and new services and goods in health
- 3.1.9 Ensuring consistency between market and non-market health care estimates
- 3.1.10 Tentative conclusions on health volume output

3.2. Cross country comparisons

- 3.2.1 System of Health Accounts
- 3.2.2 Health Care Quality indicators
- 3.2.3 Cost of illness studies
- 3.2.4 Diagnosis related groups
- 3.2.5 EU HealthBASKET
- 3.2.6 Health specific Purchasing Power Parities
- 3.2.7 The QALY estimate

3.3. Time series
