

TABLE OF CONTENTS

Executive Summary	13
-------------------------	----

Chapter 1

Strengthening the Knowledge-based Economy

Introduction	23
The changing macroeconomic context	23
Progress towards a knowledge-based economy	24
Enhancing investments in science and technology.....	31
Human resources for science and technology	42
Globalisation, networking and increasing co-operation in science and technology.....	45
Notes	51
References	52

Chapter 2

Recent Developments in Science, Technology and Industry Policies in OECD Countries

Introduction	53
General trends in science, technology and industry policies.....	53
New frameworks for science, technology and industry policy	54
Funding and performance of public R&D	56
Stimulating private-sector R&D and innovation	64
Encouraging entrepreneurship and growth of small and medium-sized enterprises	67
Enhancing networking, collaboration and technology diffusion.....	70
Human resources	75
Internationalisation and globalisation	81
Promoting competitive industry	85
Improving policy delivery	90
Notes	96
References	97

Chapter 3

Public and Private Financing of Business R&D

Introduction	99
Changing patterns of business R&D investment	99
Restructuring business R&D	105
Implications for S&T policy	112
Summing up	122
Notes	124
References	126

Chapter 4
Competition and Co-operation in Innovation

Introduction	129
Competition as a driver of innovation	130
The increasing role of co-operation in innovation	131
Competition policy issues	139
Conclusion	149
Notes	151
References	154

Chapter 5
**Changing Government Policies for Public Research:
from Financing Basic Research to Governing the Science System**

Introduction	157
Basic research in the science system	158
Trends in the funding and performance of public sector research	160
Institutional impacts: redefining the role of public sector research	164
Common challenges and some policy responses	164
Conclusions and policy implications	174
Notes	175
References	176

Chapter 6
Patenting and Licensing in Public Research Organisations

Introduction	179
Changing regulatory environments for IP management at PROs	180
Trends in IP protection and licensing at PROs	188
Policy implications	192
Conclusions	198
Notes	200
References	201

Chapter 7
Industrial Globalisation and Restructuring

Introduction	203
Overview of recent trends	204
Sectoral trends	212
Driving forces and performance effects	218
Policy issues	221
References	226

Chapter 8
International Mobility of Science and Technology Personnel

Introduction	229
Trends in the international mobility of the highly skilled workforce	230
Globalisation fuels temporary migration of S&T personnel	233
Competition for foreign students in S&T is increasing	234

Foreign scholars and researchers	239
Drivers of scientific mobility	240
Policy implications	241
Summing up	244
References	245

Chapter 9

Science and Technology in China: Trends and Policy Challenges

Introduction	247
R&D institutions, reforms and current S&T policies	247
Science and technology capabilities	250
Innovation in Chinese enterprises	261
Foreign direct investment and technology trade	266
Policy challenges: improving China's S&T system	269
Concluding remarks	272
Notes	273
References	275

Statistical Annex

Main OECD databases used	277
Standard notes used in this publication for main science and technology indicators	280
Standard industry aggregation by technology level	281
Annex Tables	282

List of Tables

Chapter 1

1.1. Core macroeconomic projections for the OECD area	24
1.2. Contribution of ICTs to output growth	30
1.3. Contribution of the ICT-producing and the ICT-using sectors to aggregate GDP growth	30

Chapter 3

3.1. R&D expenditures by US SMEs	105
3.2. Industry financing of R&D by recipient of funds	108
3.3. Direct <i>versus</i> indirect financing of business R&D in selected OECD countries	115

Chapter 5

5.1. Trends in institutional and competitive funding in selected OECD countries	168
5.2. R&D personnel in the higher education sector by field of S&T activity	172

Chapter 6

6.1. Ownership of IPRs at publicly financed research organisations (PROs)	182
6.2. Top ten public and private US universities receiving patents	189
6.3. Number of total UK patents granted to higher education institutions	191
6.4. Patenting and licensing activity at Canadian PROs	191

Chapter 7

7.1. Top 10 cross-border M&As	206
-------------------------------------	-----

Chapter 8

8.1. Inflows of foreign highly skilled workers and share of Asian migrants among them	231
8.2. Foreign S&T personnel in Japan on non-temporary visas, as a share of highly skilled	232
8.3. Intra-company transferees in selected OECD countries	233

8.4.	H-1B visa petitions approved by the US Immigration and Naturalization Service for the top ten companies and the top seven universities: October 1999-February 2000	234
8.5.	Stock of foreign students in selected OECD countries	235
8.6.	Foreign students enrolled in PhD programmes	236
8.7.	Foreign PhD students at selected Dutch universities	236
8.8.	Share of temporary residents enrolled in US graduate programmes in S&E, by field of study	237
8.9.	Share of temporary residents among earned PhD degrees in the United States, by field of study	237
8.10.	Foreign scholars in major French public research institutes	240

Chapter 9

9.1.	R&D expenditure	251
9.2.	Numbers of patent applications and patents granted	259
9.3.	Invention patent applications by high-technology industry	261
9.4.	R&D intensity of large and medium enterprises	264
9.5.	China's technology imports by type	268
9.6.	Trade balance of high-technology products by industry	269

List of Annex Tables

1.	GDP per capita and person employed	282
2.	Income and productivity levels in the OECD	284
3.	Investment in knowledge and gross fixed capital formation	285
4.	Value added in knowledge based industries	286
5.	Employment in knowledge based industries	287
6.	Gross R&D expenditures in constant USD PPPs	288
7.	GERD as a percentage of GDP	289
8.	Country share in total OECD GERD	290
9.	R&D expenditures by source of funds	291
10.	R&D expenditures by source of funds	293
11.	R&D expenditures by performer	295
12.	R&D expenditures by performer	297
13.	Business R&D expenditures in constant USD PPPs	299
14.	Business R&D expenditures as a percentage of GDP	300
15.	BERD in services and high-technology industries	301
16.	R&D intensity by industry	303
17.	R&D shares by industry	305
18.	R&D expenditures by foreign affiliates	307
19.	Basic research expenditures	308
20.	Government Budget Appropriations or Outlays for R&D (GBAORD) by socio-economic objectives	309
21.	R&D tax subsidies in manufacturing companies	310
22.	Educational attainment of the population	311
23.	Researchers per 10 000 labour force	312
24.	Share of OECD researchers by country	313
25.	Researchers by sector of employment	314
26.	Number of triadic patent families (by priority year)	315
27.	Share of countries in triadic patent families (by priority year)	316
28.	Scientific publications	317
29.	Scientific publications by field of science	318
30.	Technology balance of payments	320
31.	Ratio of trade to GDP	321
32.	Ratio of trade to GDP by manufacturing industries	322
33.	Export ratio by industry	323
34.	Outward and inward direct investment flows in OECD countries	325
35.	Telecommunication access lines per 100 inhabitants	326
36.	Internet hosts by country	327

List of Figures

Chapter 1

1.1.	Investment in knowledge as a percentage of GDP	25
1.2.	Changes in investment in knowledge as a percentage of GDP	26
1.3.	Specialisation of investments in knowledge	26
1.4.	Average annual growth in specialisation	27
1.5.	Average annual growth rate of ICT investment, by component	28
1.6.	ICT expenditures as a percentage of GDP	29
1.7.	GERD as a percentage of GDP in major OECD regions	31
1.8.	GERD as a percentage of GDP	32
1.9.	Share of GERD financed by industry	33
1.10.	Share of GERD financed by government	34
1.11.	Defence budget as a percentage of total GBAORD	34
1.12.	Early- and expansion-stage venture capital financing in OECD countries/regions.....	35
1.13.	Industry orientation of venture capital investments in the United States	36
1.14.	Percentage of GERD performed by the business enterprise sector.....	37
1.15.	Performance of public research	37
1.16.	Distribution of R&D expenditure by type of activity in the government and higher education sectors.....	38
1.17.	Distribution of R&D expenditure by type of activity in the business enterprise sector	38
1.18.	Number of scientific publications per million population.....	39
1.19.	Scientific publications in relation to GERD.....	40
1.20.	Number of US patents per million population	40
1.21.	Number of European patent applications per million population	41
1.22.	Patent families in relation to GERD	41
1.23.	Expenditure on tertiary education as a percentage of GDP	43
1.24.	Population with tertiary-level education, by age group.....	43
1.25.	Total researchers per thousand labour force	44
1.26.	Business enterprise researchers as a percentage of total researchers	45
1.27.	International trade in highly R&D-intensive industries.....	46
1.28.	Ratio of exports to imports in highly R&D-intensive industries.....	47
1.29.	Foreign ownership of domestic inventions.....	47
1.30.	Domestic ownership of inventions made abroad	48
1.31.	Percentage of scientific publications with a foreign co-author.....	49
1.32.	Percentage of US patents with foreign co-inventors	49

Chapter 3

3.1.	Gross expenditures on R&D in the OECD region.....	100
3.2.	National trends in industry-financed and business-performed R&D relative to GDP.....	101
3.3.	Change in BERD intensity by source of funds	102
3.4.	Distribution of the growth in business R&D between 1990 and 1998 by industry.....	103
3.5.	Growth of venture capital markets in OECD countries	104
3.6.	Corporate venture capital investments	110
3.7.	Share of BERD allocated to basic research in selected OECD countries.....	113
3.8.	Direct government funding of business R&D	115
3.9.	Government R&D funding by sector of performance	116
3.10.	Share of BERD financed by government	117
3.11.	SMEs' share of national R&D performance	119

Chapter 4

4.1.	Share of co-applications in triad patent families by priority date	133
4.2.	Strategic technology alliances	134
4.3.	Strategic technology alliances by region	135
4.4.	Number of M&As worldwide	136
4.5.	Percentage of firms innovating with and without co-operation	137
4.6.	Sources of information considered as very important for innovation	138
4.7.	Partners in innovation.....	139

Chapter 5

5.1.	Trends in funding of public research organisations in the OECD area	160
5.2.	Total funding of R&D performed in the higher education and government sectors	161
5.3.	Government funding of R&D in public research organisations in the OECD area.....	162
5.4.	Government funding of R&D in public research organisations in countries that were members of the OECD prior to 1981	162
5.5.	Business funding of public-sector R&D in the OECD countries	163
5.6.	Share of PhD scientists and engineers in permanent and non-tenured, temporary employment in the United States.....	173

Chapter 6

6.1.	US patents awarded to all US universities and to the top 100 patenting universities.....	189
6.2.	Trends in patenting by German PROs.....	190
6.3.	Licensing income of German PROs.....	190

Chapter 7

7.1.	Trend in cross-border M&As	204
7.2.	Cross-border M&As and FDI inflows	205
7.3.	Large-scale cross-border M&As (over USD 1 billion)	205
7.4.	Share of stock swaps in cross-border M&As (value)	206
7.5.	Cross-border M&As by sector (number of deals).....	207
7.6.	Inward M&As by region (deal value).....	208
7.7.	Outward M&As by region (deal value).....	208
7.8.	Cross-border and domestic strategic alliances	209
7.9.	Cross-border strategic alliances by sector	209
7.10.	Cross-border strategic alliances by purpose	210
7.11.	Cross-border strategic alliances by type.....	211
7.12.	Cross-border strategic alliances by region.....	212
7.13.	Automobiles: cross-border M&As and alliances	213
7.14.	Telecommunications: cross-border alliances and M&As	214
7.15.	Pharmaceuticals: cross-border alliances and M&As	215
7.16.	Steel: cross-border alliances and M&As.....	216
7.17.	Airlines: cross-border alliances and M&As.....	218

Chapter 8

8.1.	Foreign and foreign-born workers in the highly skilled workforce.....	230
8.2.	Highly skilled workers entering Japan on temporary visas, by region of origin	232
8.3.	Scholars from other OECD countries attending US universities	239

Chapter 9

9.1.	China's civil R&D system	248
9.2.	GERD by performing sector	250
9.3.	Intensity of total national R&D expenditures	252
9.4.	Regional R&D expenditure vs. regional GDP	253
9.5.	R&D personnel in full-time equivalents.....	254
9.6.	Total R&D personnel by performing sector	254
9.7.	Regional shares of R&D personnel (FTE) vs. regional shares of GDP	255
9.8.	Chinese scientific and technical publications	258
9.9.	Disciplinary distribution of scientific publications	258
9.10.	Types of patents granted to Chinese and foreign applicants.....	260
9.11.	Trends in business R&D spending in China and select OECD countries	261
9.12.	R&D intensity in high-technology sectors	262
9.13.	Domestic invention patents granted by sector.....	262
9.14.	S&T personnel in large and medium-sized enterprises	263
9.15.	Sources of technology development funding in Chinese LMEs	264

List of Boxes

<i>Chapter 2</i>	
2.1. S&T developments in non-member countries: South Africa and Russia	84
<i>Chapter 3</i>	
3.1. R&D at Intel	109
3.2. Externalisation of R&D at IBM.....	111
<i>Chapter 4</i>	
4.1. Antitrust guidelines on horizontal co-operation agreements.....	140
4.2. Antitrust guidelines on IPR licensing	143
4.3. R&D and production co-operation agreements	147
4.4. Mergers	148
<i>Chapter 5</i>	
5.1. Governance structures for science systems differ across the OECD area.....	165
5.2. Foresight in Canada.....	166
5.3. The UK Research Assessment Exercise	169
5.4. An example of centres of excellence in Austria	170
5.5. Reforms to the German Helmholtz Association centres.....	171
<i>Chapter 6</i>	
6.1. Harvard University policy regarding inventions and software created by students	184
6.2. UK regional partnership for managing IP at universities.....	187
<i>Chapter 8</i>	
8.1. Spotlight on Chinese student migration.....	238
8.2. Centres of excellence and innovation clusters draw foreign talent	241
<i>Chapter 9</i>	
9.1. Specific policy measures for China's S&T policy	251
9.2. Types of patents awarded by the Chinese Patent Office	259
9.3. Which OECD countries patent in China?	260
9.4. Township and village enterprises facing particular difficulties in innovation	265
