TABLE OF CONTENTS

Assessment and recommendations 7

I. Key challenges 15

Macroeconomic situation, policies and prospects 15
Longer-term challenges 18
Concluding remarks 36

II. Raising labour supply for the longer term 37

More people in work 37
Earlier labour-force entry 40
Delaying the effective retirement age 46
Raising average hours worked 55
Summing up 57

III. Migration and integration 59

Immigration patterns 59
Entry policies 64
Improving the integration of immigrants from less-developed countries 68
Conclusions 83

IV. Refining the medium-term fiscal framework 87

The tax freeze 88
Reinforcing expenditure control and efficiency 91
Strengthening inter-governmental relations 94
Tax cuts on earned income 97
Summing up 101

V. Some environmental aspects of sustainable development 103

Climate change 104
Reducing water pollution 110
Improving management of waste 114

Notes 119

Bibliography 126

Annexes

I. Macroeconomic situation and prospects 134
II. Demographic projection assumptions 139
III. Basic mechanisms and assumptions in the projection of public finances 141

IV. Progress on structural reform 142
V. More people in work 150
VI. Voluntary early retirement benefit reform 155
VII. Transforming disability into ability: an OECD-wide study 157
VIII. Refugees and asylum seekers in the Aliens Act 2002 160
IX. Sanctions in 2003 161

Boxes

1. Recommendations on policies to increase labour supply 58
2. Welfare assistance for asylum seekers 65
3. Integration through the workplace 71
4. Recommendations on policies for immigrants 86
5. Principles of the tax freeze 89
6. Using the tax freeze as a budget rule 91
7. A trading scheme alternative for managing local government taxes 97
8. The integration of environmental concerns into government policy 103

Tables

1. Population projections 21
2. Possible change in total hours worked from demographics and labour market trends 29
3. Central and local government primary balance 31
4. Long-term requirements for general government finances 32
5. Indicators of fiscal sustainability in various studies 33
6. Effects on fiscal sustainability of various changes to assumptions 35
7. Labour force status of prime-age men 38
8. Net replacement rates 39
9. Study progress by age 42
10. Private internal rates of return to education 44
11. Population by age and activity status 48
12. Effects from different changes to the VERB scheme 53
13. Recipients of early retirement (disability) pensions 54
14. Activity rates in selected OECD countries 62
15. Participation rates among different immigrant groups 63
16. Working-age population outside the labour force 64
17. Family reunification permits granted and denied 67
18. Gross income for self-employed and wage-earners 72
19. Education and labour market participation 75
20. School-to-work transition 76
21. Danish language skills 77
22. Concentration of immigrants by municipalities 80
23. Years on social assistance, municipal activation or retraining programmes 82
24. Disposable income gaps between work and unemployment 82
25. Contributions to required structural fiscal surplus in 2003 88
26. Key assumptions in the government's medium-term survey 93
27. Degree of self-financing from various possible reductions in earned income taxes 100
28. Main indicators: climate change 104
29. Dispersion of tax rates on carbon by sector 106
30. Present value of various policies introduced between 1992 and 1999 107

31. Projections of Danish greenhouse gas emissions and the value of allowances 109
32. The cost of policy measures to reduce nitrogen leaching 113
33. Performance indicators: waste 115
34. The waste tax 116
35. Household waste disposal charges and taxes 117

Annexes

A1. Summary of projections 135
A2. Reform of the voluntary early retirement benefit system 156
A3. Effect of sanctions on counties 162

Figures

1. Indicators of macroeconomic balances 16
2. Divergent output gaps 17
3. Dependency ratios 20
4. Participation rates by age, gender and origin 22
5. Demographic impact on the labour force 24
6. Participation rates over time 25
7. Evolution of working time 26
8. Weekly working hours and preference for leisure 28
9. Elements shaping the pressure on public finances 30
10. Expected years in education and the labour force for 15 to 29 year-olds 41
11. Median transition time from upper secondary to higher education 42
12. Relative earnings by educational attainment 43
13. Educational performance of 15 year-olds 46
14. Average age of withdrawal from the labour force 47
15. Participation rates and number of VERB recipients 49
16. Net inflow and contributors to VERB 51
17. Duration of sick leave and medical certificates 56
18. Residence permits granted 60
19. Population by age and origin 60
20. Inflows of foreigners to selected OECD countries 61
21. Labour force participation by age at arrival 63
22. Recognition rates for asylum seekers 65
23. Annual after-tax income for high-earners in selected OECD countries 68
24. Unemployment rates by country of origin 69
25. Low-skilled jobs and wage compression 70
26. Educational attainment of Danes and immigrants 74
27. Reading literacy performance 79
28. Net replacement rates for four family types 84
29. Recurrent taxes on immovable property 90
30. County and municipality tax rates 94
31. Changes in tax rates of local governments, 2003 96
32. Marginal tax rates 99
33. Greenhouse gas emissions 105
34. Marginal abatement costs for greenhouse gas emissions 107
35. Water pollution 111

Annexes

A1. Private consumption and household disposable income 136
A2. Business sector investment and productivity 136
A3. Official interest rates and effective exchange rate 137
A4. Real growth in public consumption 137
A5. Macroeconomic performance and prospects 138
