

## Country profile

### Abu Dhabi (United Arab Emirates)

- The typical teacher in lower secondary education in Abu Dhabi (United Arab Emirates) is a 39 year old woman, who reports having 13 years of teaching experience and who completed a teacher education or training programme. The proportion of female principals is similar to the proportion of female teachers (61% and 59%, respectively). On average, principals in Abu Dhabi (United Arab Emirates) are 49 years old and report having 11 years of experience in their role.
- 92% of lower secondary teachers report having undertaken professional development in the 12 months prior to the survey. The areas in which the highest proportions of teachers report a high need for professional development are teaching students with special needs and strategies for using new technologies in the workplace.
- Teachers in Abu Dhabi (United Arab Emirates) report spending 77% of their lesson time on actual teaching and learning. This means that 21% of their time is reportedly spent on administrative tasks and keeping order in the classroom (8% and 13%, respectively). They also report spending 21 hours per week on average teaching, 8 hours preparing lessons and 5 hours marking student work.
- More than 85% teachers report overall satisfaction with their job. However, only 67% of them believe that teaching is a valued profession in society.

## HIGHLIGHTS

### Teachers

- A smaller proportion of teachers are female than in most other TALIS countries. (58.9%) [Download Indicator](#)
- Teachers in Abu Dhabi (United Arab Emirates) are on average younger than in most other TALIS countries. (38.7 Years) [Download Indicator](#)
- On average, teachers in Abu Dhabi (United Arab Emirates) have spent fewer years teaching than in most other TALIS countries. (12.8 Years) [Download Indicator](#)
- A smaller proportion of teachers have completed a teacher education or training programme than in most other TALIS countries. (83.3%) [Download Indicator](#)

### School leadership

- A larger proportion of principals are female than in most other TALIS countries. (60.9%) [Download Indicator](#)
- Principals in Abu Dhabi (United Arab Emirates) are on average younger than in most other TALIS countries. (49 Years) [Download Indicator](#)
- On average, principals in Abu Dhabi (United Arab Emirates) have spent more years in their role than in most other TALIS countries. (10.9 Years) [Download Indicator](#)

- A larger proportion of principals believe that the teaching profession is valued in society relative to other TALIS countries. (70.7%) [Download Indicator](#)
- A smaller proportion of principals are satisfied with their job relative to most other TALIS countries. (92.2%) [Download Indicator](#)

### Professional development of teachers

- A larger proportion of teachers report having taken part in a formal induction programme compared to most other TALIS countries. (70.9%) [Download Indicator](#)
- A larger proportion of teachers report having a mentor assigned compared to most other TALIS countries. (51.9%) [Download Indicator](#)
- A larger proportion of teachers report acting as a mentor to another colleague compared to most other TALIS countries. (29.2%) [Download Indicator](#)
- A smaller proportion of teachers report a high level of need for professional development aimed at developing their ICT skills for teaching compared to most other TALIS countries. (9.5%) [Download Indicator](#)

### Teacher appraisal and feedback

- Compared to most other TALIS countries, a larger proportion of teachers report that the feedback they received has led to an increase in the number of hours of professional development they undertake. (67.7%) [Download Indicator](#)
- Compared to most other TALIS countries, a larger proportion of teachers report that the feedback they received has improved their teaching practice. (79.1%) [Download Indicator](#)
- In Abu Dhabi (United Arab Emirates), a larger proportion of teachers work in schools where the principal reports the use of some kind of formal appraisal than in most other TALIS countries. (100%) [Download Indicator](#)
- Of those schools where the principal reports formal appraisal practices, a larger proportion of teachers have their classrooms directly observed than in most other TALIS countries. (100 %) [Download Indicator](#)

### Teaching practices

- On average, teachers report spending more hours per week teaching compared to most other TALIS countries. (21.2 Hours) [Download Indicator](#)
- Teachers report spending more hours per week marking and correcting work compared to most other TALIS countries. (5.4 Hours) [Download Indicator](#)

### Teachers' self-efficacy and job satisfaction

- A larger proportion of teachers believe that they are able to help their students to value learning, relative to most other TALIS countries. (95.4 %) [Download Indicator](#)
- A larger proportion of teachers believe that they can help their students to think critically, relative to most other TALIS countries. (93.1 %) [Download Indicator](#)
- A larger proportion of teachers believe that the teaching profession is valued in society relative to most other TALIS countries. (66.5 %) [Download Indicator](#)
- A smaller proportion of teachers are satisfied with their job relative to most other TALIS countries. (88.9 %) [Download Indicator](#)

# DATA TABLE

Indicator		Abu Dhabi (United Arab Emirates)	TALIS average

<b>PROFESSIONAL DEVELOPMENT OF TEACHERS</b>			
Teachers having taken part in a formal induction programme (percentage)	<a href="#">(2013) Download Indicator</a>	70.9	48.6
Teachers having a mentor assigned (percentage)	<a href="#">(2013) Download Indicator</a>	51.9	12.8
Teachers who are mentors to another colleague (percentage)	<a href="#">(2013) Download Indicator</a>	29.2	14.2
Teachers who undertook professional development in the last 12 months (percentage)	<a href="#">(2013) Download Indicator</a>	92.0	88.4
Teachers who report a high level of need to develop their ICT skills for teaching (percentage)	<a href="#">(2013) Download Indicator</a>	9.5	18.9
Teachers who report a high level of need to develop the skills to teach students with special needs (percentage)	<a href="#">(2013) Download Indicator</a>	22.6	22.3
<b>TEACHER APPRAISAL AND FEEDBACK</b>			
Teachers who report that feedback has increased the number of hours of professional development they undertake (percentage)	<a href="#">(2013) Download Indicator</a>	67.7	45.8

Indicator		Abu Dhabi (United Arab Emirates)	TALIS average
Teachers who report that feedback has improved their teaching practice (percentage)	<a href="#">(2013) Download Indicator</a>	79.1	62.0
Schools that use some kind of formal appraisal (percentage)	<a href="#">(2013) Download Indicator</a>	100.0	92.6
Teachers having their classrooms directly observed in schools with formal appraisal practices (percentage)	<a href="#">(2013) Download Indicator</a>	100.0	94.9
<b>TEACHERS' BELIEFS AND PRACTICES</b>			
Teaching time per week (hours)	<a href="#">(2013) Download Indicator</a>	21.2	19.0
Individual time per week spent planning and preparing lessons (hours)	<a href="#">(2013) Download Indicator</a>	7.6	7.0
Time spent marking and correcting work (hours per week)	<a href="#">(2013) Download Indicator</a>	5.4	5.0
Class-time time spent on administrative tasks such as marking attendance (percentage)	<a href="#">(2013) Download Indicator</a>	8.3	8.0
Class-time spent on classroom management (percentage)	<a href="#">(2013) Download Indicator</a>	12.6	12.7
Class-time spent on actual teaching and learning tasks (percentage)	<a href="#">(2013) Download Indicator</a>	76.7	78.7
<b>TEACHERS' SELF-EFFICACY AND JOB SATISFACTION</b>			
Teachers who believe they help their students to value learning (percentage)	<a href="#">(2013) Download Indicator</a>	95.4	80.7
Teachers who believe they help their students to think critically (percentage)	<a href="#">(2013) Download Indicator</a>	93.1	80.3
Teachers who believe that the teaching profession is valued in society (percentage)	<a href="#">(2013) Download Indicator</a>	66.5	30.9
Teachers who are satisfied with their job (percentage)	<a href="#">(2013) Download Indicator</a>	88.9	91.1

# What is TALIS?

The **Teaching and Learning International Survey (TALIS)** collects internationally comparable data on the learning environment and the working conditions of teachers in schools across the world with the aim to provide valid, timely and comparable information from the perspective of practitioners in schools to help countries review and define policies for developing a high-quality teaching profession. Cross-country analysis from TALIS enables countries to identify other countries facing similar challenges and to learn from other policy approaches.

Recruiting, retaining and developing teachers are vital in ensuring high-quality student outcomes in school systems worldwide. TALIS examines the ways in which teachers' work is recognised, appraised and rewarded and assesses the degree to which teachers perceive that their professional development needs are being met. The study provides insights into the beliefs and attitudes about teaching that teachers bring to the classroom and the pedagogical practices that they adopt. Recognising the important role of school leadership, TALIS examines the roles of school leaders and the support that they give their teachers. Finally, TALIS examines the extent to which certain factors relate to teachers' reports of job satisfaction and self-efficacy.

## Key features of the TALIS 2013 survey

**Who?** The international target population for TALIS is composed of lower secondary teachers and their school leaders in mainstream public and private schools. In each country, a representative sample of 20 teachers and their school principal from 200 schools was randomly selected for the study. Approximately 106 000 lower secondary teachers responded to the survey, representing more than 4 million teachers in more than 30 participating countries and economies.

**How?** A conceptual framework for TALIS was developed by subject-matter experts, the international research consortium and the OECD to steer the development of the TALIS instruments. The framework is based on the concept of effective teaching and learning conditions. The framework is available on the TALIS website, along with all TALIS publications and the international database.

**What?** TALIS began in 2008 in 24 countries, focusing on lower secondary education. TALIS 2013 now covers more than 30 countries and economies, and although the main focus remains in lower secondary, some countries opted to also survey their primary schools (6 countries) and upper secondary schools (10 countries). Further, 8 countries chose to gain additional insights by surveying schools that participated in the 2012 Programme for International Student Assessment (PISA).

Separate questionnaires (paper and online) for teachers and school leaders, requiring between 45 and 60 minutes to complete, were used to gather the data. They included questions on:

- teacher characteristics
- working environments
- leadership
- learning and development opportunities
- appraisal and feedback
- pedagogical practices and beliefs
- self-efficacy and job satisfaction
