Annex 1: Development and content of indices used in this report	145
What measures are used?.....	146
How should standardised frequencies and standardised indices be interpreted?.....	146
Ratios.....	147
Standardised indices.....	147

Annex 2: Background information on the education systems that provided data for this report.....	151
Programme number and differentiation	152
Providers by programme levels taught in the same institution	154
Single-programme providers and multiple-programme providers.....	154
Publicly and privately managed institutions.....	155
School size	155
Annex 3: Sampling	163
Target population.....	164
Unit of sampling	164
Sample design	165
Sample size	165
Annex 4: Weighting and analysis	169
Weights for estimating national variance and standard error	170
Weights used for estimating the international mean and standard deviation	171
