

EDUCATION AT A GLANCE 2007

ERRATA

17 December 2007

Chapter A

Table A3.1

This table has changed in comparison to *Education at Glance 2006*. Columns (3), (4), and (5) represent the proportion of graduates to the total number of graduates by duration of programme (*i.e.* 96% of Australian graduates attend programmes lasting from three to less than five years and the remaining 4% attend programmes lasting five to six years) instead of graduation rates (graduates divided by the population of a given age group) for the different durations of programmes.

Chart A3.2

Graduation rates by duration of programme have been recalculated by applying the proportion of graduates by duration (columns 3, 4 or 5 in Table A3.1) to the graduation rates (all programmes, column 2 in Table A3.1). For example, for Australia this is $59.4 \times 0.96 = 57.0$.

Chapter D

Chart D2.3

Pre-primary education

The bar for Slovenia should read 9.6.
