

National Experts who contribute to the development and validation of the OECD Tax-Benefit model

This version: January 2019

Acknowledgments

The OECD tax-benefit team is indebted to all previous and current experts who have contributed to the development of the [OECD tax-benefit model](#) (“**TaxBEN**”). Every year, national experts provide us with updates on the policy rules that are within the scope of the OECD tax-benefit model. They are always available when we ask for clarifications regarding the interpretation of complex policy rules; they also help us validate selected model results and sign-off the annual country reports that describe the rules used in their countries to calculate benefit entitlements and tax liabilities. Without their valuable contribution, the development of the OECD tax-benefit model would not have been possible.

National experts and related institution

The network of national experts that is involved in the update and development of the OECD Tax-Benefit model consists of the following members:
