Territorial Reviews of Metropolitan Regions

- 34 metropolitan regions, including, most recently, Chicago, Toronto, Venice, Gauteng, Chihuahua and Guangdong
Thematic reports on urban policy and governance

• 2013 | Green Growth in Cities
• 2012 | Urban Trends and Policies in OECD Countries
• 2012 | Compact City Policies
• 2010 | Cities and Climate Change
• 2009 | Cities, Climate Change and Multi-level Governance
• 2006 | Competitive Cities in the Global Economy
### OECD’s Green Cities Programme (2010 – )

- Conceptual framework (2011)
- Case studies (2011-12)

- Synthesis report: *Green Growth in Cities*

**Launch: 23 May 2013 in Stockholm**
Urban green growth in dynamic Asia: Key questions

Building on the lessons learned from the OECD city studies ...

• (How) Is urban green growth different for cities in developing and emerging markets?
  ➢ Rapid urbanisation and motorisation
  ➢ Greater vulnerability to climate change
  ➢ Informal settlement
  ➢ Continuing industrialisation

• What policy frameworks and instruments are needed, and practical in dynamic Asia?

• How can we facilitate knowledge sharing among OECD and fast-growing Asian cities so they all can benefit from the mutual learning process?
Three elements of the project

1. **Concept paper (2013)**
   - Provide analytical framework
   - Parallel work with OECD’s “Green Growth and Developing Countries Report”

2. **Case studies of 4-6 cities (2013-14)**
   - Assess the impact of urban green growth policies
   - Individual report as the deliverable

3. **Knowledge sharing (2013-14)**
   - Workshops in each case study process
   - International conferences (Stockholm in May, 2013, Kitakyushu in October, 2013, etc.)
Key policy issues to be addressed

- **Competitiveness** in a fast-growing economy, in particular greener products/services
- **Local quality of life** and human health
- Sustainable urban spatial form, including climate resilience
- **Affordability and mobility**
- Institutional capacity including multi-level policy coherence
- **Financing** urban green growth actions
- **Monitoring**
THANK YOU FOR YOUR ATTENTION AND FOLLOWING DISCUSSION!
